The Lindy 40m DisplayPort 1.2 Repeater is an active solution for amplifying high quality 4K DisplayPort signals up to distances of 40m, without any loss in image quality. This repeater supports a maximum DP resolution of 3840x2160@60Hz for excellent 4K video quality, while support for HDCP 1.4 and DPCP ensures 4K signals can be transmitted with no hassle for the viewer. DP++ support also allows connection to VGA, DVI Single Link or HDMI displays, easing any of the user's fears of connectivity issues to the display via additional adapters.

The repeater is ideal for use with professional AV/IT setups that require longer length transmissions with no degradation of the DP signal, with the device providing optimum amplification to prevent noise or distortion.
