Introduction

Features of Printer

Realizing High Productivity

High-speed printing

The speeds of the print head and paper feed have been increased for faster printing.

The printer is equipped with a high-speed rotary cutter for quick cutting, significantly increasing productivity.

Support for large-capacity roll paper

Roll paper up to 170 mm outer diameter can be loaded. This reduces roll paper replacement time and person-hours, enabling efficient high-volume printing.

Reducing print waste with the print head nozzle self-cleaning function

The printer has a Self Check and Cleaning function that automatically detects and removes clogging of print head nozzles. This reduces decreases in print quality from clogging.

 [“General Settings - Printer Settings” on page 143](#)

Realizing High Resolution

CAD drawings that are clear, legible, and can even be used safely outdoors

Newly-developed Epson UltraChrome XD2 ink enables the printer to produce extremely detailed drawings both in black and white and in color.

The supplied printer driver offers a line drawing mode, making it easier to optimize printing for line drawing and, through unsurpassed reproduction of line drawing and fine lines in the form of connected lines, diagonals, and curves, ensuring the best possible results when the printer is used for drawings.

In addition, you can even safely take your drawings outdoors with you because they are printed using ink with excellent water resistance.

 [“Printing CAD Drawings” on page 59](#)

Posters and displays that are vivid and also allow for short-term outdoor display

Posters with vivid hues can be printed simply by selecting, for example, **Poster (Photo)/Perspective** in Select Target of the supplied printer driver.

Short-term outdoor display is even supported since ink that also has excellent light fastness is used.

Your posters will last even longer if you use lamination processing.

The effect differs depending on the paper.

Insistence on Ease-of-Use

Back and side can be placed next to a wall

All work, such as replacing ink cartridges, maintenance boxes, and cutters, as well as loading roll paper and originals (SC-T5400M Series only), are done from the front of the printer, allowing the back and side of the printer to be placed against a wall. You do not need to turn the printer around, thus it can easily be situated in confined spaces.

See the following for dimensions.

 [“Specifications Table” on page 232](#)

Checking current operating status even from afar thanks to an alert lamp

Errors such as ink or paper running out are immediately obvious even at a distance, thanks to the large, highly visible alert lamp.

Smooth operation while checking the operating instructions on the screen

In addition to having a screen design that enables intuitive operation, this printer allows you to check illustrated instructions of operations such as how to load paper.

 [Operator's Guide \(booklet or PDF\)](#)

Introduction

Printer driver that is simple and easy to operate

Print settings can be optimized simply by choosing the desired use or target. This spares you the trouble of adjusting print settings individually. When you select a Source setting, printing failures due to paper loading mistakes are reduced because the size and type of paper loaded in the printer are applied automatically. In addition to checking the set conditions in an illustration in the printer driver, you can also check a detailed image in the preview screen before printing.

Support for wireless LAN connection

This printer can be freely placed where desired without considering cable routing because it can connect with a computer via a wireless LAN to print. Of course, it also supports a wired LAN connection.

Furthermore, even if your device is not connected to a LAN, this printer also allows printing by directly connecting with it using Wi-Fi Direct.

 [“Switching to Wireless LAN” on page 30](#)

 [“Directly Connection Wirelessly \(Wi-Fi Direct\)” on page 31](#)

Installing a color sensor (SC-T5400M Series)

By installing a color sensor, shadows from creases are less likely to appear in the results of copies and scans.

The color sensor also improves the reproduction of highlighted parts when you copy or scan originals that have parts written in highlighter.

Introduction

Notes on Usage and Storage

Installation space

Make sure that you secure the following space, clear of any other objects, so that paper ejection and consumable replacement are not obstructed.

See the “Specifications Table” for the external dimensions of the printer.

SC-T3400N Series

	W	D	H
SC-T3400N Series	1230 mm	1288 mm	760 mm

Notes when using the printer

Note the following points when using this printer to avoid breakdowns, malfunctions, and print quality decline.

- ❑ When using the printer, observe the operating temperature and humidity range described in the "Specifications Table".
 [“Specifications Table” on page 232](#)
Even when the conditions above are met, you may not be able to print properly if the environmental conditions are not suitable for the paper. Be sure to use the printer in an environment where the paper's requirements are met. For more details, see the documentation supplied with the paper. Also, when operating in dry areas, air conditioned environment, or under direct sunlight, maintain the appropriate humidity.
- ❑ Do not install the printer next to heat sources or directly in the path of air from a ventilator or air conditioner. Failure to observe this precaution could result in the print head nozzles drying and clogging.
- ❑ The print head may not be capped (i.e., may not move to the right-hand side) if an error occurs and the printer is turned off without first resolving the error. Capping is a function for automatically covering the print head with a cap (lid) to prevent the print head from drying out. In this case, turn on the power and wait a while until capping is performed automatically.
- ❑ When the power is on, do not remove the power plug or cut the power at the breaker. The print head may not be capped properly. In this case, turn on the power and wait a while until capping is performed automatically.
- ❑ The printer may automatically perform print head cleaning to maintain good printing quality. Please wait until cleaning finishes without opening any of the covers or turning off the power.

Introduction

Notes when not using the printer

If you are not using it, note the following points when storing the printer. If it is not stored correctly, you may not be able to print properly the next time it is used.

- ❑ When storing the printer, store it flat with the ink cartridges installed. Do not place the printer tilted, upright, or upside down.
- ❑ If you do not print for a long time, the print head nozzles may become clogged. We recommend that you print once a week to prevent the print head from clogging.
- ❑ The roller may leave an impression on paper that is left in the printer. This can also cause wavy or curled paper resulting in paper feeding problems or the print head could be scratched. Remove any paper when storing.
- ❑ Store the printer after confirming that the print head has been capped (the print head is positioned at the far right). If the print head is left uncapped for a long time, the print quality may decline.

Note:

If the print head is not capped, turn the printer on, and then turn it off.

- ❑ To prevent the accumulation of dust and other foreign matter in the printer, close all covers before placing it in storage.
If the printer will be not be used for an extended period, protect it with an anti-static cloth or other cover.
The print head nozzles are very small, and they can become clogged easily if fine dust gets on the print head, and you may not be able to print properly.
- ❑ The print head may fail if the environmental temperature becomes -10°C or lower. If the environmental temperature in the room or during transport is expected to become -10°C or lower, be sure to discharge the ink in advance.
 [“Handling if Transporting/Leaving the Printer in an Environment of -10°C or Less” on page 228](#)

Notes on handling ink cartridges

Note the following points when handling ink cartridges to maintain good print quality.

- ❑ The ink cartridges packaged with your printer are partly used during initial setup. In order to produce high quality printouts, the print head in your printer will be fully charged with ink. This one-off process consumes a quantity of ink and therefore these cartridges may print fewer pages compared to subsequent ink cartridges.
- ❑ We recommend that ink cartridges be stored at room temperature out of direct sunlight and used before the expiry date printed on the packaging.
- ❑ To ensure good results, we recommend that all the ink in the cartridge be used within a year of installation.
- ❑ Ink cartridges that have been stored at low temperatures for an extended period should be allowed to return to room temperature over a period of at least four hours.
- ❑ Do not touch the IC chips on the ink cartridges. You may not be able to print properly.
 [“Replacing Ink Cartridges” on page 184](#)
- ❑ Install ink cartridges into all slots. You cannot print if any of the slots are empty.
- ❑ Do not leave the printer without ink cartridges installed. The ink in the printer may dry, preventing it from printing as expected. Leave ink cartridges in all slots even while you do not use the printer.
- ❑ The ink level and other data are stored in the IC chip, allowing cartridges to be used after being removed and replaced.
- ❑ To avoid getting dirt on the ink supply port, store the removed ink cartridge properly. The ink supply port has a valve in it so it does not need to be capped.
- ❑ Removed ink cartridges may have ink around the ink supply port, so be careful not to get any ink on the surrounding area when removing the cartridges.

Introduction

- ❑ To maintain the quality of the print head, this printer stops printing before ink cartridges are completely expended.
- ❑ Although the ink cartridges may contain recycled materials, this does not affect printer function or performance.
- ❑ Do not dismantle or remodel ink cartridges. You may not be able to print properly.
- ❑ Do not drop or otherwise subject an ink cartridge to a strong impact. Ink may leak from the cartridge.
- ❑ A mixture of color inks may be used to print black depending on the paper type and print quality settings even for black and white and grayscale printing.

Notes on handling paper

Note the following points when handling and storing the paper. If the paper is not in good condition, print quality may decline.

Check the documentation supplied with each paper.

Notes on Handling

- ❑ Use Epson special media under normal room conditions (temperature: 15 to 25°C, humidity: 40 to 60%).
- ❑ Do not fold the paper or scratch the surface of the paper.
- ❑ Avoid touching the printable surface of the paper with your bare hands. Moisture and oils from your hands can affect print quality.
- ❑ Handle paper by the edges. We recommend wearing cotton gloves.
- ❑ Changes in temperature and humidity may cause paper to become wavy or curled. Check the following points.
 - ❑ Load the paper just before printing.
 - ❑ Do not use wavy or curled paper. For roll paper, cut off the wavy or curled parts and then load it again. For cut sheets, use new paper.

- ❑ Do not wet the paper.
- ❑ Do not throw away the paper packaging as you can use it for storing the paper.
- ❑ Avoid locations that are subject to direct sunlight, excessive heat, or humidity.
- ❑ Keep cut sheets in their original package after opening, and keep them in a flat place.
- ❑ Remove roll paper that is not in use from the printer. Rewind it correctly and then store it in the original packaging that came with the roll paper. If you leave the roll paper in the printer for a long time, its quality may decline.

Notes on handling printed paper

To maintain long lasting, high quality print results, note the following points.

- ❑ Do not rub or scratch print outs. If they are rubbed or scratched, the ink may peel off.
- ❑ Do not touch the surface of print outs. The ink may peel off.
- ❑ Make sure the print outs are completely dry before folding or stacking; otherwise, the color may change where they touch (leaves a mark). These marks will disappear if they are separated immediately and dried; however, they will remain if not separated.
- ❑ If you put the print outs in an album before they are completely dry, they may be blurred.
- ❑ Do not use a dryer to dry the print outs.
- ❑ Avoid direct sunlight.
- ❑ Prevent color distortion while displaying or storing the print outs by following the instructions in the paper's documentation.

Introduction

Note:

Typically, print outs and photos fade over time (color distortion) due to the effects of light and various constituents in the air. This also applies to Epson special media. However, with the correct storage method, the degree of color distortion can be minimized.

- ❑ See the documentation supplied with Epson special media for detailed information on handling the paper after printing.
- ❑ The colors of photos, posters, and other printed materials appear different under different lighting conditions (light sources*). The colors of print outs from this printer may also appear different under different light sources.
* Light sources include sunlight, fluorescent light, incandescent light, and other types.

Saving Power

The printer enters sleep mode or turns off automatically if no operations are performed for a set period. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

Sleep mode

The printer enters sleep mode when there are no errors, no print jobs being received, and no control panel or other operations performed. When the printer enters sleep mode, the control panel's screen turns off and the internal motors and other parts switch off to consume less power.

Sleep mode is exited if a print job is received or the screen of the control panel is touched.

You can set the time it takes for the printer to enter sleep mode. At default settings, the printer enters sleep mode if no operations are performed for 15 minutes. The time it takes for the printer to enter sleep mode can be changed in the **Basic Settings** menu.

 [“General Settings - Basic Settings” on page 141](#)

Note:

When the printer enters sleep mode, the control panel's screen goes blank as if the power has been turned off, but the  light remains lit.

Power Off Timer

This function automatically turns the printer off if no errors occur, no print jobs are received, and no control panel or other operations are performed for a set period of time.

The default setting differs as follows depending on the model.

- ❑ SC-T5405/SC-T5400M/SC-T3405/SC-T3405N/
SC-T5485/SC-T5480M/SC-T3485N
Set to **8h**.
- ❑ SC-T5465/SC-T5460M/SC-T3465/SC-T3465N/
SC-T5435/SC-T5430M/SC-T3435
Set to **Off**.

Power Off Timer settings can be changed from the Basic Settings menu.

Introducing the Software

Introducing the Software

Provided Software

The following table lists the provided software.

The supplied software disc contains the software for Windows. When using a Mac or a computer without a disc drive, download the software from <http://epson.sn> and then install it.

For details on the various software, see the online help of each software or the *Administrator's Guide* (online manual).

Note:

Convenient software compatible with this printer is introduced on the Epson website. Please check the information from the following link.

<http://www.epson.com>

Software Name	Function
Printer Driver	Install the printer driver to take full advantage of the functionality of this printer when printing. ☞ "Printing with the Printer Driver from Your Computer" on page 49
EPSON Software Updater	Software to check whether there is any software update information and then notify you and install the software if an update is available. It allows you to update the firmware and already installed software of the printer. ☞ "Updating Software or Installing Additional Software" on page 28
LFP Print Plug-In for Office (Windows Only)	Plug-in software for Microsoft Office applications (Word, Excel, and PowerPoint). Installing this plug-in displays ribbon items in Office applications that give quick access to horizontal and vertical banner printing and enlarged printing. It can be installed by selecting it in the Additional Installation screen when installing the software. You can also install it later with EPSON Software Updater. The supported Microsoft versions are shown below. Office 2003/Office 2007/Office 2010/Office 2013/Office 2016
Epson Edge Dashboard*	Convenient software for administrating multiple printers. This enables confirmation in a list of the status of printers registered for monitoring. This also allows simple copying of Custom Paper Settings configured on a single printer to configure multiple other printers. ☞ "How to Start" on page 27 ☞ "Closing" on page 27

Built-in Software in the Printer

The following software comes preinstalled in the printer. Start and use it from a Web browser via the network.

Software Name	Function
Web Config	<p>The network security settings can be configured from Web Config. This software also has an email notification function for notifying of printer errors and other problems.</p> <p> "How to Use Web Config" on page 26</p>

Introducing the Software

How to Use Web Config

This section describes how to start the software and provides a summary of its functions.

How to Start

Start the software from a web browser on a computer or smart device that is connected to the same network as the printer.

- 1 Check the IP address of the printer.

Touch  on the Home screen, select the connected network, and check the IP address.

Note:

The IP address can also be checked by printing a network connection check report. A report can be printed by touching the following in order from the Home screen.

Settings - General Settings - Network Settings - Connection Check

- 2 Start a Web browser on a computer or smart device connected to the printer via the network.

- 3 Enter the IP address of the printer in the address bar of the Web browser and press the **Enter** or **Return** key.

Format:

IPv4: http://IP address of printer/

IPv6: http://[IP address of printer]/

Example:

IPv4: http://192.168.100.201/

IPv6: http://[2001:db8::1000:1]/

Closing

Close the Web browser.

Function Summary

This section introduces the main functions of Web Config. See the *Administrator's Guide* for more details.

Main Functions

- Check the printer's status, such as the remaining amount of ink.
- Check and update the printer's firmware version.
- Configure the printer's network settings and advanced security settings, such as SSL/TLS communication, IPsec/IP filtering, and IEEE802.1X, which cannot be configured with the printer alone.
- Edit the custom paper settings and export and import the settings.
The custom paper settings registered in **Settings - General Settings - Printer Settings - Custom Paper Setting** of the printer can be changed as well as exported to a file and then imported (registered) to another printer. This is convenient when you install multiple printers and want to use common custom paper settings for them.
- You can print by simply selecting the file you want to print, and then uploading it to the printer. (SC-T5400M Series only)

How to Use Epson Edge Dashboard

How to Start

Epson Edge Dashboard is a Web application that resides on your computer. Starting the computer will automatically start Epson Edge Dashboard and this remains running.

1 Display the screen as follows.

Windows

From the Taskbar on the Windows desktop, click the **Epson Edge Dashboard** icon, and select **Show Epson Edge Dashboard**.

Alternatively, from **Start**, click **All apps** (or **All Programs**) - **Epson Software** - **Epson Edge Dashboard**.

Mac

From the desktop menu, click the **Epson Edge Dashboard** icon, and select **Show Epson Edge Dashboard**.

2 The Epson Edge Dashboard screen appears.

See the Epson Edge Dashboard help for more details.

Closing

Close the Web browser to close the Epson Edge Dashboard screen. Since Epson Edge Dashboard is a resident software on the computer, it does not stop running.

Introducing the Software

Updating Software or Installing Additional Software

When you install the software during setup as described in the *Setup Guide*, Epson Software Updater is installed. Epson Software Updater allows you to update the firmware and already installed software in your computer as well as install additional software compatible with the printer.

Note:

The software is updated as needed for greater convenience and more robust functionality. We recommend setting to receive update notifications with Epson Software Updater and updating the software as soon as possible when there is a notification.

Checking Whether Updates Available and Updating Software

1 Check that the computer and printer are in the following states.

- Computer is connected to the Internet.
- Printer and computer can communicate.

2 Start Epson Software Updater.

- Windows
Display the list of all the programs and then click Epson Software Updater in the Epson Software folder.

Note:

- If you press the Windows key (key with Windows logo mark) on the keyboard and then type the software name in the search box of the displayed window, the software appears immediately.
- The software can also be started by clicking the printer icon on the Taskbar of the desktop and then selecting **Software Update**.

- Mac
Select **Go - Applications - Epson Software - EPSON Software Updater**.

3 Select the software or manuals to be updated and then update them.

Follow the on-screen instructions.

! Important:

Do not turn off the computer or printer during the update.

Note:

Software not displayed in the list cannot be updated with Epson Software Updater. Check the latest versions of software on the Epson website.

Please note that you cannot update or install software using Epson Software Updater if you are using a Windows Server OS. Download the software from the Epson website.

<http://www.epson.com>

Receiving Update Notifications

Windows

- 1** Start Epson Software Updater.
- 2** Click **Auto update settings**.
- 3** Select the interval to perform the update check in the **Interval to Check** field of the printer and then click **OK**.

Mac

The software is set by default to check and notify whether there are updates every 30 days.

Introducing the Software

Uninstalling Software

Windows

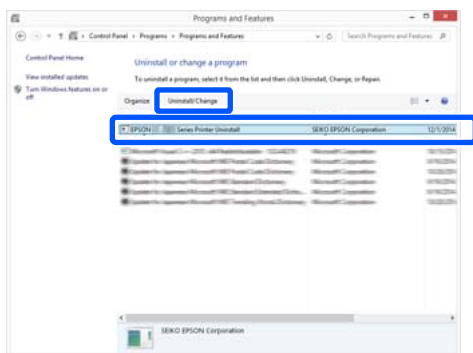

Important:

- ❑ You must log in as an Administrator.
- ❑ If the password or confirmation of an administrator is requested, enter the password and then continue with the operation.

- 1 Turn off the printer, and unplug the interface cable.
- 2 Close all applications running on your computer.
- 3 Go to the **Control Panel** and click **Uninstall a program** from the **Programs** category.

- 4 Select the software you want to remove and then click **Uninstall/Change** (or **Change/Remove / Add/Remove**).
- You can remove the printer driver and EPSON Status Monitor 3 by selecting **EPSON SC-XXXXX Printer Uninstall**.

- 5 Select the printer icon, and then click **OK**.

- 6 Follow the on-screen instructions to continue. When the delete confirmation message appears, click **Yes**.

Restart the computer if you are reinstalling the printer driver.

Mac

When reinstalling or upgrading the printer driver or other software, follow the steps below to uninstall the target software first.

Printer Driver

Use the "Uninstaller".

Downloading the Uninstaller

Download the "Uninstaller" from the Epson website.

<http://www.epson.com/>

Using the Uninstaller

Follow the instructions on the Epson website.

Other Software

Drag and drop folder with the software name from the **Applications** folder into **Trash** to delete.

Changing the Network Connection Methods

Changing the Network Connection Methods

The printer can connect to a wired LAN or a wireless LAN. Furthermore, it also supports Wi-Fi Direct (Simple AP) which allows a smart device or other device to directly connect wirelessly with the printer even when there is no wired LAN or wireless LAN environment.

The printer cannot connect to a wired LAN and wireless LAN at the same time. A Wi-Fi Direct connection is possible regardless of whether or not the printer is connected to a network.

This section describes the procedures to use to switch the connection method.

Note:

See the *Administrator's Guide (online manual)* for details on the network settings.

Switching to Wired LAN

- 1 Touch  on the Home screen.

Note:

The shape and color of the icon differ depending on the connection status.

 ["Home screen operations" on page 15](#)

- 2 Touch **Description**.

- 3 Touch **Wired LAN Connection Method**.

- 4 Touch **Start Setup**.

The process to disable the wireless LAN connection with the access point starts. Wait until the **The Wi-Fi connection is disabled...** message appears.

- 5 Connect your router and the printer with a LAN cable.

See the following for the location of the printer's LAN port.

 ["Side \(right side\)" on page 13](#)

Switching to Wireless LAN

The SSID (network name) and password of the access point to which the printer is to be connected are required. Confirm them in advance. The printer can be connected to a wireless LAN while the LAN cable is still connected.

Note:

If your access point supports WPS (Wi-Fi Protected Setup), the printer can be connected using **Push Button Setup (WPS)** or **PIN Code Setup (WPS)** without using an SSID and password.

 ["General Settings - Network Settings" on page 155](#)

- 1 Touch   on the Home screen.

Note:

The shape and color of the icon differ depending on the connection status.

 ["Home screen operations" on page 15](#)

- 2 Touch **Router**.

- 3 Touch **Start Setup**.

Details of the wired LAN connection status are displayed.

- 4 Touch **Change to Wi-Fi connection.**, check the displayed message, and touch **Yes**.

- 5 Touch **Wi-Fi Setup Wizard**.

- 6 Select the desired SSID.

If the desired SSID is not displayed, touch **Search Again** to update the list. If it is still not displayed, touch **Enter Manually** and directly enter the SSID.

Changing the Network Connection Methods

7 Touch **Enter Password** and enter the password.

Note:

- Differentiate between uppercase and lowercase when entering the password.
- If the SSID was entered directly, set **Password to Available** before entering the password.

8 When input is finished, touch **OK**.

9 Check the settings and then touch **Start Setup**.

10 Touch **OK** to finish the procedure.

If the connection fails, select **Print Check Report** to print a network connection check report. You can check the measure to take in the report.

11 Close the Network Connection Settings screen.

Directly Connection Wirelessly (Wi-Fi Direct)

A direct connection with the printer can be established temporarily when, for example, the printer is not connected to a network or you do not have permission to log on to the network.

Wi-Fi Direct is disabled by default. The following describes the procedure from enabling Wi-Fi Direct to connecting.

Note:

The printer can connect with up to four smart devices or computers at the same time. If you want to connect another device when there are already four devices connected, disconnect the connection with the printer from an already connected device.

1 Touch  on the Home screen.

Note:

The shape and color of the icon differ depending on the connection status.

 ["Home screen operations" on page 15](#)

2 Touch **Wi-Fi Direct**.

When Wi-Fi Direct is already enabled, the network (SSID), password, number of connected devices, etc. are displayed. Proceed to step 5.

Note:

When any of the displayed network (SSID), device name, etc. is partially not visible because it is cut off at the right edge of the screen, touch the corresponding item to display the entire setting value.

3 Touch **Start Setup**.

4 Touch **Start Setup**.

Wi-Fi Direct is enabled and the network (SSID), password are displayed.

5 Open the Wi-Fi setting screen on the device you want to connect with the printer, select the SSID displayed on the screen of the printer, and enter the password just as it is displayed on the screen.

6 When a connection is established, touch **Close** to finish the procedure.

7 Touch **Close** on the screen of the printer to close the network connection settings screen.

When the printer driver is installed on the connected device, you can print using the printer driver.

Note:

When you turn off the power of the printer, the connections with connected devices are all disconnected. To reconnect after turning the printer back on, perform the procedure again from step 1.

Loading and Setting the Paper

Loading and Setting the Paper

Notes on Loading the Paper

Caution:

Do not rub the edges of the paper with your hands. The edges of the paper are thin and sharp and could cause an injury.

Do not load roll paper with the right and left edges uneven

Loading roll paper with the right and left edges uneven may cause paper feeding problems or paper meandering may occur during printing. Rewind the paper to make the edges even before using roll paper or use roll paper with no problem.

Do not load curled paper

Loading curled paper may cause paper jams or soiled prints. Flatten the paper before use by bending it in the opposite way or use paper with no problem.

Unsupported paper

Do not use paper that is wavy, torn, cut, folded, too thick, too thin, has a sticker affixed, etc. Doing so may cause paper jams or soiled prints. See the following for paper supported by the printer.

☞ [“Epson Special Media Table” on page 217](#)

☞ [“Supported Commercially Available Paper” on page 221](#)

Paper Load Position

Roll paper and cut sheets can be loaded. See the following for more details on the paper that can be used with the printer.

☞ [“Supported Media” on page 217](#)

Roll Paper

Roll paper from 254 mm to the maximum printable width can be loaded.

Cut Sheet (1 sheet)

One sheet of cut paper from A4 to the maximum printable width can be loaded.

Loading and Setting the Paper

Note:

The paper slot for Roll Paper and Cut Sheet (1 sheet) is the same. Insert either one into the paper slot.

Loading and Removing the Roll Paper

Place the roll paper on the supplied spindle and then load the roll paper in the printer.

When replacing paper, remove the loaded paper first.

☞ [“Removing Roll Paper” on page 38](#)

☞ [“Removing Cut Sheet \(1 Sheet\)” on page 41](#)

The supplied attachment is only used when loading a 3 inch core roll paper.

Important:

The printer only supports plain paper for 3 inch roll cores. Epson cannot guarantee feed and print quality for 3 inch roll cores for other than plain paper.

Loading Roll Paper

Note:

You can load the paper while viewing the loading procedure on the screen. To view the procedure on the screen, touch the Roll paper information area of the Home screen.

1

Check that "Load paper." is displayed on the Home screen and then open the cut sheet cover and the roll paper cover.

2

Remove the inserted spindle.

Loading and Setting the Paper

- 3** Pull off the transparent flange from the spindle.

- 4** Attach or remove the attachments in accordance with the roll core size of the roll paper.

2 inch roll core

The attachments are not required. Remove the attachments from the flanges if they have been attached to the flanges.

Push the two tabs on the flange outwards to remove the attachment.

After you remove the attachment from the black flange, remove the attachment from the spindle.

3 inch roll core

Attach the attachments to the both flanges. Align the triangle marks on the flange with those on the attachment, and push in until the tabs are secured.

- 5** Place the roll paper on a flat surface and then insert the spindle.

With the black flange is on the right, orient the roll paper so that the leading edge is as shown in the figure below.

- 6** Push the flange to the roll paper until there is no gap between the flange and roll paper.

Loading and Setting the Paper

- 7** Attach the transparent flange and push it until there is no gap between the flange and roll paper. If there are gaps between the flanges at both ends and the roll paper, the paper may be fed skewed resulting in an error.

- 8** Orient the black flange of the spindle to the right side, and place the spindle into the grooves on the left and right.

- 9** Slide the spindle in along the rails, and set the spindle's both ends in the spindle holders.

- 10** Check that the leading edge of the roll paper is not bent and then insert it into the paper slot until you hear a beep.

Important:

Insert the paper straight into the paper slot. Inserting it skewed will cause a skew error or paper jam.

Note:

*If the leading edge of the roll paper is not horizontal or not cut cleanly, it will be cut automatically after loading completes. However, it will not be cut if **Auto Cut** is set to **Off**.*

- 11** Close the roll paper cover and cut sheet cover.

- 12** On the displayed screen, set the paper type that matches the loaded paper and set remaining amount management if necessary.

If a barcode giving information on the paper is printed on the roll paper

When the paper is loaded, the barcode is read automatically, and the media type and roll paper remaining settings are configured automatically. You can start printing once **Ready** appears on the screen.

Loading and Setting the Paper

If a barcode giving information on the paper is not printed on the roll paper

See the following.

 [“For Roll Paper” on page 42](#)

- 13** For SC-T5400 Series and SC-T3400 Series, check that the paper basket attached to the stand is open.

Note:

Close the paper basket before printing banners or other documents of sizes that will not fit in the paper basket. Before the paper ejected from the printer touches the floor, we suggest that you take it in both hands close to the paper eject slot and continue to lightly support it until printing is complete.

Note:

- ❑ The auto cut setting of the printer driver has priority over that of the printer. The auto cut setting of the printer driver is reset to the default setting of **Normal Cut** when the application closes.
- ❑ To turn off auto cut for HP-GL/2 mode printing, enlarged copying, or direct printing from a USB flash drive, turn off the auto cut setting of the printer. Touch the Roll paper information area - **Advanced Media Setting - Auto Cut - Off** from the Home screen. The change to the setting is saved as a setting of the currently selected paper type.

Cutting the Roll Paper

Auto Cut

Auto Cut is set to On for the printer by default. When On is set, the roll paper is cut automatically at the following times.

- ❑ When the leading edge is detected as not horizontal
After the roll paper is loaded, the leading edge part is cut straight.
- ❑ When printing of one page is finished
The roll paper is cut before printing of the next page starts.

If you do not want to cut each page or you want to cut at a desired position, see the following procedure.

Cutting after Last Page Printed or at Desired Position

Turn off auto cut in the printer driver, print, and then cut using the **Feed/Cut Paper** menu of the printer after printing finishes.

- 1** Select **Off** in **Advanced - Roll Paper Option - Auto Cut** of the printer driver and then print.

Leave the auto cut setting of the printer on.

- 2** Touch the Roll paper information area - **Feed/Cut Paper** from the Home screen of the printer after printing finishes.

Use the buttons displayed on the screen to cut and feed the paper.

When cutting at the printer default cut position (right after the bottom margin)

Touch the  (Cut) button. The paper is cut and the paper leading edge returns to the print wait position.

When cutting at desired position

- ① With the front cover closed, while looking into the printer, touch and hold down the  (Forward) or  (Backward) button until the position you want to cut comes to the position of the dotted line in the figure.

A cut position cannot be set further inside than the bottom margin.

Loading and Setting the Paper

② Touch the  (Cut) button.

The paper is cut.

Note:

When the length of **A** in the figure is shorter than the following length, the paper is fed automatically until the required length is obtained at the time of cutting.

- Plain paper or tracing paper: 100 mm
- Photo paper or coated paper: 80 mm
- Synthetic paper and other thick paper: 60 mm

Cutting Commercially Available Synthetic or Canvas Paper with Scissors

When using commercially available paper that cannot be cleanly cut with the cutter of the printer, print cut lines and cut the paper with scissors.

! Important:

- If commercially available synthetic or canvas paper is cut with the built-in cutter, the cutter may be damaged or its life may be shortened. When using such paper, cut the paper with scissors as described in the following procedure.
- Do not use a cutter. The printer may be damaged.

1

Turn off the auto cut setting and then print.

To print cut lines, turn off the auto cut setting of the printer. When printing via the printer driver, also turn off the setting of the printer driver.

- Printer settings
Roll paper information area - **Advanced Media Setting - Auto Cut - Off** from the Home screen.
- Printer driver settings
Advanced - Roll Paper Option - Auto Cut - Off

2

Touch the Roll paper information area - **Feed/Cut Paper** from the Home screen of the printer after printing finishes.

3

Operate the buttons displayed on the screen.

When printing cut lines at the printer default position (right after the bottom margin)

Touch the  (Cut) button. The cut or print cut lines selection screen appears.

Loading and Setting the Paper

When printing cut lines at desired position

With the front cover closed, while looking into the printer, touch and hold down the  (Forward) or  (Backward) button until the position of the cutting lines you want to print comes to the position of the dotted line in the figure.

Cut lines cannot be printed further inside than the bottom margin. Once you have finished moving the paper, touch  (Cut). The cut or print cut lines selection screen appears.

4 Touch **Print Cutting Guideline**.

Cut lines are printed and the paper is ejected automatically to a position where it can be easily cut with scissors.

5 Cut the paper along the cut lines with scissors and then touch **Done**.

The paper rewinds to return the paper leading edge to the print wait position.

Removing Roll Paper

This section describes how to remove and store roll paper after printing.

The rollers may leave impressions on roll paper if you leave the paper loaded in the printer. In addition, the paper may become wavy or curled due to damp, which may cause paper feeding problems, paper jams, or soiled prints.

We recommend that you return the paper to its original package and store it flat, and take it out of the package for use when printing.

1 Touch the Roll paper information area - **Remove** from the Home screen.

The paper is rewound and ejected.

When Manage Remaining Amount is set to On, the barcode is automatically printed prior to rewinding.

Note:

If printed paper is not cut and remains, a confirmation screen appears.

*Touch **Cut** to cut the paper at the default cut position or touch **Print Cutting Guideline** to print cut lines at the default position.*

*If you want to change the cut position or cut lines print position to a desired position, touch **Close** to cancel the message, and change the position in the **Feed/Cut Paper** menu.*

See the following for more details.

 ["Cutting the Roll Paper" on page 36](#)

2 Open the cut sheet cover and the roll paper cover.

3 Hold the flanges on both ends of the spindle and remove the spindle from the spindle holder.

Loading and Setting the Paper

- 4 Detach the transparent flange from the spindle.

- 5 Remove the spindle from the roll paper.

! **Important:**

After rewinding the roll paper carefully, store it in the original package.

- 6 Attach the transparent flange to the spindle and return the spindle in the printer.

- 7 Close the roll paper cover and cut sheet cover.

Loading and Setting the Paper

Loading and Removing Cut Sheet (1 sheet)

Loading Cut Sheet (1 sheet)

When roll paper is loaded, remove it.
 ☞ [“Removing Roll Paper” on page 38](#)

Note:
 You can load the paper while viewing the loading procedure on the screen. To view the procedure on the screen, touch **Paper Setting - Cut Sheet (1 sheet)** from the Home screen.

- 1** Check that "Load paper." is displayed on the Home screen and then open the cut sheet cover.

- 2** Load a sheet of paper with the print side facing up, align its right edge with the guide on the right, and move it downwards.

! Important:
 Insert all paper in portrait orientation. Inserting paper in landscape orientation may cause a decline in print quality.

- 3** Insert the leading edge of the paper straight into the paper slot until you hear a beep.

! Important:
 Insert the paper straight into the paper slot. Inserting it skewed will cause a skew error or paper jam.

A dialog box to confirm that the paper is not skewed appears.

Loading and Setting the Paper

- 4** If the paper is inserted straight, touch **OK**. To reload the paper, touch **Cancel**.
If you have touched **Cancel**, load the paper again from step 2.
- 5** On the displayed screen, set the paper type and size that match the loaded paper.
Not setting the appropriate paper type will cause print quality trouble. See the following for more details on the paper types and sizes.
[🔗 “For Cut Sheet \(1 sheet\)” on page 43](#)
- 6** For SC-T5400 Series and SC-T3400 Series, check that the paper basket attached to the stand is open.

Removing Cut Sheet (1 Sheet)

To remove cut sheet that was loaded but not used, eject using the procedure below.

- 1** Touch **Paper Setting - Cut Sheet (1 sheet) - Remove** from the Home screen.
This starts paper ejection operation.
- 2** Hold the edges of the paper with your hands, touch **OK** on the screen, and pull the paper toward you.

Loading and Setting the Paper

Setting Loaded Paper

For Roll Paper

Configure the following settings after loading roll paper.

Paper Type settings

This is the most important setting to obtain the optimum print results. Not setting a paper type that matches the loaded paper will cause wrinkles, scuffing, uneven colors, and other trouble.

Manage Remaining Amount settings

When On is selected for Manage Remaining Amount, the printer tracks the following roll paper data.

- Roll paper remaining amount display
This displays the approximate remaining amount of roll paper on the printer's Home screen and on the printer driver screen. Furthermore, a notification can also be displayed when the remaining amount has become low.
- Remaining amount management when replacing roll paper
The following settings are recorded in a barcode printed on the roll.
The amount of roll paper remaining, the value selected for remaining alert, and the paper type.

The barcode is automatically printed at the end of the roll paper when the roll is rewound. The barcode is automatically read and settings adjusted the next time the roll paper is used, improving efficiency when multiple rolls of paper are used.

However, depending on the paper, the printer may not be able to read the barcode.

How to Set

- 1** The currently set paper type is shown on the screen displayed after loading roll paper.

When changing Paper Type

Proceed to step 2.

When setting Paper Remaining without changing Paper Type

Proceed to step 5.

When not changing either of them

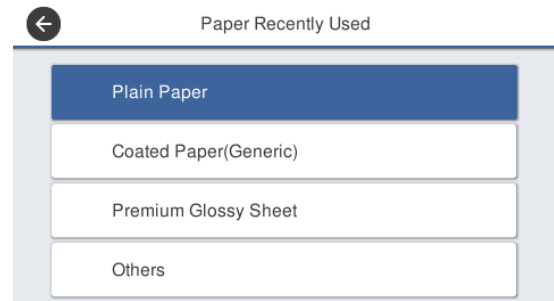

Touch **OK**. You can start printing once **Ready** appears on the screen.

Note:

The settings are confirmed if no operations are performed for 90 seconds on the above screen. To change the settings later, touch the Roll paper information area - **Change Paper Type** from the Home screen and then configure the settings.

- 2** Touch **Paper Type**.

The following paper type selection screen appears.

Note:

The most recently selected three paper types are displayed in addition to **Others**.

Loading and Setting the Paper

- 3** Select the paper type that matches the loaded roll paper.

Epson Special Media

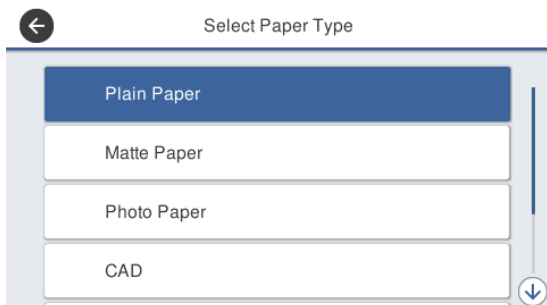

Select the same product name as the one shown on the package of the paper.

Commercially available non-Epson paper

Select from the following commercially available paper types.

- Plain paper
- Coated Paper (Generic)
- Photo Paper (Generic)
- Tracing Paper
- Tracing Paper <LowDuty>
- Matte Film
- Blueprint Paper

To select a paper type that is not displayed on the screen, touch **Others**.

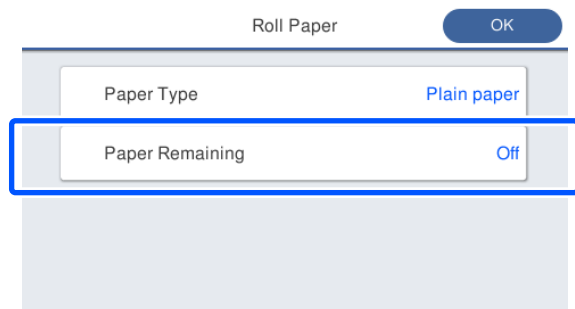

Select a category and select the target paper type.

Note:
If you scroll downward in the category selection screen, **Custom Paper** appears. To select custom paper that has already been registered, touch **Custom Paper**.

- 4** When a paper type is selected, the screen returns to the one in step 1.

If you will not set the remaining amount management setting, touch **OK**.

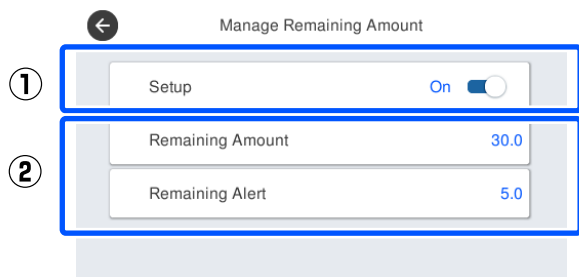

- 5** Touch **Paper Remaining**.

- 6** Touch **Setup**.

The setting changes to **On**, and **Remaining Amount** and **Remaining Alert** are enabled. Touch each one and enter a value as follows.

- Remaining Amount: Total length of roll paper (see the manual supplied with the roll paper)
- Remaining Alert: Remaining amount value that will be the timing for displaying the remaining amount warning notification.

Note:

On the keypad screen for entering a numeric value, enter numbers that include a number of the first decimal place. For example, if you want to enter 5 m, touch [5] and [0].

- 7** Touch **←** at the top left of the screen to return to the screen of step 5 and then touch **OK**.

You can start printing once **Ready** appears on the screen.

For Cut Sheet (1 sheet)

Configure the following settings after loading cut sheets.

Loading and Setting the Paper

Settings of Paper Type

This is the most important setting to obtain the optimum print results. Not setting a paper type that matches the loaded paper will cause wrinkles, scuffing, uneven colors, and other trouble.

Settings of Paper Size

Paper size will not be automatically detected. Set the size of the loaded paper.

How to Set

- 1 The currently set paper type is shown on the screen displayed after loading cut sheet.

When changing Paper Type

Proceed to step 2.

When changing Paper Size without changing Paper Type

Proceed to step 4.

When not changing either of them

Touch **OK**. You can start printing once **Ready** appears on the screen.

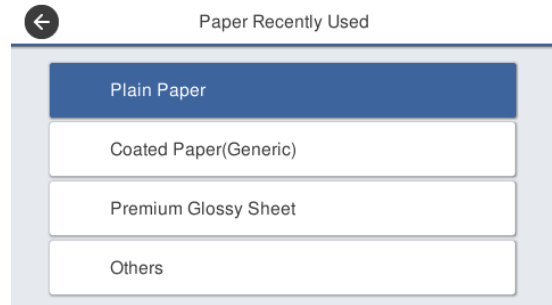

Note:

The settings are confirmed if no operations are performed for 90 seconds on the above screen. To change the settings later, touch the following in order from the Home screen and then configure the settings.

Paper Setting - Cut Sheet(1 sheet) - Change Paper Type/Paper Size

- 2 Touch **Paper Type**.

The following paper type selection screen appears.

Note:

The most recently selected three paper types are displayed in addition to **Others**.

- 3 Select the paper type that matches the loaded paper.

Epson Special Media

Select the same product name as the one shown on the package of the paper.

Commercially available non-Epson paper

Select from the following commercially available paper types.

- Plain paper
- Coated Paper (Generic)
- Photo Paper (Generic)
- Tracing Paper
- Tracing Paper <LowDuty>
- Matte Film
- Blueprint Paper

To select a paper type that is not displayed on the screen, touch **Others**.

Loading and Setting the Paper

Select a category and select the target paper type. When a paper type is confirmed, the screen returns to the one in step 1.

Note:

If you scroll downward in the category selection screen, **Custom Paper** appears. To select custom paper that has already been registered, touch **Custom Paper**.

4 Touch Paper Size.

If you will not change the paper size, touch **OK**.

Select a category and select the target paper size.

Note:

Setting non-standard size

For a non-standard size, touch **User-Defined** at the end of the list and then enter the paper width and length.

On the keypad screen for entering a numeric value, enter numbers that include a number of the first decimal place. For example, if you want to enter 5 m, touch [5] and [0].

5 When the screen of step 1 is redisplayed, touch **OK**.

You can start printing once **Ready** appears on the screen.

Loading and Setting the Paper

Optimizing Paper Settings (Media Adjust)

Media Adjust has three main types.

- Easy Adjustment
- Paper Feed Adjust
- Print Head Alignment

Perform Easy Adjustment in the following cases.

- Print results have streaks (horizontal banding or uneven colors)
- Duplicated ruled lines, warped lettering, or grainy printing
- When registered with custom paper settings

Note:

Adjustment for paper registered with custom paper settings

With roll paper and cut sheet, optimal paper settings will differ even when the paper types are the same. When registering roll paper and cut sheet with the same paper type, adjust for each of these. For details on custom paper setting, see the following Custom Paper Setting menu.

[“General Settings - Printer Settings” on page 143](#)

However, if a problem with print results can be specified, then perform the following adjustment in accordance with the situation.

- If print results have streaks (horizontal banding or uneven colors):
Perform **Paper Feed Adjust - Auto**
[“Paper Feed Adjust \(Auto\)” on page 47](#)
- If duplicated ruled lines, warped lettering, or grainy printing:
Perform **Print Head Alignment - Auto**
[“Print Head Alignment \(Auto\)” on page 47](#)

The sensor reads adjustment patterns while it is printing for both of these, and automatically registers the optimum adjustment value to the printer.

Notes on Making Adjustments

- Correctly load the paper that actually requires adjustment and then select the paper type that matches the loaded paper.
- If paper with visible curls, wrinkles, waves, folds, or bends is used, correct adjustment may not be possible. Remove curled, wavy, or folded sections by cutting them off.
- Ensure that light from outside (direct sunlight, etc.) does not enter the interior of the printer. If this occurs, the printer may not be able to correctly read the adjustment pattern. If light enters the interior of the printer and automatic adjustment is not possible, then carry out manual adjustment.
[“The prints are not what you expected” on page 194](#)
- Automatic adjustment is not possible for transparent or colored media. Use manual adjustment.
[“The prints are not what you expected” on page 194](#)
- Results of adjustment will differ depending on the paper type.
[“Epson Special Media Table” on page 217](#)
[“Before Printing on Commercially Available Paper” on page 223](#)

Easy Adjustment

The sensor reads adjustment patterns while it is printing, and automatically registers the optimum adjustment value to the printer. This takes approximately 5 minutes.

The following shows the length and number of sheets of paper used for adjustment pattern printing.

- Roll paper: Approx. 344 mm
- Cut sheet: 1 sheet for A3+ or larger, 2 sheets for smaller than A3+

1

Touch the following in order from the Home screen.

- Roll paper
Roll paper information area - **Media Adjust**

Loading and Setting the Paper

- Cut sheet

2 Touch Easy Adjustment - Start.

Printing of the adjustment patterns starts.

When **Print head alignment complete...** appears, the procedure is finished.

The adjustment results are saved as settings of the currently selected paper type.

Note:

A print head nozzle clogging check is performed automatically before adjustment pattern printing. If nozzles are determined to be clogged, cleaning starts and the adjustment patterns will be printed after cleaning finishes.

Refer to the following when the error message **Auto Adjustment is unable to start because there is a problem with the paper or printing status...** appears, or when the adjustment results are not satisfactory.

 [“The prints are not what you expected” on page 194](#)

Paper Feed Adjust (Auto)

The following shows the length and number of sheets of paper used for adjustment pattern printing.

- Roll paper: Approx. 230 mm
- Cut sheet: 1 sheet for A4 or larger

1 Touch the following in order from the Home screen.

- Roll paper
Roll paper information area - **Media Adjust**
- Cut sheet
Paper Setting - Cut Sheet (1 sheet) - Media Adjust

2 Touch Paper Feed Adjust - Auto - Start.

Printing of the adjustment patterns starts.

When **Print head alignment complete...** appears, the procedure is finished.

The adjustment results are saved as settings of the currently selected paper type.

Note:

A print head nozzle clogging check is performed automatically before adjustment pattern printing. If nozzles are determined to be clogged, cleaning starts and the adjustment patterns will be printed after cleaning finishes.

Refer to the following when the error message **Auto Adjustment is unable to start because there is a problem with the paper or printing status...** appears, or when the adjustment results are not satisfactory.

Print Head Alignment (Auto)

The following shows the length and number of sheets of paper used for adjustment pattern printing.

- Roll paper: Approx. 227 mm
- Cut sheet: 1 sheet for A4 or larger

1 Touch the following in order from the Home screen.

- Roll paper
Roll paper information area - **Media Adjust**
- Cut sheet
Paper Setting - Cut Sheet (1 sheet) - Media Adjust

2 Touch Print Head Alignment - Auto - Start.

Printing of the adjustment patterns starts.

Basic Operating Procedures (Windows)

Printing Procedure

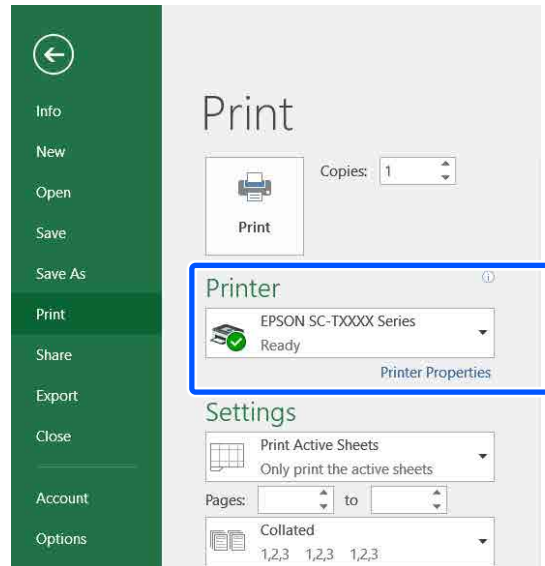

This section describes the basic procedure to print various data, including the data of Word, Excel, and PowerPoint of Microsoft Office and PDFs of Adobe Acrobat, using the printer driver from a computer.

- 1 Turn on the printer, and load the paper.
 - 🔗 “Loading Roll Paper” on page 33
 - 🔗 “Loading Cut Sheet (1 sheet)” on page 40
- 2 When you have created the data in the application, click **Print** in the **File** menu.

- 3 Select the printer in **Printer** and then click **Printer Properties**.

The printer driver dialog will be displayed.

Note:

When printing a PDF file
 In the Print dialog box of Adobe Acrobat, select the **Actual size** (or **Page Scaling: None**) radial button and **Choose paper source by PDF page size** check box. To enlarge or reduce the size, configure the setting in the printer driver settings dialog box.

- 4 Check **Document Size** on the Printer Settings tab of the printer driver.

The paper size set in the application is displayed automatically. However, the paper sizes (page sizes) of some applications such as PowerPoint may not be displayed correctly. In such a case, click **Settings...** and specify the size in the displayed Change Paper Size dialog box.

Printing with the Printer Driver from Your Computer

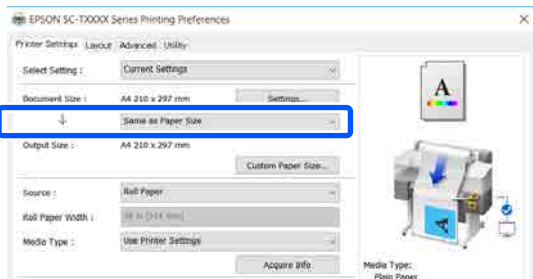

If the desired size is not available in the pull-down menu of the Change Paper Size dialog box, click **Custom Paper Size...** and then set and save a custom size.

[“Printing at Non-Standard Sizes” on page 66](#)

5 Set Output Size.

To enlarge or reduce the size, select from the pull-down menu below the Document Size.

See the following for more details on enlargement settings.

[“Enlargements and Horizontal and Vertical Banners” on page 61](#)

6 Select Source and check the roll paper width (paper size when cut sheet) and paper type.

Select from Roll Paper and Sheet. If you select a paper source for which paper is not loaded in the printer, appears.

For Roll Paper Width (Paper Size when cut sheet) and Media Type, the settings configured in the control panel of the printer are applied automatically.

Note:

*If the paper is loaded or changed after opening the printer driver's dialog box, the paper size and paper type settings configured on the printer will not be applied. In this case, click the **Acquire Info** button to apply the settings.*

7 Select Select Target in Print Quality.

Choose an option according to the type of document and how it will be used.

To set the color correction method or color balance in detail to match your preferences, clear the **Simple Settings** check box. See the following for more details.

[“Correct color and print” on page 74](#)

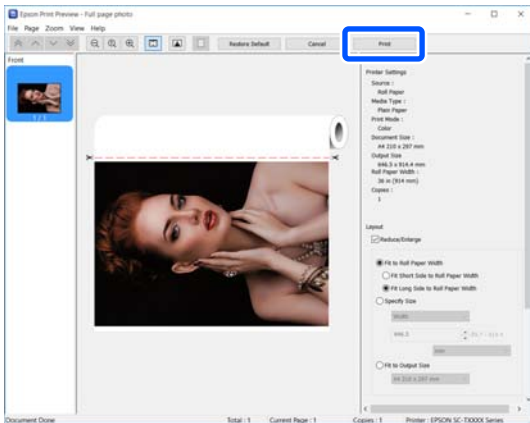

Printing with the Printer Driver from Your Computer

- Check that the **Print Preview** check box is selected and then click **OK**.
If a preview is not necessary, clear the check box and then click **OK**.

Note:
In the print preview, you can check and change the print settings while viewing the image to be actually printed. We recommend to check with the preview when printing on roll paper or large-sized paper.

- Click **Print** in the Print dialog box of the application.
The print preview screen appears.
- Check the print settings in the print preview screen, and if there is no problem, click **Print** to start printing.

The icons and menus at the top of the preview screen allow you to change the image display settings. You can change the print settings using the menus on the right side. See the help for more details.

Note:
See the printer driver help for more details on setting items. You can display the help in the following two ways:

- Click **Help** at the bottom right of the screen.
- Right-click the item you want to check and then click **Help**. (This is not possible in the print preview screen.)

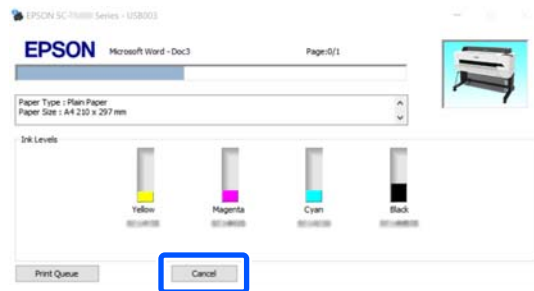

Canceling Printing

There are a few ways to stop printing operations depending on the situation. When the computer has finished sending data to the printer, you cannot cancel the print job from the computer. Cancel on the printer.

Canceling from a Computer

When the Progress Bar is displayed

Click **Cancel**.

When the Progress Bar is not displayed

- Click the printer icon on the taskbar.

Whether or not an icon is displayed depends on the settings selected for Windows.

Printing with the Printer Driver from Your Computer

- 2 Select the print data you want to cancel and click **Cancel** in the **Document** menu.

To cancel all print data, click **Cancel All Documents** in the **Printer** menu.

If the job has been sent to the printer, print data is not displayed on the above screen.

Canceling on the printer

The **Cancel** button is displayed on the control panel screen during printing. Touch the **Cancel** button. The print job is canceled even in the middle of printing. It may take a while before the printer returns to the ready status.

However, print jobs in the print queue on a computer cannot be deleted in this way. Use the procedure of "Canceling from a Computer" to delete print jobs in the print queue.

Customizing the Printer Driver

You can save the settings or change the display items as you prefer.

Saving Frequently Used Settings

If you start the printer driver from the Control Panel, change the settings to those you use frequently, and then save the settings, the printer driver's dialog box will be displayed with the saved settings from any application that it is displayed.

- 1 Open **View devices and printers** or **Devices and Printers**.

Windows 10/8.1/8/7

Click in the following order: **Hardware and Sound** (or **Hardware**) > **View devices and printers** (or **Devices and Printers**).

Windows Vista

Click in the following order: **Hardware and Sound** and then **Printer**.

Windows XP

Click in the following order: **Printers and Other Hardware**, and then **Printers and Faxes**.

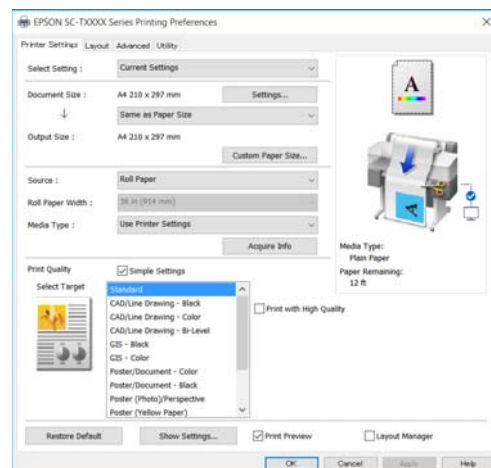

Note:

*If your Windows XP Control Panel is in **Classic View**, click **Start**, **Control Panel**, and then **Printers and Faxes**.*

- 2 Right-click your printer icon, and click **Printing preferences**.

- 3 The printer driver setting screen is displayed.

Printing with the Printer Driver from Your Computer

Make the necessary settings. These settings become the default settings of the printer driver.

Saving various settings as your Select Settings

You can save all printer driver settings as a Select Setting. This allows you to easily load settings that have been stored in Select Settings, and repeatedly print using exactly the same settings.

1 Set each item on the Printer Settings, Layout, and Advanced tabs to the settings you want to save as Select Settings.

2 Click **Custom Settings**.

3 Enter the desired name in **Name**, and then click **Save**.

You can save up to 100. The saved select settings can be recalled from **Select Setting**.

Note:

How to share Select Setting settings with multiple computers

Select the settings you want to share, click **Export...**, and then export the settings to a file. Display the same screen of the printer driver on another computer, click **Import...**, and then import the settings.

Rearranging display items

The display items of **Select Setting**, **Media Type**, and **Paper Size** can be arranged as follows to display the ones you use normally right away.

- Hide unnecessary items.
- Rearrange in an order of most frequent use.
- Arrange in groups (folders).

1 Click **Utility** tab - **Menu Arrangement**.

Printing with the Printer Driver from Your Computer

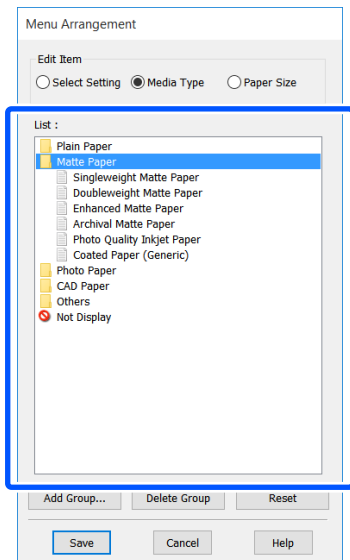

2 Select **Edit Item**.

4 Click **Save**.

3 Change the display order and groups in **List**.

- ❑ You can move and order items by dragging and dropping.
- ❑ To add a new group (folder), click **Add Group...**
- ❑ To delete a group (folder), click **Delete Group**.
- ❑ Drag and drop unnecessary items to **Not Display**.

Note:

When **Delete Group** is performed, the group (folder) is deleted, but the settings in the deleted group (folder) remain. Delete them individually from **List** in the save location.

Note:

See the printer driver help for more details on setting items. Click  in the printer driver settings dialog box to display Help.

How to Select the Dedicated Printer Driver for This Printer

If the menus described in the previous section "Basic Printing Procedure" are not displayed, select the dedicated printer driver for the printer in **Printer**. The dedicated printer driver for this printer is displayed as follows.

- When USB connection
EPSON SC-TXXXX
- When network connection
EPSON TXXXX or EPSON TXXXX-YYYYYY

*: "XXXX" is the product model number. "YYYYYY" is the last six digits of the MAC address.

If the dedicated printer driver for this printer is not displayed in the list, add it with the following procedure.

- 1 Select **System Preferences - Printers & Scanners** (or **Print & Scan / Print & Fax**) from the Apple menu.
- 2 Click **[+]** and select **Add Printer or Scanner**.
- 3 When the list of devices appears, select the dedicated printer driver for this printer and click **Add**.

Canceling Printing

There are a few ways to stop printing operations depending on the situation. When the computer has finished sending data to the printer, you cannot cancel the print job from the computer. Cancel on the printer.

Canceling from a Computer

- 1 Click the icon of this printer in the Dock.

- 2 Select the job you want to cancel, and then click **Delete**.

Canceling on the printer

The **Cancel** button is displayed on the control panel screen during printing. Touch the **Cancel** button. The print job is canceled even in the middle of printing. It may take a while before the printer returns to the ready status.

However, print jobs in the print queue on a computer cannot be deleted in this way. Use the procedure of "Canceling from a Computer" to delete print jobs in the print queue.

Customizing the Printer Driver

You can assign a name to frequently used setting information (paper size and each item of the basic settings) and then save the information to **Presets**. This allows you to easily load settings and repeatedly print using exactly the same settings.

Saving Frequently Used Settings as Preset

- 1 Set each item on the Paper Size and Printer Settings tabs to the settings you want to save as Presets.

Printing with the Printer Driver from Your Computer

- Click **Save Current Settings as Preset in Presets**.

- Enter a name, and then click **OK**.

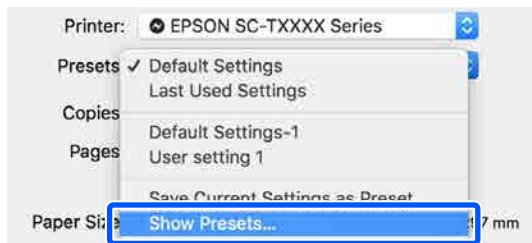

Note:
When **All printers** is selected from **Preset Available For**, you can select the saved **Presets** from all printer drivers installed on your computer.

The settings are saved to **Presets**. You can then select the settings you saved from **Presets**.

Deleting from Presets

- Click **Show Presets...** in **Presets** of the Print dialog box.

- Select the setting you want to delete, click **Delete**, and then click **OK**.

Printing CAD Drawings

There are the following two methods to print CAD drawings.

Printing with the printer driver

This method is best suited for printing CAD drawings such as the appearance views of buildings at high quality. This section describes the procedure to print using the printer driver from AutoCAD 2018.

Important:

If lines or parts in your drawing are not printed properly, print using the HP-GL/2 or HP RTL mode.

Printing using the HP-GL/2 or HP RTL mode

This method is best suited for printing CAD and GIS drawings such as maps and blueprints.

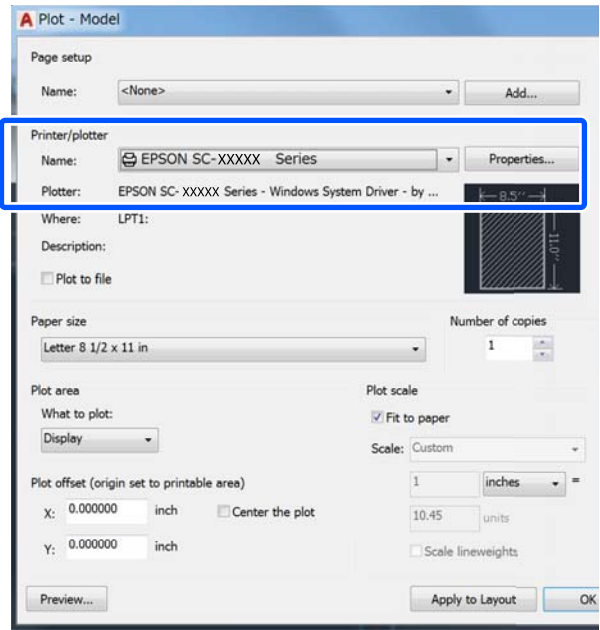

You can print from an application that supports HP-GL/2 (compatible with HP Designjet 750C) and HP RTL. See the following for more details.

[“Printing Using the HP-GL/2 or HP RTL Mode from a Computer” on page 95](#)

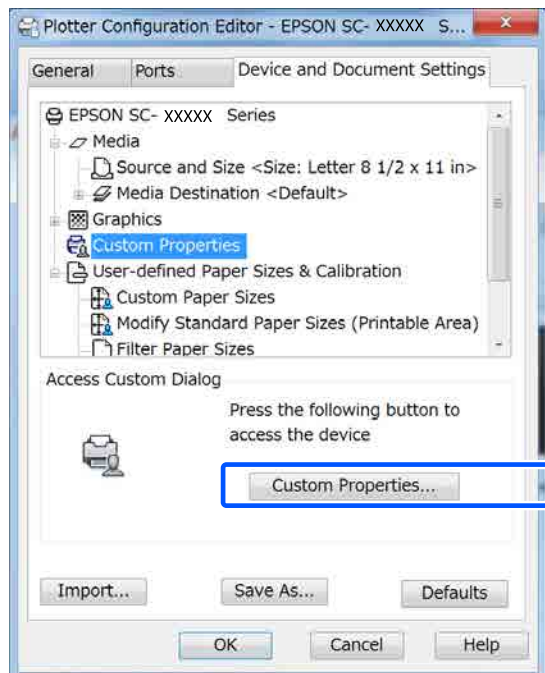

1 Open the data to be printed and then click **Plot**.

2 Select the printer in **Printer/plotter** and then click **Properties**.

3 Click **Custom Properties**.

Printing with the Printer Driver from Your Computer

The printer driver's dialog box for this printer appears.

4 Set Output Size and Source in the printer driver.

☞ “Basic Operating Procedures (Windows)” on page 49

☞ “Basic Operating Procedures (Mac)” on page 55

5 Select **CAD/Line Drawing - Black**, **CAD/Line Drawing - Color**, or **CAD/Line Drawing - Bi-Level** from the **Select Target** list.

Windows

Mac

6 Check other settings, and then start printing.

Note:

*If the output size is portrait and the height is smaller than the width of the roll paper, the print image is printed rotated 90° to save paper. This function is enabled if the **Auto Rotate** check box is selected in **Roll Paper Option** on the **Advanced** tab.*

Printing with the Printer Driver from Your Computer

Enlargements and Horizontal and Vertical Banners

The printer driver can enlarge or reduce documents for different paper sizes. There are three setting methods.

Before printing at non-standard sizes, including vertical or horizontal banners and documents with equal sides, enter the desired paper size in the printer driver.

 [“Printing at Non-Standard Sizes” on page 66](#)

- Fit to Roll Paper Width**
Automatically enlarges or reduces the image size to fit the roll paper width.

- Fit to Output Size**
Automatically enlarges or reduces the image size to fit the paper size.

- Specify Size**
You can specify the enlargement or reduction ratio. Use this method for a non-standard paper size.

Note:

- When printing from applications designed expressly for horizontal or vertical banners, adjust printer driver settings as described in the application documentation.
- When using a Windows application designed for banners, select **Print Banner** on the Layout tab if necessary.

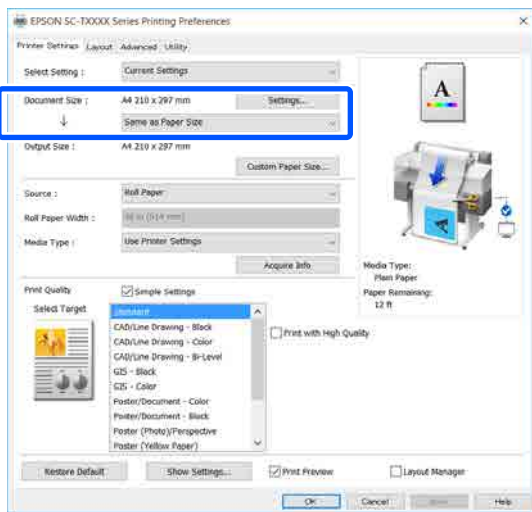

Printing with the Printer Driver from Your Computer

Fitting Documents to the Width of the Roll Paper

1 Check the document size (or paper size) setting on the Printer Settings tab of the printer driver.

Windows

Display the Printer Settings tab of the printer driver from the application and check that the document size is the same as the setting of the application.

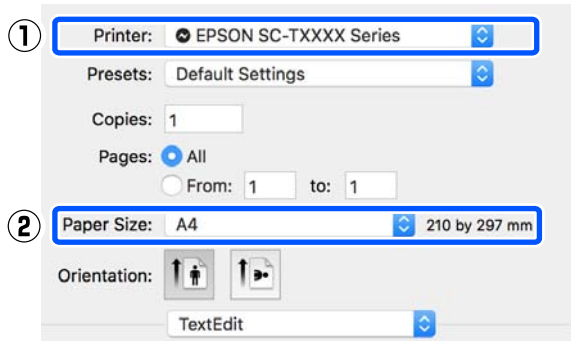

If it differs, click **Settings...** and specify the correct size in the Change Paper Size dialog box.

📖 “Basic Operating Procedures (Windows)” on page 49

Mac

Open the page setup screen of the application and check that this printer is selected in **Printer** and check the paper size.

Select a paper size that does not have (Retain Scale) or (Roll Paper Banner).

If the size is different, select the correct size from the pull-down menu.

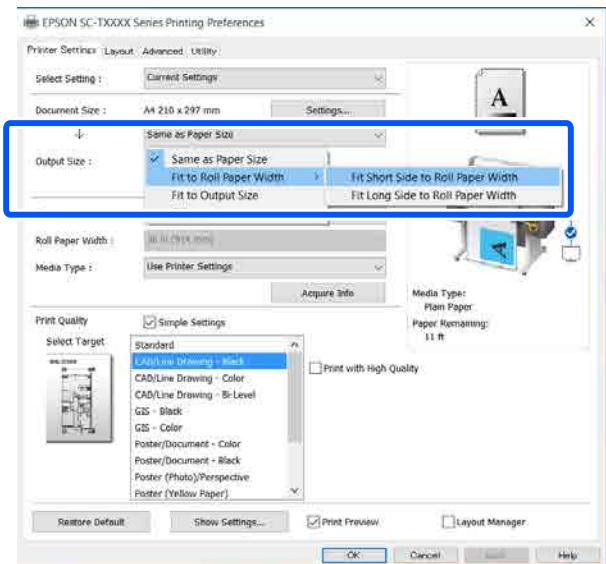

📖 “Basic Operating Procedures (Mac)” on page 55

Note:

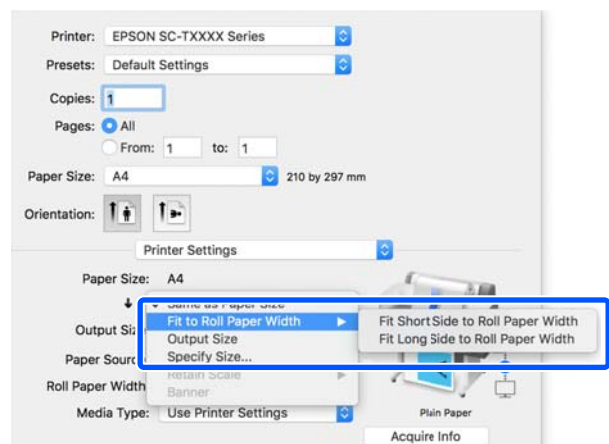

*In the case of an application without a page setup menu item, you can set the paper size if you open the Print dialog box from the **Print** menu item.*

2 Click **Fit to Roll Paper Width** on the Printer Settings tab of the printer driver and select either **Fit Short Side to Roll Paper Width** or **Fit Long Side to Roll Paper Width**.

Windows

Mac

Printing with the Printer Driver from Your Computer

Fit Short Side to Roll Paper Width

Select this when you want to print with the print image enlarged to the maximum size for the loaded roll paper.

Fit Long Side to Roll Paper Width

Select this when you want to print with the print image enlarged as much as possible to the extent that paper will not be wasted.

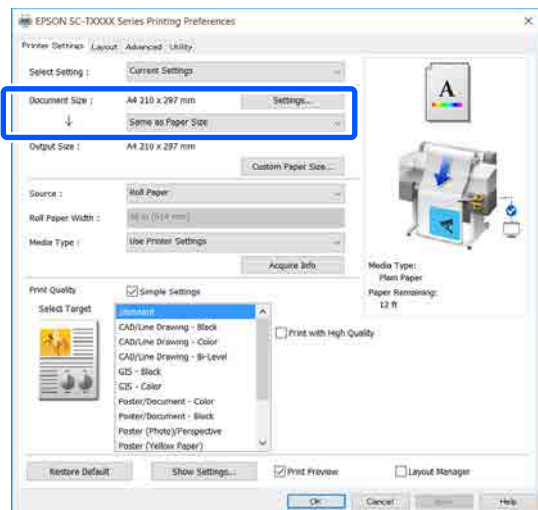

- 3 Check other settings, and then start printing.

Fitting Documents to the Output Size

- 1 Check the document size (or paper size) setting on the Printer Settings tab of the printer driver.

Windows

Display the Printer Settings tab of the printer driver from the application and check that the document size is the same as the setting of the application.

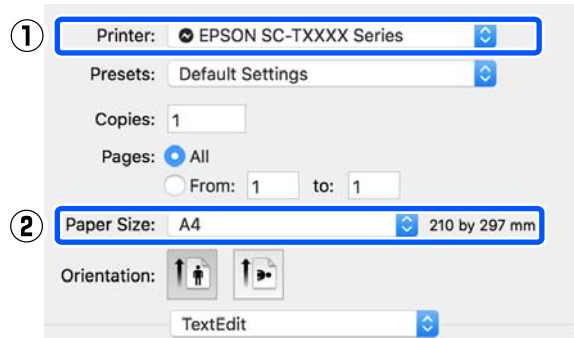

If it differs, click **Settings...** and specify the correct size in the Change Paper Size dialog box.

The print image is enlarged or reduced so that it becomes the specified width, length, or scale while maintaining the aspect ratio of the print data.

Windows

Mac

4 Check other settings, and then start printing.

Printing at Non-Standard Sizes

Before printing at non-standard sizes, including vertical or horizontal banners and documents with equal sides, save the desired paper size in the printer driver. Once they have been saved in the printer driver, custom sizes can be selected in the application **Page Setup** and other print dialogs.

The following sizes can be used.

Paper Width	SC-T5400 Series	89 to 914 mm
	SC-T3400 Series/ SC-T3400N Series	89 to 610 mm
Paper Length*	127 to 18000 mm	

*: The paper length can be longer when using an application that supports banner printing. However, the actual print size depends on the application, the paper size loaded in the printer, and the computer environment.

! Important:

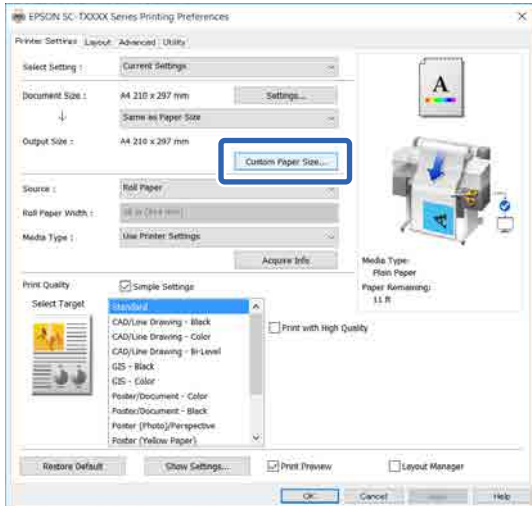

- ❑ *The smallest size supported by the printer is 89 mm wide × 127 mm long. When a smaller size than this is set in **Custom Paper Size...** of the printer driver, trim the unnecessary margins.*
- ❑ *For Custom Paper Sizes of a Mac, although you can specify a large paper size which cannot be loaded in this printer, it will not be printed properly.*
- ❑ *The available output size is limited depending on the application.*

Settings in Windows

- 1 Display the Printer Settings tab of the printer driver from the application and then click **Custom Paper Size...**

The User-Defined Paper Size dialog box appears.

- 2 Set the paper size to use in the User-Defined Paper Size dialog box and then click **Save**.

- The **Paper Size Name** is displayed as a document size or output size option. Set a meaningful name such as "400x500mm" or "Horizontal Banner".
- To view the **Paper Width** and **Paper Height** values for a standard size close to the desired custom size, select the appropriate option in **Base Paper Size**.
- If you select an aspect ratio in **Fix Aspect Ratio** and select **Landscape** or **Portrait** for **Base**, you can set the size by just entering a value in either **Paper Width** or **Paper Height**.

Note:

- To change the paper size you saved, select the paper size name from the list on the left.
- To delete a saved paper size, select the paper size name from the list on the left of the screen and then click **Delete**.
- You can save up to 100 paper sizes.

- 3 Click **OK** to close the User-Defined Paper Size dialog box. Also close the printer driver's dialog box.

Registration of the user-defined size is now complete.

- 4 Select the registered paper size in, for example, the page size settings of the application and then create the data.

Note:

If the registered paper size is not displayed in the application, check whether it exceeds the sizes supported by the application.

- 5 When you have finished creating the data, display the Printer Settings tab of the printer driver from the Print dialog box.

The registered paper size is displayed in Paper Size on the Printer Settings tab.

3 **Manage Custom Sizes...**

Note:

In the case of an application without a page setup menu item, the paper size settings can be displayed by opening the **Print** dialog box from the **Print** menu item.

2 Click **+** and then enter the paper size name.

3 Enter values in **Width** and **Height** of the **Paper Size**, enter the margins, and then click **OK**.

The ranges of page sizes and margin sizes that can be specified differ depending on your printer model and the settings on the printer.

Note:

- To edit a saved custom size, choose its name from the list on the left.
- To duplicate a saved paper size, select its name from the list on the left of the screen and click **Duplicate**.
- To delete a saved paper size, select its name from the list on the left of the screen and click **-**.
- The custom paper size setting differs depending on the operating system version. See your operating system's documentation for details.

4 Click **OK** to close the Custom Paper Sizes dialog box. Also close the printer driver's dialog box by clicking **Cancel**.

Registration of the custom paper size is now complete.

5 Select the registered paper size in, for example, the page size settings of the application and then create the data.

Note:

If the registered paper size is not displayed in the application, check whether it exceeds the sizes supported by the application.

Borderless Printing

You can print your data without margins on the paper.

The types of borderless printing you can choose vary as shown below depending on the media type.

Roll Paper: No margins for all edges, no margins for the left and right

Cut Sheets: No margins for the left and right only

When printing borderless for all edges, you can also configure the cutting operation.

[“About Roll Paper Cutting” on page 71](#)

When performing left and right borderless printing, margins appear on the top and bottom of the paper.

Top and bottom margin values

[“Printable area” on page 224](#)

Types of Borderless Printing Methods

You can perform borderless printing using the following two methods.

- Auto Expand**
The printer driver enlarges the print data to a size slightly larger than the paper size and prints the enlarged image. The sections which are beyond the paper edges are not printed; therefore, resulting in borderless printing.
Use settings such as Page Setup in the applications to set the size of the image data as follows.
 - Match the paper size and page setting for the print data.
 - If the application has margin settings, set the margins to 0 mm.
 - Make the image data as large as the paper size.

- Retain Size**
Create the print data larger than the paper size in the applications to produce borderless output. The printer driver does not enlarge the image data. Use settings such as Page Setup in the applications to set the size of the image data as follows.
 - Create print data larger than its actual print size by 3 mm on the left and right (6 mm in total).
 - If the application has margin settings, set the margins to 0 mm.
 - Make the image data as large as the paper size.

Select this setting if you want to avoid image enlargement by the printer driver.

About Roll Paper Cutting

When performing borderless printing on roll paper, you can specify whether it is left and right borderless printing or all edges borderless printing, and how to cut the paper in the printer driver's **Roll Paper Option**. The cutting operation for each value is shown in the following chart.

Printer driver settings	Borderless	Single Cut	Double Cut
Cutting Operation			
Explanation	<p>The default printer driver setting is Borderless.</p>	<ul style="list-style-type: none"> <input type="checkbox"/> The top area may become slightly uneven depending on the image since the print operation stops while cutting the top edge of the roll paper. <input type="checkbox"/> When you print one page only or print one page multiple times, the operation is the same as that for Double Cut. When continuously printing multiple sheets, the printer cuts 1 mm inside on the top edge of the first page and the bottom edge of the subsequent pages to avoid showing margins. 	<ul style="list-style-type: none"> <input type="checkbox"/> The top area may become slightly uneven depending on the image since the print operation stops while cutting the top edge of the roll paper. <input type="checkbox"/> The printed paper is approximately 2 mm shorter than the specified size since the printer cuts the paper inside the image to avoid showing top and bottom margins. <input type="checkbox"/> After cutting the bottom edge of the previous page, the printer feeds the paper, and then cuts the top edge of the following page. Although this produces 60 to 127 mm cut-off pieces, the cut is more accurate.

Correct color and print

The optimal method is selected from the following color correction methods for each print target in the print quality settings of the printer driver.

- EPSON Standard (sRGB)
Optimizes the sRGB space and corrects the color.
- Business Graphics
Performs color correction to sharpen your images based on the sRGB space.
- Line Drawing
Optimizes color correction for line drawing by processing the border between lines and the background as discontinuous.
- GIS
Performs the optimal printing for topographic maps and other data of the geographic information system (GIS).
- ICM
Performs color management to match the colors in the image data to those in the printed output (Windows only).
[📄 “Color Management Printing” on page 78](#)
- Off (No Color Adjustment)
Color correction is not performed by the printer driver. Choose if color management is performed by the application.
[📄 “Color Management Printing” on page 78](#)

If you clear the **Simple Settings** check box, you can check which of the above color correction methods is used. **Standard of Select Target** is the most suitable setting for the currently selected paper type.

Clicking the **Settings** button allows you to, for example, finely adjust the Gamma, Brightness, Contrast, Saturation, and color balance.

Use this option when the application in use does not have a color correction function.

Color Management Printing

About Color Management

Even when using the same image data, the original image and the displayed image may look different, and the printed results may look different to the image you see on the display. This occurs due to the difference in characteristics when input devices such as scanners and digital cameras capture colors as electronic data, and when output devices such as display screens and printers reproduce colors from the color data. The color management system is a means to adjust differences in color conversion characteristics among input and output devices. A color management system is included with operating systems such as Windows and Mac OS, in addition to image processing applications. Windows and Mac OS X include the ICM and ColorSync color management systems, respectively.

In a color management system, a color definition file called a "Profile" is used to perform color matching between devices. (This file is also called an ICC profile.) The profile of an input device is called an input profile (or source profile), and the profile of an output device, such as a printer, is called a printer profile (or output profile). A profile is prepared for each media type in this printer's driver.

The color conversion areas by the input device and the color reproduction area by the output device differ. As a result, there are color areas that do not match even when performing color matching using a profile. In addition to specifying profiles, the color management system also specifies conversion conditions for areas where color matching failed as "intent". The name and type of intent vary depending on the color management system you are using.

You cannot match the colors on the printed results and display by color management between the input device and the printer. To match both colors, you need to perform color management between the input device and the display as well.

Color Management Print Settings

You can perform color management printing using this printer's printer driver in the following two ways.

Choose the best method according to the application you are using, the operating system environment, the aim of the print out, and so on.

Setting color management with the applications

This method is for printing from applications that support color management. All color management processes are carried out by the application's color management system. This method is useful when you want to obtain the same color management print results using a common application among different operating system environments.

[☞ "Setting color management with the applications" on page 79](#)

Setting color management with the printer driver

The printer driver uses the operating system's color management system and carries out all color management processes. You can configure the color management settings in the printer driver using the following two methods.

- ❑ Host ICM (Windows) / ColorSync (Mac OS X)
Set when printing from applications that support color management. This is effective in producing similar print results from different applications under the same operating systems.
 - [☞ "Color Management Printing by Host ICM \(Windows\)" on page 81](#)
 - [☞ "Color Management Printing by ColorSync \(Mac\)" on page 82](#)
- ❑ Driver ICM (Windows only)
This allows you to perform color management printing from applications that do not support color management.
 - [☞ "Color Management Printing by Driver ICM \(Windows Only\)" on page 83](#)

Printing with the Printer Driver from Your Computer

Setting profiles

Settings for the input profile, printer profile, and intent (matching method) vary between three types of color management printing since their color management engines are used differently. This is because color management usage differs between the engines. Make settings in the printer driver or application as described in the following table.

	Input profile settings	Printer profile settings	Intent settings
Driver ICM (Windows)	Printer Driver	Printer Driver	Printer Driver
Host ICM (Windows)	Application	Printer Driver	Printer Driver
ColorSync (Mac OS X)	Application	Printer Driver	Application
Application	Application	Application	Application

Printer profiles for each paper type that is needed when performing color management are installed with the printer's printer driver. You can select the profile from the printer driver's settings screen.

You can select the profile from the printer driver's settings screen.

5 Check other settings, and then start printing.

Color Management Printing by ColorSync (Mac)

Use image data in which an input profile has been embedded. Also, the application must support ColorSync.

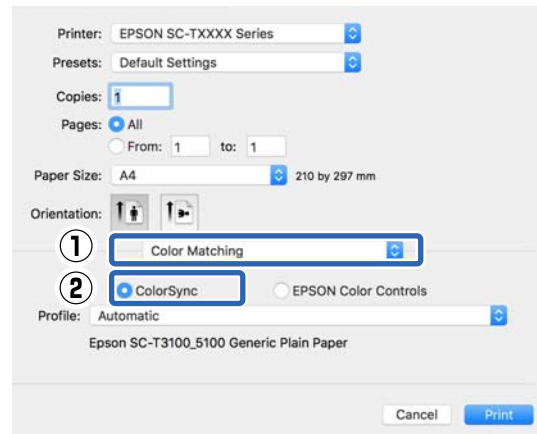

Note:
Depending on the application, color management printing by **ColorSync** may not be supported.

1 Disable the color management functions in the application.

2 Display the Print screen.

3 Select **Color Matching** from the list, and then click **ColorSync**.

The printer profile corresponding to the currently selected paper type* is specified automatically and displayed at the bottom of the profile area. To change the profile, select the desired profile from the **Profile** pull-down menu.

*: It is set in the screen displayed by selecting **Printer Settings** from the list. If **Paper Source** is selected, the paper type set on the printer is set automatically, and **Use Printer Settings** is displayed. The paper type name is displayed on the right side of it.

4 Check other settings, and then start printing.

Printing with the Printer Driver from Your Computer

Color Management Printing by Driver ICM (Windows Only)

The printer driver uses its own printer profiles to perform color management. You can use the following two color correction methods.

- ❑ Driver ICM (Basic)
Specify one type of profile and intent for processing the entire image data.
- ❑ Driver ICM (Advanced)
The printer driver distinguishes the image data into the **Image**, **Graphics**, and **Text** areas. Specify a different profile and intent for each of the three areas.

When using applications featuring a color management function

Make the settings for color processing using the application before making printer driver settings.

Depending on the type of the application, make the settings following the table below.

Adobe Photoshop CS3 or later
 Adobe Photoshop Elements 6.0 or later
 Adobe Photoshop Lightroom 1 or later

OS	Color Management Settings
Windows 8.1, Windows 8, Windows 7, Windows Vista	Printer Manages Colors

2 Click **Settings**.

3 Select **Driver ICM (Basic)** or **Driver ICM (Advanced)** in **ICM Mode** of the **ICM** dialog box.

If you select **Driver ICM (Advanced)**, you can specify the profile and intent for each of image data such as photos, graphics data, and text data.

Intent	Explanation
Saturation	Keeps the current saturation unchanged and converts the data.
Perceptual	Converts the data so that a more visually natural image is produced. This feature is used when a wider gamut of color is used for image data.

Intent	Explanation
Relative Colorimetric	Converts the data so that a set of color gamut and white point (or color temperature) coordinates in the original data match their corresponding print coordinates. This feature is used for many types of color matching.
Absolute Colorimetric	Assigns absolute color gamut coordinates to the original and print data and converts the data. Therefore, color tone adjustment is not performed on any white point (or color temperature) for the original or print data. This feature is used for special purposes such as logo color printing.

4 Check other settings, and then start printing.

Multi-Page Printing (N-up)

Two or four consecutive pages can be printed on a single sheet.

Note:

- ❑ In Windows, you cannot use the multi-page printing function when performing borderless printing.
- ❑ In Windows, you can use the Reduce/Enlarge function (Fit to Page) to print the data on different sizes of paper.

- 2 Check other settings, and then start printing.

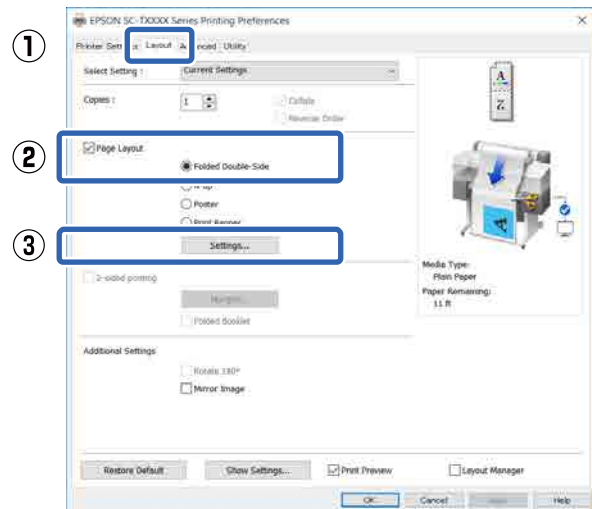

Folded 2-Sided Printing (Windows only)

Two consecutive pages can be printed on a single sheet. The second page is flipped 180° and printed adjacent to the first page, allowing the paper to be folded to make a 2-sided document.

- 1 Display the Layout tab of the printer driver and select the **Page Layout** check box. Then, select **Folded Double-Side** and click the **Settings...** button.

Poster Printing (Windows Only)

A single page can be printed across multiple sheets. The sheets can then be joined together to form large posters (up to 16 times the original size). If **Borderless Poster Print** is selected, the sheets can be joined without trimming the margins, but because the portions outside the edges of the paper will be lost using borderless printing, images at the joins may be imperfect.

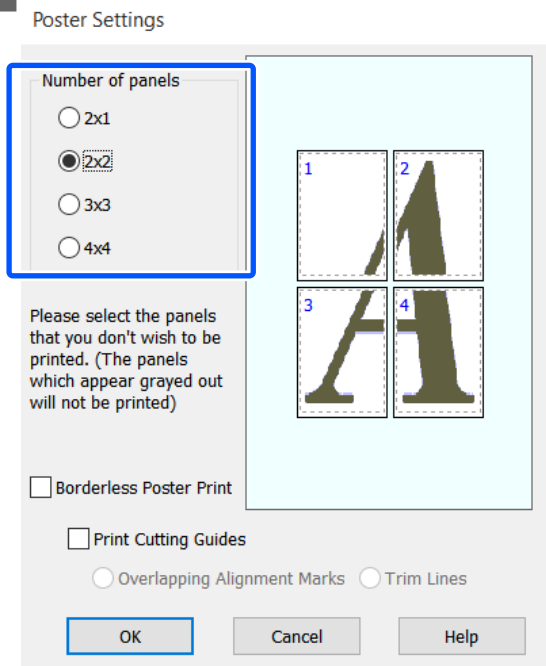

- 1 Display the **Layout** tab of the printer driver and select the **Page Layout** check box. Then, select **Poster** and click the **Settings...** button.

Printing with the Printer Driver from Your Computer

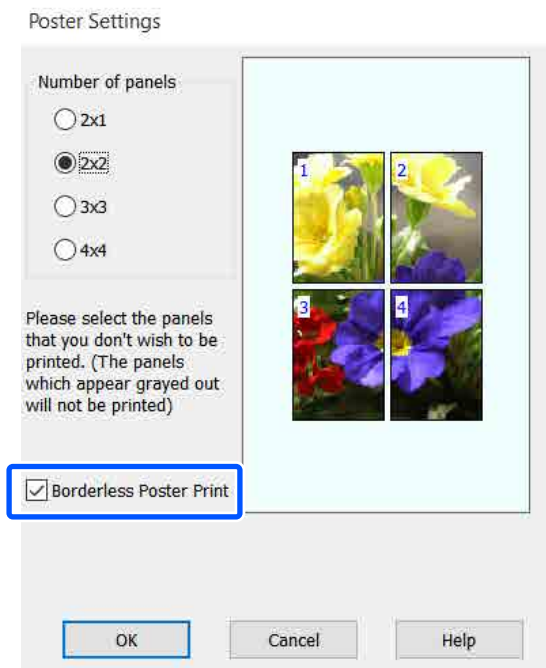

2 Set Number of panels in the Poster dialog box.

3 If you want to print marks to serve as a guide when joining together paper printed with poster printing, select the **Print Cutting Guides** check box.

When borderless is selected:

Select **Borderless Poster Print**.

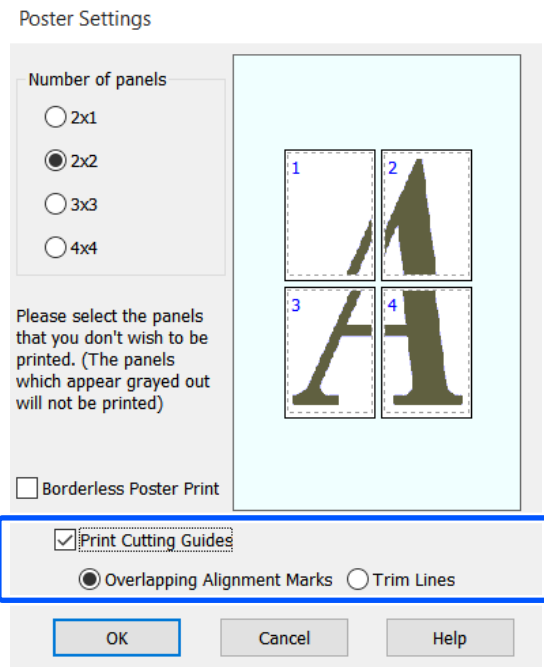

Note:

- If **Borderless Poster Print** is grayed out, the selected paper or the size does not support borderless printing.
[☞ “Epson Special Media Table” on page 217](#)
- If **Single Cut** or **Double Cut** is selected for **Auto Cut**, the paper will be cut 1 or 2 mm inside the image, resulting in imperfect joins where the images meet.

When with margins is selected:

Clear the **Borderless Poster Print** check box.

Note:

If **Borderless Poster Print** is not selected, a **Print Cutting Guides** option will be displayed.

Overlapping Alignment Marks

Joining poster sheets with printed borders

If **Overlapping Alignment Marks** is selected, join guides (indicated by the lines drawn through and around the X marks in the illustration below) will be printed on each sheet.

Note:

If the output is in color, the join guides will be in blue and the cut guides in red; otherwise, all the guides will be printed in black.

The following section describes how to join four printed pages together.

- 1 Ready the two top sheets and trim the excess from the left sheet by cutting along the line joining the two join guides (the centers of the X marks).

- 2 Lay the upper left sheet on top of upper right sheet. Lineup the X marks as shown in the illustration below, and temporarily fasten them using an adhesive tape on the back.

- 3** With the two sheets overlapping, trim the excess by cutting along the line joining the two cut guides (the lines to the left of the X marks).

- 4** Rejoin the two sheets.
Use an adhesive tape to stick the backs of the sheets together.

- 5** Repeat steps 1 to 4 for the lower two sheets.

- 6** Trim the bottom from the upper sheets by cutting along the line joining the two guides (the lines above the X marks).

- 7** Lay the upper sheet on top of the lower sheet. Lineup the X marks as shown in the illustration below, and temporarily fasten them using an adhesive tape on the back.

Objects can be moved or resized by dragging as well as rearranged or rotated using the tool buttons or the options in the **Object** menu.

The overall size and placement of the objects can be changed using the **Preferences** and **Arrangement** options in the **File** menu.

See the Layout Manager screen help for more details on each function.

- 6 Click **Properties** in the **File** menu and set the print settings in the printer driver dialog box.

Check **Media Settings**, and set **Print Quality**.

- 7 Click the **File** menu in the Layout Manager screen, and then click **Print**.

Printing starts.

Printing with the Printer Driver from Your Computer

Saving and Recalling Settings

The layout and setting information on the Layout Manager screen can be saved as a file. If you need to close your application in the middle of a job, you can save it to a file and then open it later to continue your work.

Saving

- 1 Click the **File** menu on the Layout Manager screen, and then click **Save As...**
- 2 Enter the file name, select the location, and then click **Save**.
- 3 Close the Layout Manager screen.

Opening saved files

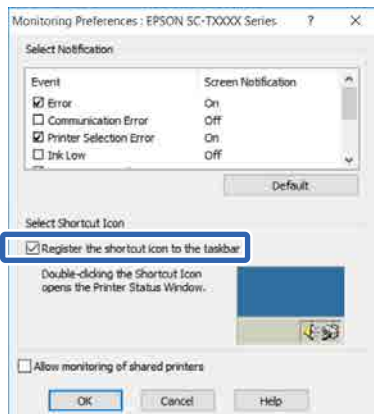

- 1 Right-click the printer icon () on the Windows taskbar, and then click **Layout Manager** in the displayed menu.

The Layout Manager screen appears.

Note:

When the printer icon is not displayed on the Windows taskbar

Open the **Utility** tab of the printer driver and click the **Monitoring Preferences**. Select the **Register the shortcut icon to the taskbar** check box in the **Monitoring Preferences** dialog box.

- 2 Click **Open** in the **File** menu on the Layout Manager screen.
- 3 Select the location and open the required file.

Printing Using the HP-GL/2 or HP RTL Mode from a Computer

Printing Using the HP-GL/2 or HP RTL Mode from a Computer

The printer can emulate* HP-GL/2 (compatible with HP Designjet 750C) and HP RTL. This section describes the settings of the printer and the settings in the CAD application for printing while emulating.

* Not all functions are supported. If you will use an untested application, test its output in advance.

Important:

The printer may not perform as expected if the size of the data to be printed is extremely large.

Note:

CAD drawings can also be printed using the CAD/ line drawing mode of the supplied printer driver. We recommend printing from the printer driver when you want to print with better image quality.

 ["Printing CAD Drawings" on page 59](#)

Printer Settings

Change the printer settings for printing in the HP-GL/2 or HP RTL mode as necessary in the control panel of the printer. The printer settings include basic print settings such as the paper source and margins (Universal Print Settings) and HP-GL/2 specific settings such as palette settings (HP-GL/2 Unique Settings).

Basic Print Settings

1 Touch **Settings - General Settings - Printer Settings - Universal Print Settings** from the Home screen.

2 Check **Paper Source** and change the setting if necessary.

The default setting is Roll Paper. When HP-GL/2 or HP RTL print data is sent, an error occurs if paper is not loaded for the paper source set here.

3 Check the other items and make changes if necessary.

See the following for more details on Universal Print Settings items.

 ["General Settings - Printer Settings" on page 143](#)

HP-GL/2 Specific Print Settings

If you want to change HP-GL2 specific settings such as rotating print data, merging lines, and changing the Define Palette set in the application, use the following procedure.

1 Touch **Settings - General Settings - Printer Settings - HP-GL/2 Unique Settings** from the Home screen.

2 Touch and change the settings of the desired items.

See the following for more details on HP-GL/2 Unique Settings items.

Printing Using the HP-GL/2 or HP RTL Mode from a Computer

Note:

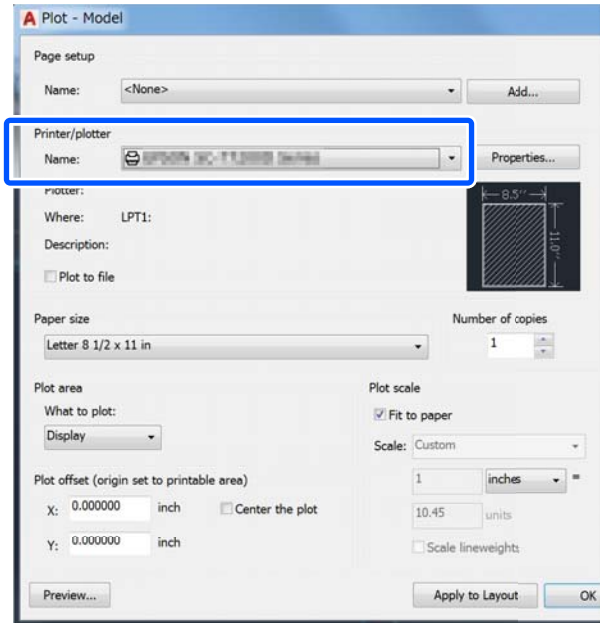

When HP-GL/2 or HP RTL printing is not performed properly

The printer automatically determines whether normal printing from the printer driver or emulation printing of HP-GL/2 or HP RTL from the sent print data and then switches the print mode accordingly. If mode switching is not performed correctly and printing is not performed properly, configure the setting as follows.

- ❑ When the computer and printer are connected via USB
Select **Settings - General Settings - Printer Settings - Printing Language - USB** from the Home screen and then change the setting from **Auto** to **HP-GL/2**.
- ❑ When the computer and printer are connected via a network
Select **Settings - General Settings - Printer Settings - Printing Language - Network** from the Home screen and then change the setting from **Auto** to **HP-GL/2**.

To print from the printer driver as usual after HP-GL/2 or HP RTL finishes, return the setting to **Auto**.

Printing without Using the Printer Driver

Printing without Using the Printer Driver

This section explains how you can print, even if the printer driver is not installed on your computer, if you are connected to a network; it also explains how to connect a USB flash memory to the printer and print the files on the USB flash memory.

Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, iPod touch, and Mac without the need to install drivers or download software.

- 1 Load paper in your product.
- 2 Set up your product for wireless printing. See the link below.
<http://epson.sn>
- 3 Connect your Apple device to the same wireless network that your product is using.
- 4 Print from your device to your product.

Note:
For details, see the AirPrint page on the Apple website.

Direct Printing via the Web (Upload and Print) (SC-T5400M Series Only)

Function Summary

Upload and Print is a function that prints by running Web Config from a computer on which the printer driver is not installed.

“How to Use Web Config” on page 26

You can print by simply selecting the file you want to print, and then uploading it to the printer. If the browser you are using supports drag and drop, you can upload multiple files in a batch and print them in order.

The following are files that can print from an upload.

- JPEG
- HP-GL/2
- TIFF (data created on the printer only)
- PDF (data created on the printer only)

Upload and Print Procedure

- 1 Load the paper into the printer.
 “Loading Roll Paper” on page 33
 “Loading Cut Sheet (1 sheet)” on page 40
- 2 Start Web Config.
 “How to Start” on page 26
- 3 The **Print** tab appears. Click **Upload and Print**.

Printing without Using the Printer Driver

Note:
If the **Print** tab does not appear, contact your system administrator.

- Do the settings for printing.
Select Color Mode and Paper Source in **Basic Settings**.

Do the settings, such as Quality, from **Advanced**.

- Start printing by dragging and dropping the data.

Printing Files from a Shared Folder (Print from Folder) (SC-T5400M Series Only)

Function Summary

You can select and print a file from a shared folder on the network that has been setup in advance.

Do the settings for the shared folder on the printer's screen or on Web Config.

👉 [“Preparing a Shared Folder” on page 98](#)

The following files can be printed from a network folder/FTP.

- JPEG
- HP-GL/2
- TIFF (data created on the printer only)
- PDF (data created on the printer only)

Preparing a Shared Folder

Setup from the printer

- Touch **Settings** on the Home screen.
- Touch, in order, **General Settings - Network Settings - Advanced - Shared Folder**.
The shared folder settings screen appears.

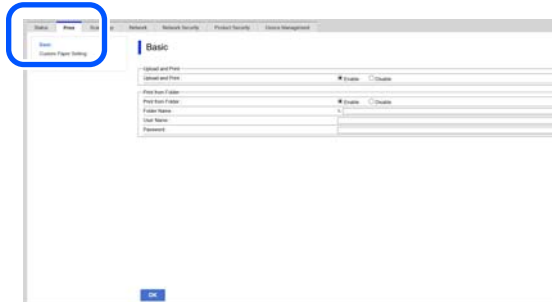

- Enter each item.
 - Folder Name: Within 255 characters, enter the network path for the shared folder.
 - User Name: Enter the user name that you use to log into the computer.
 - Password: Enter the password that you use to log into the computer.
- Touch **Proceed** to complete the settings for the shared folder.

Printing without Using the Printer Driver

Setup from Web Config

- 1 Start Web Config.
 ↗ “How to Start” on page 26
- 2 The **Print** tab appears. Click **Basic**.

Note:
 If the **Print** tab does not appear, contact your system administrator.

- 3 Enter each item for **Print from Folder**.
 - Print from Folder: Select enable.
 - Folder Name: Enter the network path for the shared folder.
 - User Name: Enter the user name that you use to log into the computer.
 - Password: Enter the password that you use to log into the computer.

- 4 Click **OK** to complete the settings for the shared folder.

Print from Folder Procedure

The procedure to print from a folder from the printer's screen is as follows.

- 1 On the Home screen, touch **Network Folder**.
 After a short while, a list of the files in the shared folder appears.

- 2 Select 1 file to print.

- 3 Select **Black/White** or **Color**.
Using advanced settings such as enlarging or reducing size

Proceed to step 4.

Printing at actual size without advanced settings

Proceed to step 5.

- 4 Touch the **Advanced** tab.
 You can do the settings for reducing and enlarging in **Reduce/Enlarge**. Set **Auto Fit Page** to **On** to print after the file is automatically enlarged to fit either the width of the roll paper, or the size of the cut sheets, that is/are loaded in the printer.

See the following for more details on other settings items.

↗ “**Network Folder menu (SC-T5400M Series Only)**” on page 180

- Note:**
- If **HP-GL/2** files are selected in **Page Margins** option - **Borderless**, either **Clip By Margins** or **Oversize in Settings - General Settings - Printer Settings - Universal Print Settings - Page Margins** option is applied.
 - You can select **Reduce/Enlarge** in **HP-GL/2** files, but it is not applied.

- 5 Touch the **Print** button.

Direct Printing of Files on USB Flash Memory

You can connect your USB flash memory to the printer, and print JPEG and TIFF files stored on the memory directly from the printer.

Printing without Using the Printer Driver

USB flash memories formatted in FAT and exFAT file systems can be used. However, you cannot use USB flash memories with security functions such as password protected ones.

- 1 Connect the USB flash memory, in which the data to be printed is saved, to the printer.

- 2 Touch **Memory Device** on the Home screen.
- 3 Touch **JPEG** or **TIFF**.
Touch **JPEG** to display thumbnails of JPEG files.
Touch **TIFF** to display a list of TIFF files.
- 4 Select one file to print.

Printing JPEG files

Touch to select the file image to print, then touch **Proceed to Print**. This will add a check mark to the selected image. Touch **Single View** to enlarge the selected image to confirm. To change the display order of files, touch .

Printing TIFF files

From the list, touch a file name to select it. To change the display order of files, touch .

Note:

- Files other than JPEG or TIFF files are not displayed on the printer screen.
- Any characters in the folder or file names that cannot be displayed by the printer will be displayed as "?".

- 5 Select **Black/White** or **Color**.
Using advanced settings such as enlarging or reducing size

Proceed to step 6.

Printing at actual size without advanced settings

Proceed to step 7.

- 6 Touch the **Advanced** tab.
Enlarge/reduce settings can be configured in Reduce/Enlarge. If you set **Auto Fit Page to On**, printing is performed by automatically enlarging to fit the width of the roll paper or the size of the cut sheet paper loaded in the printer.

See the following for more details on other settings items.

 [“Memory Device menu” on page 165](#)

Note:

If you touch ☆ (Presets), you can assign a name to frequently used print settings and then register them to Presets.

The screen for entering a name can be switched as shown below with the button marked.

Also, each touch of the following bottom left icon switches the input method as follows.

ABC: Enters alphabet letters.

123#: Enters numbers and symbols.

- 7 Touch the numeric value for the number of prints and then enter the number of prints in the keypad screen.

Note:

Use the **Preview** button to confirm the print image.

- 8 Touch the **Print** button.

Documents That Cannot Be Loaded

Do not load originals such as the following. Failure to observe this precaution could cause paper jams or damage the printer.

- Originals that are bound
- Originals that are bent
- Originals with carbon backing
- Originals that are attached with staples, paper clips, or glue
- Originals that have many holes, such as loose leaf paper

- Originals that are shaped irregularly or not cut at right angles
- Originals with photos, stickers, or labels attached
- Originals that are transparent
- Originals that are glossy
- Originals that have become deteriorated
- Originals that are torn

When loading documents that are thin, that are easily torn, or that you do not want to damage

Use the optional carrier sheet for thin documents and documents that you do not want to damage.

 [“Options and Consumable Products” on page 215](#)

Documents That Need the Carrier Sheet

- Valuable documents that you do not want to damage (documents on loan, master copies, old drawings, antique maps, works of art, etc.)
- Documents with fragile surfaces and/or materials (collages, newspapers, rice paper, oil pastel drawings, etc.)
- Transparent and translucent film

Notes for When Putting Documents into the Carrier Sheet

Insert the document in the carrier sheet as shown.

- Insert the document with the side to be scanned facing the transparent sheet.
- Align the top edge of the document with part **A** of the carrier sheet.

Copy (SC-T5400M Series Only)

- ❑ Align the side of the document with line **B**.

Important:

If the carrier sheet is loaded, the printer cannot automatically detect the width. On the control panel, set the **Original Size** or the **Scan Size and Top Offset**.

How to Load Documents

Important:

- ❑ If the original tends to curl, load the original after straightening the curl.
- ❑ Smooth the creases in the original, and then load it.

Note:

For a document longer than 1 meter, support the document with your hand so it does not skew as it feeds.

- 1 Align the document guide on the right side with the document loading position.

If you are using the carrier sheet to scan, align the document guide with the position indicated in the illustration.

- 2 Face the scanning side upward and align the right edge of the document with the document guide. Insert the leading edge of the document into the scanner's paper slot until you hear a beep.

Load the document in the direction indicated by the illustration.

- 3 Align the document guide on the left side with the edge of the document.

Scanning (SC-T5400M Series Only)

Scanning (SC-T5400M Series Only)

Function Summary

The following are 3 ways that you can save or send the data of scanned images.

Network Folder/FTP: Save the scanned image in a folder via the network. For the recipient, you can specify a shared folder (a folder that uses SMB protocol) that was created on a computer or a folder on the FTP server. You must do the settings for the shared folder or FTP server in advance.

Email: Attach the scanned image directly into an email to be able to send it from the printer. You must register an email server and do its settings in advance.

Memory Device: You can save the scanned image to a USB flash memory that is installed in the printer. You do not have to do any settings in advance.

Preparing to Scan

The following settings must be done in advance to save a scanned image to a folder or send a scanned image via email.

- Shared folder settings and FTP server settings**
Do the settings in Web Config. See the *Administrator's Guide* for more details.
- Mail server settings**
Do the settings in Web Config. See the *Administrator's Guide* for more details.

- Settings for the recipient email addresses and the contacts for the shared folder**
Do the settings from the printer's screen or from Web Config. This section explains the contacts settings in the shared folder from the printer's screen.
See the *Administrator's Guide* for how to do settings in Web Config.

Creating Contacts

- 1** Touch **Settings** on the Home screen.
- 2** Touch, in order, **Contacts Manager - Register/Delete**.
- 3** Touch, in order, **Add Entry - Add Contact - Network Folder/FTP**.

The Add Entry screen appears.

- 4** Check the details for each item and input any necessary information.
 - Registry Number:** Set a registry number for the address.
 - Name:** Name that appears in your contacts (up to 30 characters).
 - Index Word:** Use to search your contacts (up to 30 characters).
 - Communication Mode:** Select SMB.
 - Location:** Enter a shared folder's network path (within 255 characters). When you enter letters, numbers, and symbols, specify single-byte and double-byte characters correctly. If the setting for single-byte and double-byte characters is incorrect, you will not be able to save to the shared folder.
 - User Name:** Enter the user name that you use to log into the computer.
 - Password:** Enter the password that you use to log into the computer.

Scanning (SC-T5400M Series Only)

- ❑ Assign to Frequent Use: Register an address for frequent use. When an address is specified, it will appear on the top screen.

Note:

If you do not have a password set on your computer, you do not have to enter a user name or password.

- 5 Touch **OK** to finish registering a shared folder to your contacts.

- 7** Touch  to start copying.
Copying can also be started by touching the  button of the scanner.

Placing Documents in the Scanner

Failure to observe the following precautions when placing the original in the scanner may result in reduced print quality or scanning failures.

- DS-530 is a scanner that scans both sides simultaneously but it cannot scan both sides of the document with enlarged copying. Place the side you want copying facing downward in the ADF.

- Be sure to insert the original in landscape (wide) orientation.

- If there are documents both on the glass and in the ADF, the document in the ADF will be scanned. Remove documents from the ADF before placing a document on the glass.
- The ADF can not be used when:
 - When **JIS B1** or **A0** is selected for Reduce/Enlarge and multiple copies will be made
 - The original is printed on thick stock (e.g., postcards or photographs)
- When multiple copies are made from an original placed on the glass, the original may be scanned once for each copy. Wait until all the copies have been printed before opening the scanner cover.

- Use the ADF to scan multi-page documents.
- If multiple copies are set for scanning multiple sheets continuously, the copies will be printed on a page basis as shown below.
Example: Order in which pages are output when the printer is used to make two copies of a two page document

Platen Gap	1.2	Displayed when Custom Paper is selected in Paper Type . When registering Custom Paper, this is the Platen Gap (distance between print head and paper) for the paper selected in Change Reference Paper , so it does not normally need to be changed. Change this to a setting that will widen the gap (a higher value) if print results are smeared.
	1.6	
	2.1	

Using the Menu

Settings item	Settings value	Explanation
Top/Bottom Margins	Standard *	Setting this to Standard will set the top/bottom margins as follows depending on the printer driver print targets. <input type="checkbox"/> CAD/Line Drawing: 3 mm/3 mm <input type="checkbox"/> Other: 30 mm/30 mm Left and right margins will remain at 3 mm regardless of settings. If there is any soiling on the top section of the print results, increase the top margin. 🔗 "Printable area" on page 224
	Top 3 mm/Bottom 3 mm	
	Top 15 mm/Bottom 15 mm	
	Top 35 mm/Bottom 15 mm	
Paper Suction	-4 to +3	It is important to choose the appropriate amount of suction for the paper used in order to maintain the correct distance between the paper and print head. Choosing too high a value for thin or soft paper will increase the distance between the paper and print head too much, causing print quality to decline or preventing the paper feeding correctly. In such cases, you will need to lower the paper suction. The lower the setting value, the weaker the suction power.
Back Tension	Auto *	If there is any wrinkling on the paper during printing, set this to High or Extra High . When this is set to Extra High , the following setting is enabled. Settings - General Settings - Printer Settings - Paper Source Settings - Roll Paper Setup - Back Tension 2
	Standard	
	High	
	Extra High	
Drying Time		
Drying Time per Pass	0.0 to 10.0 seconds (0.0*)	Select the time the print head pauses to allow drying after each pass. Choose from values between 0.0 and 10.0 seconds. Depending on the paper type, the ink may take a while to dry. If the ink blurs on the paper, set a longer time for drying the ink. Increasing the drying time increases the time needed to print.
Drying Time per Page	0.0 to 60 minutes (0.0*)	Specify how long the printer pauses to allow the ink to dry after printing each page; choose from values between 0.0 and 60 minutes. Depending on the ink density or paper type, the ink may take a while to dry. If the ink blurs on the paper, set a longer time for drying the ink. The longer the drying time, the more time required for printing.
Paper Size Check	On *	Displayed when Custom Paper is selected in Paper Type . Select whether to detect (On) or not detect (Off) the paper width when paper is loaded. Try choosing Off if a paper setting error is displayed even though the paper is correctly loaded. Note, however, that the printer may print outside the paper when Off is selected. If it prints beyond the edges of the paper, the inside of the printer becomes dirty with ink. We generally recommend using the printer with this set to On. The changes are applied after the paper is reloaded. Note that they are not applied if you just change the menu items.
	Off	
Auto Cut	On *	Select whether to automatically cut (On) or not cut (Off) using the built-in cutter as each page is printed on roll paper. Set On to automatically cut the edge if it is not a horizontal cut when paper is loaded. The setting selected with the printer driver takes priority when the printer driver is used. 🔗 "Cutting the Roll Paper" on page 36
	Off	

Using the Menu

Settings item	Settings value	Explanation
Remove Skew	On *	Select whether to enable (On) or disable (Off) paper skew reduction.
	Off	
Manage Remaining Amount		
Setup	On	Select whether to display/record (On) or not to display/ record (Off) the amount of remaining roll paper. Set On to enable Remaining Amount and Remaining Alert .  "For Roll Paper" on page 42
	Off *	
Remaining Amount	5.0 to 150.0 m (30 [*])	Entering the total length of the loaded roll paper in Remaining Amount displays an estimate of remaining amount of roll paper on the printer's Home screen and on the printer driver screen.
Remaining Alert	1.0 to 15.0 m (5.0 [*])	In Remaining Alert , set the limit at which to display a warning when the amount of remaining roll paper drops below that limit. You can set in 0.1 m increments. Also, when the roll paper is removed, the remaining amount, setting value of Remaining Alert, and paper type are automatically converted to a barcode which is printed at the end of the roll paper. The printer automatically reads the barcode and sets the settings when you load the roll paper next time.
Change Paper Type		
Paper Type	Plain paper *	Select the type of the loaded paper. The three options other than Others display the most recently selected paper type. When the desired paper type is not displayed, touch Others to display the other paper types and then select a paper type.  "For Roll Paper" on page 42

Platen Gap	1.2	This is displayed when Custom Paper is selected in Paper Type . When registering Custom Paper, this is the Platen Gap (distance between print head and paper) for the paper selected in Change Reference Paper , so it does not normally need to be changed. Change this to a setting that will widen the gap (a higher value) if print results are smeared.

Paper Suction	-4 to +3	It is important to choose the appropriate amount of suction for the paper used in order to maintain the correct distance between the paper and print head. Choosing too high a value for thin or soft paper will increase the distance between the paper and print head too much, causing print quality to decline or preventing the paper feeding correctly. In such cases, you will need to lower the paper suction. The lower the setting value, the weaker the suction power.
Paper Size Check	On *	This is displayed when Custom Paper is selected in Paper Type . Select whether to detect (On) or not detect (Off) the paper width when paper is loaded. Try choosing Off if a paper setting error is displayed even though the paper is correctly loaded. Note, however, that the printer may print outside the paper when Off is selected. If it prints beyond the edges of the paper, the inside of the printer becomes dirty with ink. We generally recommend using the printer with this set to On. The changes are applied after the paper is reloaded. Note that they are not applied if you just change the menu items.

Maintenance

Maintenance

Cleaning the Platen

Periodically (about once a month) clean the platen by doing the following procedure.

- 1 Turn the printer off and make sure that nothing is displayed on the screen, and then unplug the power cable from the outlet.
- 2 Leave the printer for a minute after removing the power plug.
- 3 Open the front cover.

! **Important:**

- Never touch the rollers inside the printer during cleaning. Doing so may cause soiled prints and other problems.
- Do not touch the ink tubes inside the printer because doing so may cause a failure.
- Do not rub the pads for borderless printing. Doing so may cause the pads to become detached.

- 4 Use a soft cloth to remove any dust or dirt from the platen.

Thoroughly wipe the area shown in blue in the illustration below. To avoid spreading the dirt, wipe from the inside to the outside.

For stubborn dirt, clean it using a soft cloth that has been dampened with a small amount of neutral detergent and then thoroughly wrung out. Then, dry off the inside of the printer with a dry, soft cloth.

- 5 If any paper particles (resemble white powder) have accumulated in the holes shown in the illustration below, use a pointed object such as a toothpick to push them in.

- 6 After cleaning, close the front cover.

Maintenance

Handling of Used Consumables

If using the printer in an office or other business, dispose of used consumables in accordance with laws and regulations, such as by contracting an industrial waste disposal company.

If using the printer in a domestic situation, place these in a plastic bag, then dispose of in accordance with laws and regulations as well as regional ordinances, and as directed by local government.

Replacing Ink Cartridges

If any of the ink colors remaining amount falls below the minimum amount, printing will not be possible.

If an ink cartridge remaining amount falls below the minimum amount, you can continue printing after replacing the ink cartridge.

If the remaining ink amount drops yet printing is continued, then replacement of an ink cartridge during printing may be required. When replacing ink during a print job, you may see a difference in color depending on the drying conditions. When this is not permissible, we recommend first replacing the ink cartridge with a new one before printing. The removed ink cartridge can be installed again and used until the remaining amount falls below the minimum amount. However, if an ink cartridge with not much ink remaining is removed and reinstalled, it may not be usable because some ink is consumed to ensure the reliability of the printer.

Supported ink cartridges

 [“Options and Consumable Products” on page 215](#)

Important:

Epson recommends the use of genuine Epson ink cartridges. Epson cannot guarantee the quality or reliability of non-genuine ink. The use of non-genuine ink may cause damage that is not covered by Epson's warranties, and under certain circumstances, may cause erratic printer behavior. Information about non-genuine ink levels may not be displayed, and use of non-genuine ink is recorded for possible use in service support.

Note:

*You can replace the ink cartridges while viewing the procedure on the screen. To view the procedure on the screen, touch **Settings - Maintenance - Ink Cartridge(s) Replacement** from the Home screen.*

1 Make sure the printer is on.

2 Open the cartridge cover.

3 Remove the new ink cartridge from the bag. Shake the ink cartridge for 10 seconds 30 times horizontally in approximately 5 cm movements as shown in the illustration.

Maintenance

! **Important:**

Do not touch the IC chip on the ink cartridge. You may not be able to print properly.

- 4** Hook a finger into the indentation on the top of the ink cartridge to be replaced and pull it straight toward you.

! **Important:**

Removed ink cartridges may have ink around the ink supply port, so be careful not to get any ink on the surrounding area when removing the cartridges.

- 5** Holding the new ink cartridge with the label facing toward you, slide it all the way into the slot.
- Match the color of the ink cartridge to the color of the label on the printer.

Repeat Steps 3 to 5 to replace the other ink cartridges.

! **Important:**

Install ink cartridges into all slots. You cannot print if any of the slots are empty.

- 6** Close the cartridge cover.

! **Important:**

We recommend that you remove and shake the installed ink cartridges once every three months to ensure good print quality.

Maintenance

Replacing Maintenance Box

If **The Maintenance Box is at the end of its service life.** is displayed, replace the Maintenance Box.

If **The Maintenance Box is nearing the end of its service life.** is displayed, ready a new Maintenance Box. Printing is possible until replacement is instructed.

Supported maintenance box

 [“Options and Consumable Products”](#) on page 215

 **Important:**

Do not replace the Maintenance Box while printing. Waste ink may leak.

Note:

*You can replace the Maintenance Box while viewing the procedure on the screen. To see the guide, from the Home screen, touch **Settings - Maintenance - Replace Maintenance Box.***

When you open the Maintenance Box cover for SC-T5400 Series/SC-T5400M Series, you will find a Maintenance Box on both the left and right sides. The replacement procedure is the same for both of them.

1 Open the Maintenance Box cover.

2 Pull out the Maintenance Box.

3 Place the used Maintenance Box in the clear bag included with the new Maintenance Box, and make sure that the zipper is closed tight.

Maintenance

! **Important:**

Until the fastener is closed securely, do not tilt the Maintenance Box. Waste ink may leak.

- 4** Insert a new Maintenance Box.

! **Important:**

Do not touch the IC chip on the Maintenance Box. Doing so may prevent normal operation and printing.

- 5** Close the Maintenance Box cover.

Replacing the Cutter

Replace the cutter when it is not cutting paper cleanly.

Supported cutter

[“Options and Consumable Products”](#) on page 215

Use a cross-head screwdriver to replace the cutter. Make sure you have a cross-head screwdriver with you before you start work.

! **Caution:**

Store the cutter out of the reach of children. The cutter's blade could cause an injury. Pay careful attention when replacing the cutter.

! **Important:**

- Dropping the cutter, or knocking it against hard objects may chip the blade.
- The protective sheet inserted in the new cutter is to protect the blade. Do not remove it until you are instructed to do so.

- 1** Remove any paper from the printer.
 - [“Removing Roll Paper”](#) on page 38
 - [“Removing Cut Sheet \(1 Sheet\)”](#) on page 41
- 2** From the Home screen, touch **Settings - Maintenance - Replace Cutter**.
The Replace Cutter screen appears.
- 3** Touch **Start**.
The cutter moves to the replacement position.

Maintenance

- 4** Loosen the screw holding the cutter in place using a cross-head screwdriver and pull the cutter straight out.

Note:
Place the used cutter in a plastic bag, then dispose of in accordance with regional ordinances, and as directed by local government.

- 5** Install the new cutter.
Insert the cutter so that the pin on the printer matches up with the hole on the cutter. Use a cross-head screwdriver to tighten down the screw to hold the cutter in place.

! Important:
Screw the cutter firmly, otherwise the cut position may be slightly shifted or skewed.

- 6** Touch OK.
The cutter returns to its original position, and the protective sheet inserted in the cutter comes out. Remove the protective sheet.

Troubleshooting

You cannot print (because the printer does not work)

The printer does not turn on.

■ Is the power cable plugged into the electrical outlet or the printer?

Make sure the power cable is securely plugged into the printer.

■ Is there a problem with the power outlet?

Make sure your outlet works by connecting the power cable for another electric product.

The printer turns off automatically.

■ Is the automatic power off configured?

To prevent the printer turning off automatically, select **Off**.

["General Settings - Basic Settings" on page 141](#)

The printer driver is not installed properly (Windows).

■ Is the icon for this printer displayed in the Devices and Printers/ Printers/Printers and Faxes folder?

- Yes
The printer driver is installed. See the "The printer is not communicating with the computer" section.
- No
The printer driver is not installed. Install the printer driver.

■ Does the printer port setting match the printer connection port?

Check the printer port.

Click the **Port** tab in the printer Properties dialog and check the option selected for **Print to the following port(s)**.

- USB: **USBxxx** (x stands for the port number) for the USB connection
- Network: The correct IP address for the network connection

If it is not indicated, the printer driver is not installed correctly. Delete and reinstall the printer driver.

["Uninstalling Software" on page 29](#)

The printer driver is not installed properly (Mac).

■ Is the printer added to the printer list?

Select **System Preferences > Printers & Scanners** (or **Print & Fax**) from the Apple menu.

If the printer name is not displayed, add the printer.

["How to Select the Dedicated Printer Driver for This Printer" on page 57](#)

The printer is not communicating with the computer.

■ Is the cable plugged in properly?

Confirm that the interface cable is securely connected to both the printer port and the computer. Also, make sure the cable is not broken nor bent. If you have a spare cable, try connecting with the spare cable.

■ Does the interface cable specification match the specifications for the computer?

Make sure the interface cable specifications match the specifications for the printer and the computer.

["System Requirements" on page 229](#)

Problem Solver

■ When using a USB hub, is it being used correctly?

In the USB specification, daisy-chains of up to five USB hubs are possible. However, we recommend that you connect the printer to the first hub connected directly to the computer. Depending on the hub you are using, the operation of the printer may become unstable. If this should occur, plug the USB cable directly into your computer's USB port.

■ Is the USB hub recognized correctly?

Make sure the USB hub is recognized correctly on the computer. If the computer correctly detects the USB hub, disconnect all USB hubs from the computer and connect the printer directly to the computer USB port. Ask the USB hub manufacturer about USB hub operation.

You cannot print under the network environment.

■ Are the network settings correct?

Ask your network administrator for the network settings.

■ Connect the printer directly to the computer using a USB cable, and then try to print.

If you are able to print via USB, there is a problem with network settings. Ask your system administrator, or refer to the manual for your network system.

Printing from iPhone or iPad is not possible.

■ Check printer settings.

- Connect the iPhone or iPad to the same network (SSID) as the printer.
- In Web Config, enable AirPrint settings.
 ["How to Use Web Config" on page 26](#)

The printer has an error.

■ View the message displayed in the control panel.

 ["What to do When a Message is Displayed" on page 189](#)

The printer stops printing.

■ Is the status of print queue Pause? (Windows)

If you stop printing or the printer stops printing because of an error, the print queue enters a **Pause** status. You cannot print in this status.

Double-click the printer icon in the **Devices and Printers, Printers**, or **Printers and Faxes** folder; if printing is paused, open the **Printer** menu and clear the **Pause** check box.

■ Does the current printer status show Paused? (Mac)

Open the status dialog for your printer and check whether printing is paused.

- (1) Select **System Preferences > Printers & Scanners** (or **Print & Fax**) > **Open Print Queue** from the **Apple** menu.
- (2) Double-click the icon for any printer that is **Paused**.
- (3) Click **Resume Printer**.

Problem Solver

Your problem is not listed here.

■ **Decide whether the trouble is caused by the printer driver or the application. (Windows)**

Perform a test print from the printer driver so that you can check that the connection between the printer and computer is correct and the printer driver settings are correct.

- (1) Make sure that the printer is turned on and in ready status, and load A4 or larger paper.
- (2) Open the **Devices and Printers, Printers**, or **Printers and Faxes** folder.
- (3) Right-click the printer icon, and select **Properties**.
- (4) In the Properties dialog, select the **General** tab and click **Print Test Page**.

After a while the printer starts to print a test page.

- If the test page is printed correctly, the connection between the printer and computer is correct. Go to the next section.
- If the test page is not printed correctly, check the items above again.
 ["You cannot print \(because the printer does not work\)" on page 191](#)

The "Driver Version" shown on the test page is the version number of the Windows internal driver. This differs from the Epson printer driver version that you installed.

The print head moves, but nothing prints.

■ **Confirm the printer operation.**

Print a nozzle check pattern.

 ["When you want to unclog the print head" on page 197](#)

If the printer has not been used for a long time, the nozzles of the print head may have dried up and become clogged.

■ **Is the message Motor self adjustment running. displayed on the control panel's screen?**

The printer adjusts the internal motor. Wait for a while without turning off the printer.

Paper Feed Adjust (Manual) Procedure

The adjustment patterns are printed twice. Visually check the adjustment patterns to make the adjustments.

The following shows the length and number of sheets of paper used for adjustment pattern printing.

- Roll paper: Approx. 156 mm
- Cut sheet: 2 sheets of A4 or larger

1 Touch the following in order from the Home screen.

- Roll paper
Roll paper information area - **Media Adjust**
- Cut sheet
Paper Setting - Cut Sheet(1 sheet) - Media Adjust

2 Touch **Paper Feed Adjust - Manual - Start**.
Printing of the first set of adjustment patterns starts.

! Important:
When using roll paper with the auto cut turned off, the paper cannot be removed to print the second set of patterns even though printing of the first set of patterns has finished. Do not pull the printed paper.

3 Enter the numeric value of the pattern with the least streaks among the printed adjustment patterns of #1 and then touch **Adjustment #2**.
In the following example, pattern 0 has the least streaks so you would enter 0.

If there is no difference between two adjacent patterns and you are unsure which is the best one to choose, enter the numeric value that comes between them. For example, if you are unsure whether to enter pattern 0 or 2, enter 1.

4 Select the adjustment pattern of #2 in the same way as for #1.

5 Touch **OK**.
Printing of the second set of adjustment patterns starts. For cut sheet smaller than A2 size, load the second sheet of paper.

! Important:
When using roll paper with the auto cut turned off, the part with the first set of patterns printed on it is pulled inside the printer in order to print the second set of patterns. Do not touch the paper with your hands.

6 Enter the numeric value of the pattern with the least streaks among the printed adjustment patterns of #1 and then touch **Adjustment #2**.
In the following example, pattern 0 has the least streaks so you would enter 0.

If you are unsure which of two adjacent patterns is the best one to choose, select the one that you think has the least streaks. You cannot enter the numeric value that becomes between them.

7 Select the adjustment pattern of #2 in the same way as for #1.

8 Touch **OK**.

When **Print head alignment complete...** appears, the procedure is finished.

The adjustment results are saved as settings of the currently selected paper type.

Print Head Alignment (Manual) Procedure

Visually check the adjustment patterns to make adjustments.

The following shows the length and number of sheets of paper used for adjustment pattern printing.

Problem Solver

- ❑ Roll paper: Approx. 285 mm
 - ❑ Cut sheet: 1 sheet of A4 or larger
- 1** Touch the following in order from the Home screen.
 - ❑ Roll paper
Roll paper information area - **Media Adjust**
 - ❑ Cut sheet
Paper Setting - Cut Sheet(1 sheet) - Media Adjust

2 Touch **Print Head Alignment - Manual - Start**.
The adjustment patterns are printed.

3 Enter the numeric value of the pattern with the most visible straight line among the printed adjustment patterns of #1 and then touch **Adjustment #2**.

In the following example, pattern 0 has the least streaks so you would enter 0.

If there is no difference between two adjacent patterns and you are unsure which is the best one to choose, enter the numeric value that comes between them. For example, if you are unsure whether to enter pattern 0 or 2, enter 1.

4 Select the adjustment patterns of #2 and #3 in the same way as for #1.

5 Enter the numeric value of the pattern with the least streaks among the adjustment patterns of #4 and then touch **OK**.

In the following example, pattern 0 has the least streaks so you would enter 0.

If there is no difference between two adjacent patterns and you are unsure which is the best one to choose, enter the numeric value that comes between them. For example, if you are unsure whether to enter pattern 0 or 2, enter 1.

When **Print head alignment complete...** appears, the procedure is finished.

The adjustment results are saved as settings of the currently selected paper type.

When you want to unclog the print head

We recommend checking for clogging by performing a print head nozzle check if the printer has not been used for an extended period or before important print jobs.

If the nozzle check results indicate clogging, carry out print head cleaning.

Ink is consumed during print head cleaning.

Check the remaining amounts of ink cartridges and the amount of empty space in the Maintenance Box and provide new ink cartridges and Maintenance Box in advance if they are low.

1 From the Home screen, touch **Settings - Maintenance - Print Head Nozzle Check**.

2 Touch **Start** to start printing a check pattern.
When changing the paper source displayed on the start screen, touch **Paper Source**.

3 Check the printed check pattern for clogging.
Example of clean nozzles

If none of the pattern is missing, then the print head nozzles are not clogged. Touch **OK** to end the nozzle clogging check.

Problem Solver

Example of clogged nozzles

If the pattern has missing areas, touch  to display the **Head Cleaning** screen. Proceed to the next step.

4

Touch **Start** to start cleaning.

When cleaning is complete, **Print the pattern?** will be displayed. Touch **Yes** to return to Step 2. Repeat Steps 2 to 4, and check if the problem has been resolved.

If the nozzles are still clogged after performing print head cleaning three times in a row, then perform Powerful Cleaning.

Select **Maintenance - Powerful Cleaning** to perform Powerful Cleaning.

Ink drips

■ Dirt has accumulated around the nozzles of the print head.

Perform print head cleaning.

 ["When you want to unclog the print head" on page 197](#)

Fine lines in drawings are not printed

■ Is a suitable resolution set?

Try the following measures.

- In your application software, set the resolution to 600 dpi.
- Confirm that the data paper size is correctly set in the printer driver document size, and remedy if different.
- If PDF, print directly from the source data for that PDF.
- In the printer driver, select **Emphasize Thin Lines**.
Emphasize Thin Lines is displayed by clearing the Simple Settings check box in the Print Quality section on the Printer Settings screen.

Differences in color/light/dark

If there are differences in color/light/dark, then handle these by following the process below.

 ["The prints are not what you expected" on page 194](#)

If these measures do not resolve the issue, check the following items.

■ Is the Color Density setting appropriate?

If you feel that lines in drawings are too light, then on the printer driver Advanced screen, click **Paper Configuration**, and increase the ink density.

Conversely, if the ink density is too high on tracing paper, either reduce the ink density or select **Tracing Paper <LowDuty>** in the Paper Type settings of the printer, and then print.

■ Are you using a genuine Epson ink cartridge?

This printer is developed for use with Epson ink cartridges. If you use non-Epson ink cartridges, printouts may be faint, or the color of the printed image may be changed because the remaining ink level is not correctly detected. Be sure to use the correct ink cartridge.

■ Are you using an old ink cartridge?

The print quality drops when an old ink cartridge is used. Replace the old ink cartridge with a new one. We recommend using all the ink in the cartridge before the expiry date printed on the package (within 6 months of installation in the printer).

■ Have you tried changing the print quality settings?

In the printer driver **Printer Settings- Print Quality**, select **Print with High Quality** and try printing. If this is not selected, this places priority on speed, however this can adversely impact print quality to some extent.

■ Is color management enabled?

Enable color management.

 ["Color Management Printing" on page 78](#)

■ Have you compared the printing result with the image on the display monitor?

Since the monitor and the printer produce colors differently, printed colors will not always match on-screen colors perfectly.

■ Did you open the front cover while printing?

If the front cover is opened while printing, the print head stops suddenly, causing unevenness in color. Do not open the front cover while printing.

Problem Solver

The color is not exactly the same as another printer.

■ **Colors vary depending on the printer type due to each printer's characteristics.**

Because inks, printer drivers, and printer profiles are developed for each printer model, the colors printed by different printer models are not exactly the same.

You can achieve similar colors with the same color adjustment method or the same gamma setting by using the printer driver.

[📖 "Correct color and print" on page 74](#)

The print is not positioned properly on the media.

■ **Have you specified the print area?**

Check the print area in the settings of the application and the printer.

■ **Is the Document Size setting correct?**

If the option selected for **Document Size** in the print driver or **Paper Size** driver does not match the paper loaded in the printer, the print may not be in the correct position or some of the data may not be printed. In this case, check the print settings.

■ **Is the paper skewed?**

If **Off** is selected for **Detect Paper Meandering** in the Printer Settings menu, printing will continue even if the paper is skewed, resulting in printing outside of the print area. In the Printer Settings menu, set **Detect Paper Meandering** to **On**.

[📖 "General Settings - Printer Settings" on page 143](#)

■ **Is the roll paper margin set wide?**

If margins narrower than the margins set in the roll paper **Advanced Media Setting - Top/ Bottom Margins** menu are set in the application software, then priority is given to the printer settings.

[📖 "Roll Paper menu" on page 134](#)

Lengths differ between the print results and print data

If you want to print to roll paper with lengths exactly as specified in the print data, such as when printing CAD drawings, make the following adjustments. You will need a ruler so get one ready before performing this work.

The length of the paper used for adjustment pattern printing is approximately 555 mm.

1 Touch the Roll paper information area - **Media Adjust** from the Home screen.

2 Touch **Paper Feed Adjust - Print length adjustment - Start**.

The adjustment patterns are printed.

3 Measure the distance between the "+" symbols on the printed patterns with a ruler.

4 Enter the measured length in the screen.

5 Touch **OK**.

When **Print head alignment complete...** appears, the procedure is finished.

The adjustment results are saved as settings of the currently selected paper type.

Vertical ruled lines are misaligned.

■ **Has Print Head Alignment been carried out?**

Confirm that paper type settings that match the paper are selected, and perform **Print Head Alignment**.

[📖 "Setting Loaded Paper" on page 42](#)

[📖 "Optimizing Paper Settings \(Media Adjust\)" on page 46](#)

Problem Solver

■ After Print Head Alignment, does the same problem occur?

In the printer driver Printer Settings screen, clear the **Simple Settings** check box in the Print Quality field. Select **Level - Max Quality**, clear the **High Speed** check box, and try printing.

However, printing may take some time.

Bidirectional printing moves the print head left and right while printing, so if the print head is misaligned (with gaps), ruled lines may be printed as misaligned.

■ Is the print head scuffing the printed surface?

Enable the Thick Paper function, and try printing. From the Home screen, touch **Settings - Printer Settings - Thick Paper - On**.

 ["General Settings - Printer Settings" on page 143](#)

When using commercially available roll paper registered as custom paper, touch the Roll paper information area - **Advanced Media Setting - Platen Gap** and try changing the setting to a value that will widen the platen gap (a higher value).

The printed surface is scuffed or soiled.

■ Is the paper too thick or too thin?

Check that the paper specifications are compatible with this printer.

 ["Epson Special Media Table" on page 217](#)

 ["Supported Commercially Available Paper" on page 221](#)

■ Is the paper wrinkled or creased?

Do not use old paper or paper with creases in it. Always use new paper.

■ Is the paper wavy or curled?

Changes in temperature and humidity may cause paper to become wavy or curled which can cause scratching.

Check the following points.

- Load the paper just before printing.
- Do not use wavy or curled paper. For roll paper, cut off the wavy or curled parts and then load it again. For cut sheets, use new paper.

 ["Notes on Loading the Paper" on page 32](#)

■ Is the print head scuffing the edge of the paper?

If smearing or soiling occurs on the edge of the roll paper, touch the Roll paper information area - **Advanced Media Setting - Top/Bottom Margins** from the Home screen, change the edge setting to 35 mm, and try printing.

■ Is the print head scuffing the trailing edge of the paper?

Depending on the paper usage, storage conditions, and the content of the print data, the bottom edge may be scuffed when printing. In this situation it is best to create your data with a wider bottom margin.

Soiling occurs at a specific position on the print surface

Follow the steps below to clean the roller by feeding plain paper.

- 1** Turn on the printer, and load it with widest available roll paper.
 ["Loading Roll Paper" on page 33](#)
- 2** Touch **Paper Setting - Roll Paper - Feed/Cut Paper** from the Home screen.
- 3** Touch and hold the  (Forward) button until the paper is no longer marked.
Paper is fed while the  (Forward) button is touched. If the paper is not soiled, cleaning is complete.
- 4** Touch the  (Cut) button to cut the paper.

Problem Solver

The paper is creased.

■ Are you using the printer at normal room temperature?

Epson special media should be used at normal room temperature (temperature: 15 to 25°C, humidity: 40 to 60%). For information about paper such as thin paper from other manufacturers that requires special handling, see the documentation supplied with the paper.

■ Is there a gap between both edges of the roll paper and the flanges?

Confirm that the spindle flanges are right up against both edges of the roll paper, with no gaps. If there are any gaps, then the paper is fed at an angle, and this may result in wrinkling.

 ["Loading Roll Paper" on page 33](#)

■ Has Media Adjust been carried out?

Confirm that paper type settings that match the paper being used, and perform Media Adjust.

 ["Setting Loaded Paper" on page 42](#)

 ["Optimizing Paper Settings \(Media Adjust\)" on page 46](#)

■ Is the roll paper tension weak?

If wrinkles occur on the roll paper, increase the paper tension settings. In the Roll paper information area - **Advanced Media Setting - Back Tension**, select **High** or **Extra High**.

The reverse side of the printed paper is soiled.

Carry out cleaning with the following procedure.

① Clean the platen and outer edges of the pads for borderless printing.

 ["Cleaning the platen and outer edges of the pads for borderless printing" on page 202](#)

 Soiling occurs on the back of the paper again right after cleaning

② Replace the pads for borderless printing.

 ["Replacing the pads for borderless printing" on page 203](#)

Important:

Continuing use with paper particles and dust adhered to the platen and the pads for borderless printing may cause a print head failure or nozzle clogging.

Cleaning the platen and outer edges of the pads for borderless printing

You can see the procedure in a video on YouTube.

[Epson Video Manuals](#)

- 1 Turn the printer off and make sure that nothing is displayed on the screen, and then unplug the power cable from the outlet.
- 2 Leave the printer for a minute after removing the power plug.
- 3 Open the front cover.

Important:

- Never touch the rollers inside the printer during cleaning. Doing so may cause soiled prints and other problems.
- Do not touch the ink tubes inside the printer because doing so may cause a failure.
- Do not rub the pads for borderless printing. Doing so may cause the pads to become detached.

Problem Solver

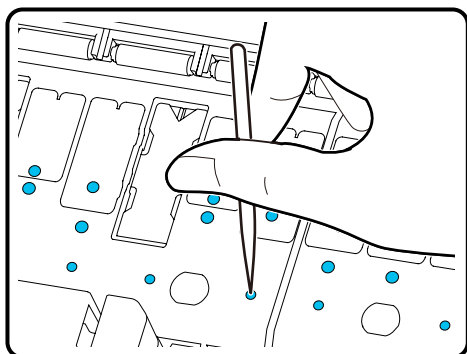

- 4** Use a soft cloth to remove any dust or dirt from the platen.

Thoroughly wipe the area shown in blue in the illustration below. To avoid spreading the dirt, wipe from the inside to the outside.

For stubborn dirt, clean it using a soft cloth that has been dampened with a small amount of neutral detergent and then thoroughly wrung out. Then, dry off the inside of the printer with a dry, soft cloth.

- 5** If any paper particles (resemble white powder) have accumulated in the holes shown in the illustration below, use a pointed object such as a toothpick to push them in.

- 6** Remove paper particles and dust around the outer edges with commercially available cotton swabs.

- 7** After cleaning, close the front cover.

Replacing the pads for borderless printing

Obtain the Borderless Replacement Pad Kit for this printer and then replace the pads for borderless printing.

[📖 “Options and Consumable Products” on page 215](#)

When replacing the pads for borderless printing, replace only the ones at the places where soiling occurs on the paper back side. There is no need to replace all of the pads for borderless printing.

You can see the procedure in a video on YouTube.

[Epson Video Manuals](#)

- 1** Turn the printer off and make sure that nothing is displayed on the screen, and then unplug the power cable from the outlet.
- 2** Leave the printer for a minute after removing the power plug.
- 3** Open the front cover.

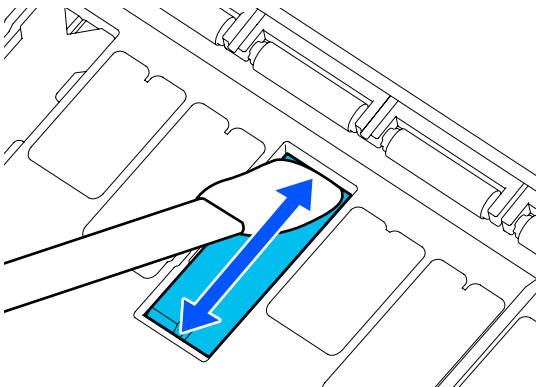

Problem Solver

- 4** Use tweezers to pull out the pads for borderless printing that are located at the places where soiling occurs.

- 5** Use cleaning sticks to wipe off all ink that has accumulated at the following three places.

Bottom

Sides

Center groove

- 6** Bend a new pad for borderless printing as shown in the illustration.

! Important:

Do not bend the new pads for borderless printing at other than the specified place.

Problem Solver

- 7** Insert the leg of the pad for borderless printing all the way into the hole.

- 8** Push the protrusions on the left and right of the pads for borderless printing into the grooves on the left and right.

- 9** Gently press the pad for borderless printing until it is seated flatly in place.

! Important:

Make sure that no portion of the pads for borderless printing is higher than the surrounding surface.

If any portion of the pads is higher than the surrounding surface, it will rub against the print head and may result in printer failure.

- 10** Close the front cover.

Dispose of the used pads for borderless printing and cleaning sticks.

 [“Handling of Used Consumables” on page 184](#)

To store any unused new pads for borderless printing, return them into the bag and close the fastener.

Problem Solver

■ Is ink dry on the printed surface?

Depending on the printing density and media type, the ink may take a while to dry. Do not stack the paper until the printed surface is dry.

Additionally, setting the drying time on the printer in **Roll Paper - Advanced Media Setting - Drying Time - Drying Time per Page** to a longer time will stop post-print processing (ejection, cutting), waiting for the paper to dry naturally.

 ["Roll Paper menu" on page 134](#)

Blurred text, lines, and images

■ Is the Media Type setting correct?

Confirm that the paper type selected with the printer matches the paper being used, and that the printer driver Media Type settings are **Use Printer Settings**. The amount of ink to be fired is controlled according to the media type. If the settings do not match the paper loaded, too much ink may be fired.

 ["Setting Loaded Paper" on page 42](#)

■ Is the Color Density setting appropriate?

On the printer driver Advanced screen, click **Paper Configuration**, and decrease the ink density. The printer may be printing with much ink for some paper. We recommend that black and color densities be decreased similarly.

■ Are you printing on tracing paper?

If too much ink is discharged, on the printer driver Advanced screen, click **Paper Configuration**, and decrease the ink density. Alternatively, changing **Paper Type** to **Tracing Paper <LowDuty>** may result in an improvement.

Printed over the barcode for Manage Remaining Amount

■ Depending on the paper, the printer may not be able to read the barcode for Manage Remaining Amount.

Set Setup to Off to use the printer. Touch, in order from the Home screen, Roll paper information area - **Manage Remaining Amount**, and then change **Setup** from **On** to **Off**.

Feeding or ejecting problems

Unable to feed or eject paper.

■ Is the paper loaded in the correct position?

See the following for the correct paper loading positions.

 ["Loading Roll Paper" on page 33](#)

 ["Loading Cut Sheet \(1 sheet\)" on page 40](#)

■ Is the paper loaded in the correct direction?

Load cut sheets vertically. If they are not loaded in the correct direction, the paper may not be recognized and an error may occur.

 ["Loading Cut Sheet \(1 sheet\)" on page 40](#)

■ Is the paper wrinkled or creased?

Do not use old paper or paper with creases in it. Always use new paper.

■ Is the paper damp?

Do not use paper that is damp. Also, Epson special media should be left in the bag until you intend to use it. If it is left out for a long time, the paper curls up and gets damp so that it does not feed properly.

■ Is the paper wavy or curled?

If changes in temperature and humidity cause paper to become wavy or curled, the printer may not be able to recognize the paper size correctly.

Check the following points.

- Load the paper just before printing.
- Do not use wavy or curled paper.
For roll paper, cut off the wavy or curled parts and then load it again.
For cut sheets, use new paper.

 ["Notes on Loading the Paper" on page 32](#)

■ Are the edges of the roll paper uneven?

Loading roll paper with the right and left edges uneven may cause paper feeding problems or paper meandering may occur during printing. Rewind the paper to make the edges even before using roll paper or use roll paper with no problem.

 ["Notes on Loading the Paper" on page 32](#)

Problem Solver

■ Is the paper too thick or too thin?

Check that the paper specifications are compatible with this printer.

☞ "Epson Special Media" on page 215

☞ "Supported Commercially Available Paper" on page 221

■ Are you using the printer at normal room temperature?

Epson special media should be used at normal room temperature (temperature: 15 to 25°C, humidity: 40 to 60%). For information about paper from other manufacturers, see the documentation supplied with the paper.

■ Is paper jammed in the printer?

Open the front cover of the printer and check that there are no paper jams or foreign objects in the printer. If paper is jammed, see "Roll paper jam" or "Cut sheets jam" below and clear the jammed paper.

Roll paper skews while printing

■ If Roll paper is meandering. keeps appearing during printing and printing stops, first load the paper again, and then try setting the Back Tension settings to High.

Do the settings by touching, in order from the Home screen, Roll paper information area (from the Home screen) - **Advanced Media Setting - Back Tension - High**.

Paper does not collect in the paper basket or is creased or folded

■ Does the print job require a lot of ink, or is the humidity of the workplace high?

Depending on the job and the work environment, paper may not collect in the paper basket. Take the following measures as appropriate.

- ❑ Paper does not collect in the paper basket: Use your hands to lightly press the paper into the paper basket as it is ejected from the printer.
- ❑ The paper folds after it has been cut automatically: Select manual cutting and take the paper in both hands after it is cut.
- ❑ The paper creases and does not collect well in the paper basket: Resume printing after closing the paper basket. Before the paper ejected from the printer touches the floor, take it in both hands close to the paper eject slot and continue to lightly support it until printing is complete.

Roll paper jam

To remove jammed paper, follow the steps below:

- 1 Open the cut sheet cover and the roll paper cover.

- 2 Cut the top portion of any torn or crinkled areas using a commercially available cutter.

Problem Solver

3 Close the roll paper cover and cut sheet cover.

4 When ejecting paper from the front, grasp the paper with both hands, and slowly pull it out towards you.

5 Open the front cover.

6 Remove the jammed paper and then close the front cover.

! Important:

Do not touch the print head. If you touch the print head with your hand, static electricity may cause a malfunction.

7 If **Then turn the power off and on again** is displayed on the screen, turn off the printer, and then turn it back on.

After removing the paper, reload the paper and restart printing.

[“Loading Roll Paper” on page 33](#)

! Important:

Before you reload the roll paper, cut the edge straight horizontally. Cut any wavy or creased sections.

If there are any wrinkles on the edge, then paper may not be fed, or it may jam.

Cut sheets jam

To remove jammed paper, follow the steps below:

1 Open the front cover.

2 When ejecting paper from the front, grasp the paper with both hands, and slowly pull it out towards you.

Problem Solver

- 3** Remove the jammed paper, then close the front cover.

! Important:
 Do not touch the print head. If you touch the print head with your hand, static electricity may cause a malfunction.

- 4** If **Then turn the power off and on again.** is displayed on the screen, turn off the printer, and then turn it back on.

After removing the paper, reload the paper and restart printing.

Print head is automatically cleaned

- To ensure print quality, the printer may automatically perform head cleaning when the printer is turned on or before starting printing.

The printer turned off due to a power cut

- **Turn off the printer, and then turn it back on.**

When the printer is not turned off normally, the print head may not be capped correctly. If the print head is left uncapped for a long time, the print quality may decline.

When you turn on the printer, capping is performed automatically after a few minutes.

Copying or Scanning Problems (SC-T5400M Series Only)

Lines Appear on Scanned or Copied Documents

Follow the steps below to clean the inside of the scanner. Dust or dirt that is stuck to the rollers or the scanner's glass surface may cause unwanted lines or marks on copy results and scanned images.

If the rollers or the scanner's glass surface is very dirty, use the optional cleaning kit. Add a small amount of cleaner to the cleaning cloth and wipe off the dirt.

[☞ "Options and Consumable Products" on page 215](#)

Problem Solver

! Important:

- ❑ Do not use volatile chemicals, such as alcohol or paint thinners. Deformation or discoloration could occur.
- ❑ Do not apply liquids to or directly spray lubricant on the scanner. Otherwise the equipment and circuits may become damaged, so the printer may not operate correctly.

1 Open the scanner cover.

2 Using a soft cloth, wipe off any dust, dirt, or paper particles (resembles white powder). Thoroughly wipe the area shown in blue in the illustration below.

3 Use the cleaning kit, or the clean side of the soft cloth, to thoroughly wipe the area shown in blue in the illustration below.

Problem Solver

- 4** Use the cleaning kit, or the clean side of the soft cloth, to wipe the glass surface.

! Important:

- Do not apply excessive force to glass surfaces.
- Do not use brushes or hard objects. They may scratch the glass surface and affect the scan quality.
- Do not directly spray cleaner onto the glass surface.

- 5** After you have finished cleaning, close the scanner cover.

! Important:

Close the scanner cover right after you have finished cleaning to prevent dust from getting inside.

Unable to Properly Feed Originals

If the right side of the original's loading position is incorrect, the original cannot be fed properly.

Check the position of the document guide on the right side.

If you do not want to use the optional carrier sheet

If the original's loading position is correct, check the following items. If the original still cannot be fed properly, change **Original Size** or **Scan Size** to the standard size from **Auto Detect**.

- Is the original loaded with skew?**

Reload the original. If the original is loaded with skew, it cannot be fed properly.
- Is the original folded?**

Unfold the original.

If the original is folded while the printer is set to **Auto Detect** in **Original Size** or **Scan Size**, the width of the original may not be read correctly, which may cause the original to not feed properly.
- Clean inside of the scanner.**

If the printer is set to **Auto Detect** in **Original Size** or **Scan Size**, the width of the original may not be read correctly, which may cause the original to not feed properly.

How to Clean Inside the Scanner
[📄 "Lines Appear on Scanned or Copied Documents" on page 210](#)

If you are using the optional carrier sheet

Problem Solver

■ Is the original loaded with skew?

Reload the original. If the original is loaded with skew, it cannot be fed properly.

Scanned Image Is Misaligned

■ Change the direction that the original is loaded.

Changing the direction that the original is loaded may improve scan results.

■ Is the original curled?

If the original is curled, smooth out the original and place it flat. Then scan the original.

■ Try Image Stitching Adjustment.

Doing Image Stitching Adjustment may improve scan results.

 ["Lines Appear on Scanned or Copied Documents" on page 210](#)

■ Try using the optional carrier sheet.

Putting the original into the carrier sheet smooths out any wrinkles and may improve scan results.

Document Feed Adjustment

If the print results and the length of the original of copied or scanned files do not match, use the following procedure to do Document Feed Adjustment. If you want to shorten the length of the print out, press the minus button. If you want to lengthen it, press the plus button. Differences in length may occur due to the type of paper used for printing.

1 Touch **Settings** on the Home screen.

2 Touch, in order, **General Settings - Scan Settings - Scan Options - Document Feed Adjustment**.

The adjustment value settings screen appears. The adjustment values are shown in %.

3 Either touch - or + to show the intended adjustment values or touch the adjustment entry area to enter the adjustment values via the keyboard screen.

Adjustment values are determined as shown below.

Example) When the length of the original is 50 cm and the print result is 50.1 cm:
 $50/50.1 \times 100 - 100 = -0.1996$, rounded at the second decimal.

Adjustment value: -0.2

4 Touch **OK**.

Image Stitching Adjustment

As for the original (**A**) shown in the figure below, if a misalignment occurs in the scanned image, such as in **B** , do Image Stitching Adjustment using the following procedure.

The arrow in **B** indicates the feed direction of the original.

1 Touch **Settings** on the Home screen.

2 Touch, in order, **General Settings - Scan Settings - Scan Options - Image Stitching Adjustment**.

The adjustment value settings screen appears.

3 Either touch - or + to show the intended adjustment values or touch the adjustment entry area to enter the adjustment values via the keyboard screen.

Shifting the adjustment value by 1 will correct the misalignment by about 0.1 mm in the actual size.

Problem Solver**When the Scan Results Are Shifted Up in Relation to the Feed Direction of the Original**

Set the adjustment value toward the plus sign.

**When the Scan Results Are Shifted Down in Relation to the Feed Direction of the Original**

Set the adjustment value toward the minus sign.

**4**

Touch OK.

Ink Cartridges

Epson recommends the use of genuine Epson ink cartridges. Epson cannot guarantee the quality or reliability of non-genuine ink. The use of non-genuine ink may cause damage that is not covered by Epson's warranties, and under certain circumstances, may cause erratic printer behavior.

Information about non-genuine ink levels may not be displayed, and use of non-genuine ink is recorded for possible use in service support.

Supported Commercially Available Paper

This printer supports the following paper specifications for non-Epson media.

 **Important:**

- Do not use paper that is wrinkled, scuffed, torn, or dirty.
- Commercially available paper corresponding to the paper types in the table can be loaded in and fed through the printer as long as they meet the following specifications, however Epson cannot guarantee the print quality.
- Commercially available paper types not in the table can be loaded in the printer as long as they meet the following specifications, however Epson cannot guarantee the feed and print quality.

Roll Paper

Paper type	Plain paper, coated paper, photo paper, tracing paper, matte film, backlight film, blueprint paper* ¹
Roll core size	2 inches and 3 inches* ²
Roll paper outer diameter	170 mm or less
Paper width	SC-T5400 Series/SC-T5400M Series: 254 to 914 mm (36 inches) SC-T3400 Series/SC-T3400N Series: 254 to 610 mm (24 inches)
Paper thickness	0.08 to 0.3 mm
Roll weight	12 kg or less

*¹ When blueprint paper is selected, the print data is converted to blue and then printed. You can perform blue printing (printing blue lines on a blue background).

For blue paper, use light blue, high quality paper (approximately 60 to 80 g/m²).

*² Only plain paper with a 3-inch core is supported.

Cut Sheet (1 Sheet)

Paper type	Plain paper, coated paper, photo paper, tracing paper, matte film, blueprint paper*
Paper width	SC-T5400 Series/SC-T5400M Series: 210 to 914 mm (36 inches) SC-T3400 Series/SC-T3400N Series: 210 to 610 mm (24 inches)
Length	279.4 mm (Letter) to 1,580 mm
Paper thickness	0.08 to 0.3 mm

* When blueprint paper is selected, the print data is converted to blue and then printed. You can perform blue printing (printing blue lines on a blue background).

For blue paper, use light blue, high quality paper (approximately 60 to 80 g/m²).

Appendix

Paper Widths Supported for Borderless Printing (Common for Both Roll Paper and Cut Sheet)

Printing borderless at the top, bottom, left, and right is possible for roll paper. Printing borderless is possible only at the left and right for cut sheet.

254 mm / 10 inches	A1 / 594 mm
300 mm / 11.8 inches	A1+ / ARCH D / 610 mm / 24 inches
A3+ / 329 mm / 13 inches	700 mm / 27.5 inches*

Before Printing on Commercially Available Paper

When using commercially available paper, select the paper type setting that matches to the paper from the following settings.

- Plain paper
- Coated Paper(Generic)
- Photo Paper(Generic)
- Tracing Paper
- Tracing Paper <LowDuty>
- Matte Film
- Blueprint Paper

Refer to the following if there is banding, wrinkling, smearing, or uneven colors in the printing results.

 [“The prints are not what you expected” on page 194](#)

When using Commercially Available Synthetic, Canvas or Film-type Paper

Before printing, carry out one of the following.

- Add as a new paper type setting (register as custom paper), and carry out media adjust.
From the Home screen, touch **Settings - General Settings - Printer Settings - Custom Paper Setting**, and register a custom paper. After registering the paper, perform Media Adjust. Paper adjustment results will be saved as the newly added paper type settings.
Refer to the following menu for details on custom paper settings.
 [“General Settings - Printer Settings” on page 143](#)
- Select the paper type from the following Epson Special Media settings, and perform Media Adjust.
Enhanced Adhesive Syn., Enhanced Low Adh. Syn., Heavyweight Polyester, Glossy Film2, Backlight Film Roll
By performing the Media Adjust, paper settings for Epson Special Media will be overwritten by the settings for the paper you use.

There are automatic and manual paper adjustments. We recommend manual adjustments for Synthetic, Canvas, or Film-type Paper. If automatic adjustments are made, an error may occur or the effect of adjustment may be minimal.

 [“Paper Feed Adjust \(Manual\) Procedure” on page 196](#)

 [“Print Head Alignment \(Manual\) Procedure” on page 196](#)

Note:

Test the print quality with this printer before purchasing a large amount of paper.

Appendix

Printable area

This section describes the printable areas for the printer.

If the print range settings in application software are larger than the following printer printable areas, sections beyond the specified margins are not printed.

Roll Paper

The gray area in the illustration below shows the printable area.

When printing borderless at the left and right, the left and right margins will be 0 mm. When printing borderless at all edges, all margins will be 0 mm.

The arrow in the illustration indicates the direction that the paper is ejected.

- *1 SC-T5400 Series/SC-T5400M Series
- *2 SC-T3400 Series/SC-T3400N Series
- *3 In the printer driver **Layout** screen, selecting **Print Banner** sets the top and bottom margins of the paper to 0 mm.

Margins for roll paper depend on the settings values for **Top/Bottom Margins** in the menu, as shown in the table below.

Settings of **Top/Bottom Margins**
 ☞ [“Roll Paper menu” on page 134](#)

The default setting is **Standard**.

Settings of Top/Bottom Margins	Margin Values
Standard	①,③ = 15 mm*
	②,④ = 3 mm
Top 3 mm/Bottom 3 mm	①,③ = 3 mm
	②,④ = 3 mm
Top 15 mm/Bottom 15 mm	①,③ = 15 mm
	②,④ = 3 mm
Top 35 mm/Bottom 15 mm	① = 35 mm
	③ = 15 mm
	②,④ = 3 mm
3 mm	①,②,③,④ = 3 mm
5 mm	①,②,③,④ = 5 mm

* If **Standard** is selected when the following two conditions are met, then the top and bottom margins will be 3 mm.

- The paper type settings are one of the following Singleweight Matte, Coated Paper(Generic), Plain paper, Plain Paper Thin, Plain Paper Thick, Tracing Paper, Tracing Paper <LowDuty>, Matte Film, Blueprint Paper
- The printer driver print targets are one of the following CAD/Line Drawing - Black, CAD/Line Drawing - Color, CAD/Line Drawing - Bi-Level

Appendix

Important:

- ❑ Printing is distorted when the trailing edge of the roll paper comes off the core. Make sure the trailing edge does not come inside the printing area.
- ❑ If the print range settings width **A** is smaller than the print data width **B**, then the sections beyond the printable width **C** will not be printed.

*4 SC-T5400M Series. The top and bottom margins vary depending on the print quality setting (Speed, Fine, etc.).

Cut Sheet

When printing borderless at the left and right, the left and right margins will be 0 mm.

The gray area in the illustration below shows the printable area. The arrow in the illustration indicates the direction that the paper is ejected.

- *1 SC-T5400 Series/SC-T5400M Series
- *2 SC-T3400 Series/SC-T3400N Series
- *3 SC-T5400 Series/SC-T3400 Series/SC-T3400N Series. The top and bottom margins vary depending on the print quality setting (Speed, Fine, etc.).

Appendix

Moving or Transporting the Printer

This section describes methods for moving and transporting the product.

Notes for Moving or Transporting the Printer

- ❑ The printer is heavy, so ensure more than one person is used for these actions. When packing and moving the printer, make sure that it is carried by the following number of persons.
 SC-T5400 Series/SC-T5400M Series: 3 or more persons
 SC-T3400 Series/SC-T3400N Series: 2 or more persons
- ❑ When you lift the printer, maintain a natural posture.
- ❑ When you lift the printer, place your hands at the specified locations on the left and right as indicated in the following illustration. If you lift the printer while holding other sections, you may be injured. For example, you may drop

the printer or your fingers may be pinched when lowering the printer.

SC-T5400 Series/SC-T5400M Series

Important:

When lifting the SC-T5400 Series, do not hold the location shown in the illustration below.

Appendix

SC-T3400 Series/SC-T3400N Series

- ❑ Do not tilt the product more than 10 degrees forward, back, left, or right while moving it. Failure to observe this precaution could result in the printer falling over, causing accidents.
- ❑ Leave the paper basket open when you install the printer after removing the stand of the SC-T3400 Series and moving it. Otherwise, the paper basket will not open.

Important:

The print head may fail if the environmental temperature becomes -10°C or lower.

Eject the ink prior to turning off the power if you expect to be moving or transporting the printer in an environment of -10°C or below.

See the following procedure for detailed instructions.

[🔗 “Handling if Transporting/Leaving the Printer in an Environment of \$-10^{\circ}\text{C}\$ or Less” on page 228](#)

Moving to a Different Location in the Same Building

Preparations for Moving

This explains preparations for moving the printer a short distance, for example within the same building. See the following section for information on moving the printer between floors or to another building.

[🔗 “When Transporting” on page 228](#)

For models with stands, moving the printer on casters is possible providing there are no steps or unevenness in the floor along the route, however pay attention to the following points.

Caution:

For models with stands, ensure that you abide by the following points in order to prevent damage from falling over.

- ❑ Do not move the printer with casters locked
- ❑ Avoid areas with steps or unevenness
- ❑ After moving, ensure the casters are locked before use

Important:

Ensure you move and transport the printer with the ink cartridges installed. Do not remove the ink cartridges; otherwise, the nozzles may be clogged and make it impossible to print, or ink may leak.

- 1 Remove all paper from the printer.
- 2 Close all covers on the printer. For models with stands, close the paper basket.
- 3 Turn off the printer, and unplug all cables, including the power cord and LAN cables, etc.
- 4 For models with stands, release the locks on the casters.

Operations after Moving

This explains operations to prepare for use after moving the printer.

- 1 Connect the power cable, and turn the printer on.
- 2 Check for print head nozzle clogging, and if these are clogged, carry out print head cleaning.

[🔗 “When you want to unclog the print head” on page 197](#)

Appendix

When Transporting

Before transporting the printer, contact your dealer or Epson Support.

 [“Where To Get Help” on page 235](#)

Handling if Transporting/ Leaving the Printer in an Environment of -10°C or Less

The print head may fail if the environmental temperature becomes -10°C or lower. Discharge the ink following the procedures below if you expect the printer to encounter environments of -10°C or below.

 **Important:**

This procedure discharges ink into the Maintenance Box, therefore the Maintenance Box requires adequate remaining capacity. If the remaining capacity box is low, first prepare a new replacement Maintenance Box.

- 1 If paper is loaded, remove all paper.
 [“Removing Roll Paper” on page 38](#)
 [“Removing Cut Sheet \(1 Sheet\)” on page 41](#)
- 2 From the Home screen, touch **Settings - Maintenance - Discharging/Charging Ink**.
- 3 Touch **Start**.
 Ink discharging starts, and the power turns off automatically when it finishes.

 **Important:**

Do not open the cover or turn the printer off during ink discharge.

After this, refer to the following for preparations for movement/transport.
