

AXIS F92A01

AXIS F92A01 Height Strip Housing for mounting of compatible sensor units near building exits. The sensor unit is mounted in the housing at a height of 170 cm in the metric model and 5.5 ft. in the imperial version as measured from the ground up and positioned to look straight at a person's face for more reliable identification, even when the person is wearing a hood or baseball cap. Available in black or silver with metric or imperial front cover pieces.
