

Video Conference and Wireless Projection Solution

KoiBox-100W

Wireless presentation | Four-way communications | Local storage

Running KoiMeeter video conferencing operating system

KoiMeeter provides a dedicated solution for small meeting rooms with support for wireless presentations, cross-platform communication and local storage.

Free yourself from cables with 4K wireless projection

4K wireless projection provides a seamless wireless projection experience free from complex cabling and without needing additional projection devices.

Up to four-way video conferencing and collaboration

Multi-point video conferencing with the QNAP KoiBox-100W, KoiMeeter, the KoiMeeter mobile app, and compatible SIP systems.

Local storage for record and store meetings

Install a 2.5-inch SATA drive and locally store all your meeting videos, audio and shared files while also enabling further usage as training materials.
