Power for your mobile devices: Power Delivery 3.0 and Qualcomm® QuickCharge™ 3.0 with an output power of up to 25W enable this wall charger to charge your smartphone, tablet and other gadgets at unprecedented speed.

Fast: The combined output power of 25W via Power Delivery and QC3.0 ensures that every smartphone or tablet is charged quickly.

Safe: Despite the high charging speed, the highest priority is given to safety. Mechanisms against overcharging and short-circuiting as well as an intelligent charge cut-off protect the battery life of your device and also your energy consumption.

Convenient: The two ports (USB-C and USB-A) allow you to charge two devices simultaneously, so you don't have to take more than one charger with you.

Universal: The USB-A and USB-C charging ports let you connect any charging cable to the power supply.

Ideal: The clever Power Delivery protocol is particularly suitable for the latest generation of Samsung phones to recharge them quickly and efficiently.

- Input: AC 100-240V (50-60Hz)
- Output USB-A (QC3.0): DC 5V / 3A, 9V / 2A 12V / 1.5A
- Output USB-C (PD): DC 5V / 3A, 9V / 2.77A, 11V / 2.25A
- Total output power: 25W
- Dimensions: 43 x 26 x 41mm

Power Delivery 3.0 and Qualcomm® QuickCharge™ 3.0 with an output power of up to 20W enable this wall charger to charge your smartphone or tablet at unprecedented speed.

Fast: The combined output power of 20W via Power Delivery and QC3.0 ensures that every smartphone or tablet is charged quickly and yet gently for the battery.

Convenient: The two connectors (USB-C and USB-A) in one plug allow you to charge more than one device at a time and you don't have to take several chargers with you.

Intuitive: Once your devices are charged, the charging process is finished. This increases battery life and reduces energy consumption.

- Input: AC 100-240V (50-60Hz)
- Output USB-A (QC3.0): DC 3.6-6V / 3A, DC 6-9V / 2A, DC 9-12V / 1.5A
- Output USB-C (PD): DC 5V / 3A, DC 9V / 2.25A, DC 12V / 1.5A
- Total output power: 20W
- Dimensions: 79.5 x 38.6 x 22.2mm

OTHERS

Small but mighty: 50% smaller than conventional chargers, the VoltPlug Mini is currently our smallest charger. The USB-C port allows you to charge your smartphone or tablet extra fast with a whopping 20W.

Faster Charging: The powerful 20W USB-C port supports all popular fast charging protocols, such as Power Delivery, Quick Charge or Samsung Adaptive Fast Charge. The VoltPlug Mini detects your device and precisely adjusts the charging energy for the fastest possible charge.

Intelligent: As soon as your device is fully charged, the charging process is terminated. This increases battery life and reduces energy consumption.

Small: With a size of approx. 3 x 3cm, the dwarf is smaller than a golf ball. Thus, it fits in any pocket and also does not block several slots on the power strip. A weight of just 36g makes it a real lightweight and perfect for home, office or vacation.

Safe: Certified fuses offer protection against overcharging, overvoltage and short circuits.

- Input power: AC 100-240V, 50-60Hz, 0.6A
- Output power USB-C: DC 5V / 3A, 9V / 2.22A, 12V / 1.67A
- Supported fast charging protocols: PD2.0 / PD3.0 / PPS, QC2.0 / QC3.0, FCP / AFC / MTK PE+2.0 / 1.1, Apple 2.4A, BC1.2
- Size: 35 x 31 x 70mm

With solid 20W output power and the fast charging standard Power Delivery, the VoltPlug PD charges smartphones or tablets at top speed without draining the battery.

Faster charging: The charger contains an integrated power delivery chip that recharges your smartphone or tablet extra fast.

Intuitive: Once your devices are charged, the charging process will stop. This increases battery life and reduces energy consumption.

Quality: Bend protectors on both ends of the cable ensure that you can use the powerful features for longer.

Compact: Easily fits into any travel bag, making it the ideal companion for your next holiday trip.

- Input: AC 100-240V (50-60Hz) 0.5A max.
- Output PD: DC 5V / 3A, 9V / 2.22A, 12V / 1.67A
- Dimensions: 82 x 41 x 26mm
- Supports Power Delivery
- Cable data transfer rate: 480 Mb/s
- For charging and data transfer
- Textile braided cable sleeve and kink protection

With a full 18W output power and the extremely fast charging standard Quick Charge 3.0, the VoltPlug QC3.0 charges any smartphone or tablet at top speed without straining the battery.

Fast: Charges your smartphone at lightning speed.

Universal: Also allows fast charging of tablets or Nintendo Switch.

Smart: Intelligent charger switch-off protects the power consumption and battery life of your device and temperature sensors protect against overheating.

Practical: With its 2in1 connector, the cable enables charging of both Micro-USB and USB-C devices.

Durable: Rugged aluminium-coated connectors and bend protection at both ends of the cable prevent cable breakage and increase the life of your cable. The cable sheath made of resistant textile braiding serves as an additional protective layer.

Powerful: Can transfer up to 2A and is therefore compatible with most fast chargers.

- Input: AC 100-240V for worldwide use
- Output: DC 9-12V / 1.5A, DC 6-9V / 2A, DC 5V / 3A (18W max.)

Compact and powerful universal USB plug-in charger with two USB outputs and a charging current of up to 2.4A. An intelligent ID chip detects the connected device and charges with optimal charging current.

Powerful: 2 USB charge ports, charge multiple devices simultaneously with up to 2.4 amps reliably.

Compact: Easily fits into any travel bag, making it the ideal companion for your next holiday trip.

Intelligent: The built-in innovative ID chip ensures that every connected device receives the optimum charging current - for safe, gentle charging.

Compatible: Whether smartphone, tablet, camera or speaker, the VoltPlug Dual 12W recharges two power-hungry devices simultaneously and with its 100 V to 240 V it can also be used abroad.

Safe: Certified technology against overvoltage and overcharging.

- Input: AC 100-240V (50-60Hz)
- Output: DC 5V / 2.4A max. (per port)
- Dimensions: 41 x 37 x 24mm

The elegant look, wireless charging pad, music playback via Bluetooth and sleep function make this gadget an absolute highlight in any home.

Elegant: The flowing, natural lines of this versatile table lamp fit perfectly into any home. It doesn't matter whether you place the Bonsai 2 in the living room, the kitchen or the bedroom. The Bonsai is always convincing.

Illuminating: The two infinitely dimmable light colours create a pleasant ambience in your home.

Sustainable: The FSC-certified, light maple wood comes from ecological cultivation and is therefore within the environmentally conscious framework of time.

Energy-saving: Activate the sleep function and the lamp is automatically dimmed to the minimum light intensity. After another 30 minutes, both the light and the loudspeaker are deactivated. This way you are sure that the lamp is not switched on all night.

Stereo: Connect two Bonsais together with just one click via the TWS mode and enjoy true stereo sound. Ideal for large rooms or bedrooms with two bedside tables.

- Bluetooth 5.0
- LED light functions: Turn light on/off with dimmable slider (2700K, 6000K)
- Input power and connection: 100-240V, 50-60Hz, 0.7A, USB-C
- Output power: 27W
- Wireless output power: 5W / 7.5W / 10W
- Speaker output power: 2 x 5W
- LED lamp with A++ efficiency

The Smart-Bonsai-Qi B7 combines an integrated wireless charging pad and Bluetooth speaker in one stylish lamp.

Quick pairing: Start the day right with non-stop tunes you want to hear with the Bluetooth speaker that instantly pairs to your phone.

Space-saving: Now that you've got all this extra space due the lamp's minimalistic design, you can place more items on your table to organize your day.

Cord-free: No need to search for your tangled charging cable - simply place your phone on the Qi wireless charging pad to instantly top up your phone.

Sustainable: Eco-friendly product made of recycled, FSC certified cherry wood.

Mood-setting: End the day with your favorite book next to a dimmable light that offers perfect lighting with the swipe of your finger.

Energy-saving: Rest easy knowing your light won't be left on all night with the sleep mode function that automatically shuts the light off after 30 minutes.

- Bluetooth 4.0 with 10m range and A2DP, AVRCP profiles
- LED light functions: Turn light on / off with dimmable slider
- Power connection: 100-240V
- Input power: 20W
- Output power: 5W
- LED brightness: 200 lumens (A++ efficiency)

The 4smarts TwinDock is a sleek, German-engineered LED lamp that doubles as a wireless charger for both your iPhone and Apple Watch.

Quality: Made of high-quality components, TwinDock Wireless 2 is German-engineered with a soft rubber touch base and a built-in magnet for the Apple Watch holder to ensure devices stay securely in place.

Convenience: Use the dimmable settings on the LED light to suit your environment, and the sleep mode function to automatically turn it off after an hour of use.

Functional: Mounts for the iPhone and Apple Watch offer a perfect angle so you can easily view videos, incoming calls and notifications.

Versatility: Qi wireless charging provides two coils in vertical and horizontal directions so you can charge any sized phone in either portrait or landscape.

Intuitive: Never worry about charging your devices overnight again. The charger shuts down once your devices are topped up to increase battery life and reduce energy usage.

- Smartwatch: DC 5V / 1A (5W)
- Smartphone: DC 5W / 7.5W / 10W (10W)
- 1 magnetic Qi charger for Apple Watch Series 1-6 / SE
- USB-A (backside port): DC 5V / 2.4A (12W)
- LED Lamp: 6W with sleep mode after 1 hour of use and A++ energy efficiency
- Wall charger: 100-240V ~ 50 / 60Hz, 1.5A
- Input station: DC 12V / 4A
- Dimensions: 30 x 31 x 7.4cm

It couldn't be easier: The magnets integrated into the UltiMAG DuoFold fit exactly with the MagSafe charging configuration and align your iPhone as well as the Apple Watch perfectly with the charging pad and guarantee an optimal charging process.

Compact: The flat charging pad can be folded up when not in use and thus stored in a space-saving manner.

Uncomplicated: Simply hold the back of your device to the charger. The magnetic attraction between iPhone 12 or Apple Watch and the charging pad ensures that the latter takes up the optimal charging position and transfers the ideal amount of current.

Pleasant: The soft-touch surface provides a pleasant feel.

Multifunctional: Optimal for all Apple iPhones from iPhone 8 upwards, but works equally well with Android devices that support wireless charging via qi (e.g. Samsung, Xiaomi, Huawei, LG, Google).

Indication: The integrated LED informs you about the status of the charger.

- Can be used with power supplies with Power Delivery or Qualcomm Quick Charge that have a USB-C socket
- Input USB-C
- Output power: 7.5-15W
- Frequency: 110kHz-205kHz

Charge your iPhone or AirPods wirelessly with just one click. Perfectly placed magnets in this charger fit perfectly with the MagSafe charging configuration and allow you to quickly charge with up to 15W.

Powerful and safe magnets for accurate alignment

Uncomplicated: Simply hold the back of your device to this wireless charger. The magnetic attraction between the device and the charger ensures that they connect easily, take up the optimum charging position and transfer the ideal amount of current.

Multifunctional: Various output powers also enable you to supply devices from Samsung, Xiaomi or Huawei wirelessly with power as required.

Safe: Various protocols protect against over current, overvoltage, overheating or short circuits.

Noble: The noble aluminium frame and the charging surface made of hardened glass give this UltiMAG Charger a stylish feel and appearance.

Compact: With its small dimensions and cable length of 1.2m, this indicator charger can be placed anywhere. It makes no difference whether at home or in the office. This charging station looks great everywhere.

- Can be used with power supplies with Power Delivery or Qualcomm Quick Charge that have a USB-C port
- Input power: 5V / 3A, 9V / 2A, 12V / 1.5A
- Output power: 5W, 7.5W, 10W, 15W (7.5W output for Apple iPhones with MagSafe)

This small power pack fast charges your USB-C laptop and 3 other devices without you ever having to reach for a power outlet again.

High-performance: Up to 78 watts of output power at the USB-C port make the charger as powerful as a conventional laptop power supply.

Efficient: The very low heat generation due to the use of Gallium Nitride made it possible to use smaller components with higher power, thus improving efficiency with minimal size.

Universal: Two Quick Charge 3.0 and two Power Delivery charging connectors supply up to 4 devices simultaneously and even laptops with new energy quickly.

Light as a feather and tiny: The MultiGaN mains charging station weighs just 271g and is extremely compact. You also save a lot of space on the road, because with the four charging ports you no longer need to pack another charger.

Smart: The built-in innovative ID chip ensures that every connected device receives the optimum charging current - for safe, battery-saving charging.

- Power supply from 100-240V for worldwide use
- Output power USB-C (PD1): DC 5V / 3A, 9V / 2A, 12V / 1.5A (18W)
- Output power USB-C (PD2): DC 5V / 3A, 9V / 3A, 12V / 3A, 15V / 3A, 20V / 3A (60W)
- Output power PD 1 + QC 2 combined: DC 5V / 3A
- Output power USB-A (QC1): DC 5V / 2.4A, 9V / 2A, 12V / 1.5A
- Output power USB-A (QC2): DC 5V / 2.4A, 9V / 2A, 12V / 1.5A

Supplies up to 6 devices with power. Via USB-C with Power Delivery, the USB-A connections with 5V / 2.4A or via the 15W inductive charging surface a multitude of devices can be charged comfortably and according to device-specific needs.

Fast: Recharge your devices in no time at all. With 15W inductive power output, the USB-C Power Delivery connector and 4 powerful USB-A outputs, you are able to recharge any smartphone, tablet or headset as needed.

Space-saving: The compact dimensions let you place the charging station comfortably anywhere. Five short cables with a length of 25 cm prevent unnecessary cable tangle and ensure that the station always appears tidy.

Universal: No matter which connection your smartphone or tablet has, the five cables included in the package allow you to charge all devices from all manufacturers. The USB-C to USB-C cable charges especially fast via Power Delivery and enables charging powers of up to 18W.

Non-slip: The rubberized surface with extra wide compartments keeps your devices securely in place while charging, even in combination with thick cases. The rubberized contact points on the underside of the charging station protect the surfaces and prevent scratches on tables or shelves.

- Input power: AC 100-240V ~ 50 / 60Hz 0.5A max.
- Output power total: 63W
- 1x USB-C with Power Delivery protocol, DC 3.6-6.5V / 3A, 6.5-9V / 2A, 9-12V / 1.5A
- 4x USB-A with DC 5V / 2.4A
- 1x wireless charging area with 15W

With 60 watts of output power, five charging ports, Qualcomm Quick Charge 3.0 and USB-C PD3.0, the VoltPlug PPS charging station stands out both for its immense range of features and for its super-fast charging.

60W

gunmetal

Powerful: With the Power Delivery 3.0 connection, you can charge smartphones, tablets and even notebooks at lightning speed with up to 30 watts.

Fast: Equipped with the latest fast-charging technology, your devices are charged up to 4x faster than with conventional charging stations.

Space-saving: With an integrated mains plug, you only need one socket and can charge up to 5 devices at the same time.

Mobile: The station can be placed in a radius of 1.5m around any socket, e.g. at the desk, bedside table or on the chest of drawers.

Smart: The integrated charging control distributes the charging current optimally to your connected devices and an intelligent charging switch-off reduces power consumption and protects the batteries.

- Supports charging protocols: PPS, APPLE 2.4, AFC, FCP, SCP, BC1.2, DCP1.5, QC3.0, QC2.0
- Mains connection from 100-240V for worldwide use
- Output power "PD" (USB-C): DC 5V / 3A, 9V / 3A, 12V / 2.5A, 15V / 2A (30W max.)
- Output power "Quick Charge": DC 5V / 3A, 9V / 2A, 12V / 1.5A (18W max.)
- Output power "Smart Charge" per interface & total: DC 5V / 2.4A (12W max.)
- Total output power: 60W max.

With this powerful 160W power bank you can say goodbye to weak and bulky extra batteries with limited compatibility. Whether you are travelling on the go or just need a bit of energy. Charge all your mobile devices with 4smarts' most powerful, versatile, fast, safe and durable power bank.

Powerful: The VoltHub Graphene has a 100W USB-C power delivery port and two additional USB-A ports that support Fast Charge technologies from all major brands including Apple, Samsung, Huawei, Oppo and VIVO. That means the VoltHub Graphene can also charge the MacBook Pro, the MacBook and even your iPhone.

Versatile: The 100W output and two 10W outputs let you charge 3 devices simultaneously. The VoltHub Graphene supports Qi. So, you not only charge your smartphone wirelessly, but also your Apple Watch, for example. The VoltHub Graphene is perfect for all your mobile USB devices, such as your GoPro, Bluetooth speakers, Nintendo Switch, headphones and drones.

Fast: Thanks to revolutionary Graphene battery technology, also used in Elon Musk's Tesla's, the VoltHub Graphene is our fastest charging power bank. 150W charge a 16000mAh battery within 45 minutes, the Power Bank itself can be fully charged in one hour 10 minutes.

Safety: The use of this Graphene technology allows fast charging with low temperature development, making the VoltHub Graphene our safest Power Bank.

Suitable for travel: With a battery capacity of 20000mAh, the VoltHub Graphene is also suitable for air travel. Travel with twice the battery life for your MacBook Pro or 5 times more power for your iPhone 11, so you'll always be reachable on the go.

The biggest all-rounder among power banks: Thanks to wireless charging, Qualcomm Quick Charge 3.0 and USB Power Delivery this little talent charges your smartphone at lightning speed - with any cable, or even without! The digital charging display and the fast charging USB-C cable are the technical icing on the

((())) wireless charging

Wireless: You don't have to carry a cable with you anymore, because this power bank charges your smartphone as soon as it's put on top.

Lightning fast: use fast charging techniques such as Qualcomm Quick Charge 3.0 and USB Power Delivery. They charge your devices and even the power bank itself in no time at all!

Enduring: The rich battery capacity completely charges up to three smartphones before itself has to be recharged.

Slim: The case is a mere 17mm thick, so it's barely noticeable.

Practical: A digital charging display shows precisely in a hundred steps how much energy is left in the power bank.

- Input Micro-USB: DC 5V / 2A
- Input USB-C (PD): DC 5V / 2.4A, 9V / 2A
- Output USB-A (QC3.0): DC 5V / 3A, 9V / 2A, 12V / 1.5A
- Output USB-C (PD): DC 5V / 3A, 9V / 2A, 12V / 1.5A
- Wireless output: 5W, 10W
- Dimensions: 144 x 69 x 16mm
- Weight: 211g
- USB-A to Micro-USB cable included

Turn your coffee bar, hotel, bar, restaurant and exhibition booth to a service paradise. While your guests charge their smartphones, they are able to study the menu and the beverage list, which can be placed inside the power bank housing, without any hurry.

Individual: Allows you to insert cards you have designed yourself. So your customers will always be informed about your latest offer.

Sales-oriented: Encourages guests to enter your store by offering them free power for their devices. They usually stay until their smartphone is half fully charged. During this time you have usually already sold one or two drinks per guest.

For everyone: Charges up to four devices simultaneously with two connection cables and two USB interfaces. The 3in1 cables cover every common plug type, so that none of your customers will be left out in the rain, regardless of their used smartphone model.

Enduring: Charges up to 7 devices before it needs to be charged itself.

Safe: Although the power bank is enormously powerful, you don't have to worry. We only use certified Samsung cells and short-circuit-proof charging electronics with overcharge and deep-discharge protection.

- Input interface round plug: DC 12V / 2A
- Charging time of the power bank: approx. 5 hours
- Output interfaces: 2x USB-A
- Cable connections: 2x Micro-USB, 2x Lightning, 2x USB-C
- Output power per connection & per cable: DC 5V / 2.1A
- Total output power: DC 5V / 8A

Extra power boost for your iPhone, iPad and Android devices - cables are handy, tidy and safely stored in the case of this high-performance power bank.

Clever: Thanks to its integrated, easily accessible USB-C and Lightning cables, annoying cable tangles are a thing of the past. From now on, you simply connect your iPhone, iPad or mobile device with a USB-C port to the power bank and can devote yourself to other things.

Efficient: The lithium polymer battery is specially designed for modern smartphones and provides powerful, safe charging and 300% extra battery life.

Universal: The iDuos 20W can be used everywhere. It effortlessly recharges all smartphones, tablets and other mobile devices with USB-C or Lightning port, and is slim enough to fit in any pocket - perfect for travelling.

Structured housing: The premium surface made of high-performance plastic with aluminium finish does not only look good for a long time, the grooved design also gives optimal hold in your hand and additional grip.

Safe Mode: Mode to charge smaller devices like headphones more safely.

With this multifunctional power set you get a complete jump-start kit including compressor and powerful power bank. All components are ready to hand and neatly arranged, safely stored in one small bag.

Powerful: 8800mAh easily jump starts up to 5 liters petrol and 3 liters diesel engines. After a long winter, you can also reactivate your lawnmower or motorcycle battery.

Effective: The integrated powerful compressor comes with various accessories. Simply connect the appropriate adapter to the respective tire and preset your desired tire pressure. The pump will work automatically until the correct pressure is reached.

Universal: Easily recharges almost any mobile device (smartphone, tablet, notebook, navigation device, camera, etc.).

Clever: The built-in LED lamp provides a light in the dark or when visibility is poor, or can be used as an emergency signal in SOS mode if you need to protect danger zone in case of breakdown.

Warning function: At low battery level to ensure that the PitStop3in1 has enough power for external starting.

- Input power DC 5V / 2A
- Output power USB-C: DC 5V / 2A
- Starting current 400A
- Peak current 800A
- Air hose 24cm (incl. compressed air connection)
- Max. pressure: 3.8 bar
- Charging time: < 6 hours

The VoltBeam Touch 2 keeps your smartphone in your car in an optimal position for e.g. navigation or call answering. It can be recharged as usual quickly and without an annoying cable.

Improved: With the new screw, the VoltBeam Touch 2 can be mounted even more easily on the air vent slot than its predecessor. The exclusive coating makes its surface pleasantly soft and gives it a noble appearance.

Intuitive: It offers a safer hands-free driving experience, allowing you to keep your eyes on the road.

Fast-charging: The Qi-enabled pad supports a charge up to 2x stronger than average for both iOS and Android smartphones*.

Secure: Position your phone securely in either portrait or landscape with the 360° rotatable arm for a comfortable, effortless driving experience.

Versatile: Designed to offer multiple mounting options (windshield, dashboard or air vent) for optimal viewing purposes.

- Delivers a wireless charging speed of up to 10 Watts
- Multi colored LED displays the charging status
- Built-in touch button to activate the motor brackets
- Can charge through most cases (up to 6mm thick)
- Suitable for devices with a width of 58 to 92mm

PD POWER DELIVERY
20W + 25W

High performance and smart design. Charge your iPhone, iPad or other portable power delivery capable devices at high speed even in the car.

Dual port: The two ports let you quickly and conveniently charge not only your phone in the car, but also your passenger's or any other USB-C mobile device.

Fast: Thanks to the integrated Power Delivery chip, charging is extra fast - you can charge your iPhone 8 from 0 to 50% in just 30 minutes.

Visible: The illuminated LED ring reliably shows you the position of the charger even in the dark. This means you can always reach the charging connections with your plug, even in poor lighting conditions.

Design: The extra wide contacts ensure a tight fit in the charging socket. So you and your passengers can always rely on a reliable power supply, even on rough roads.

Independent: Use both ports simultaneously and charge two devices at the same time without reducing the maximum charging power of 20W + 25W.

Smart: Intelligent charge cut-off conserves power consumption and battery life of your device. It automatically selects the required charging current depending on the device for optimal charging speed.

- Input power: 12-24V 4.5A
- Output power USB-C1: DC 5V / 3A, 9V / 2.77, 3.3-5.9V / 3A (PPS) or 3.3 - 11V / 2.25A (PD)
- Output power USB-C2: DC 5V / 3A, 9V / 2.25A, 12V / 1.66A (PD)
- Aluminium alloy housing
- Dimensions: 70 x 31 x 20mm

Extra fast charging speed even on the road. This dual car charger enables simultaneous, efficient charging for smartphones and tablets with Power Delivery and Quick Charge 3.0.

2in1: Using the USB-A and USB-C ports, you can charge two mobile devices at the same time while driving and even power your tablet.

Lightning fast: With 27W output power, Power Delivery and QC3.0 technology, the Rapid+ charges up to 3x faster than common car chargers.

Universal: The normed adapter fits into all common cigarette lighters.

LED: Thanks to the decent lighting, you can easily find the charging ports even in the dark.

Smart: The built-in smart chip automatically selects the appropriate charging standard depending on the device and thus ensures the best charging speed. Intelligent charge cut-off protects power consumption and extends the battery life of your device.

Flexible grip: The suspended pins on the sides ensure optimal hold of the charger even when driving on rough roads.

Safety: Latest multi-protection charging electronics protect against overvoltage, overcurrent, short circuit and overheating.

- Input power: 12-24V / 4.5A
- Output power USB-C: DC 5V / 3A, 9V / 3A, 12V / 2.25A max. (PD)
- Output power USB-A: DC 5V / 3A, 9V / 2A, 12V / 1.5A max. (QC3.0)

This display protection made out of tempered glass (9H, 0.3mm thin) protects the smartphone display from scratches and absorbs shocks efficiently.

- Ultrathin tempered glass (only 0.3mm thin) with rounded edges, for a pleasant touch & feel sensitivity
- Extremely hard glass with a surface hardness of 9H (to a Mohs hardness scale of 1 to 10)
- A fingerprint-resistant oleophobic coating and the anti-fingerprint technology repels oil, dust and dirt
- Easy to clean, installed quickly and removable with no residue

Our Second Glass quality classes:

Essential	This glass covers the main part of the display.
2.5D	This glass covers the display like a second skin and protects the entire illuminated area of the device display.
Curved 3D	The curved 3D glass fully protects even rounded displays. This glass is the most uncompromising protection for smartphones.

Special models:

Curved 3D Ultrasonix	Curved 3D glass, with ultrasonic compatible surface, protects the display reliable- without a hole and limitation of sensor and operation.
Privacy	Maximum and full-surface glass protection with integrated privacy technology for your device. The screen is thus optimally protected against damage and unwanted views from every direction are repelled.
2.5D for Tablets, Gaming & Watches	Proven 2.5D protection for additional technical equipment.
Second Glas for Cameras	Protect not only the display of your device but also the camera. The precisely fitting protective glasses for the lenses provide optimum protection against scratches and other damage.

Extremely durable, indestructible and complete all-round protection for your display.

Durable: Highest flexibility and maximum material quality enable an extremely long life of this display protector. Glass fibre reinforced plastic as the base material prevents cracks or breaks in the glass and guarantees the highest quality device protection for months.

Perfect fit: The extra thin, bendable glass covers the display like a second skin without restricting its touch sensitivity. All its cut-outs are precisely fitted to your device, so you don't have to worry about the accessibility to your front camera and buttons. Rounded edges give you a pleasant feel, while you're swiping.

Easy to clean: An oleophobic coating with anti-fingerprint technology has antibacterial effects and keeps oils, dust and dirt away from your device. This also makes cleaning super easy.

Case friendly: The cut of the glass lets you easily attach any back cover, without lifting the screen protector.

Unsere Hybrid Glasses

Crystal-Clear

The crystal-clear glass shows the brilliant color variety of your display, while keeping up a maximum level of protection. In addition, this special surface gives the device an incredibly nice feel.

Anti-Glare

The matt surface of the glass has anti-reflective properties. This allows the display to be viewed comfortably even in strong sunlight without reflecting. In addition, this special surface gives the device an incredibly nice feel.

The 4smarts SkyPods are sleek, true wireless headphones that deliver brilliant HD sound at a range of up to 30 meters.

Long-range: Leave your device up to 30 meters away while you continue to enjoy brilliant HD sound through Bluetooth 5.0.

Intuitive: Your device automatically pairs to the SkyPods once they're out of the case so you can either use one earpiece for mono or both for HD stereo sound.

Long-lasting: Power through those long days with a case that gives you around 15 hours of charge.

Functional: Protect your earphones in a compact and minimalist case made with magnets that automatically snap them into place.

Effortless: Easy-to-access controls on either earpiece allows you to play, pause, take calls, switch songs, or even activate your phone's voice assistant.

Convenient: An additional strap allows you to wear the earphones around your neck, so you won't lose them.

- Input power charging case: DC 5V / 500mA
- Battery usage (w/charging case): approximately 15-17.5 hours
- Battery usage per earpiece: 3-3.5 hours
- Charging case capacity: up to 5 full charges of both headsets (500mAh)
- Charging time per earphone: 2 hours

Media center and hands-free kit: No matter what car you drive, this FM transmitter brings your calls and music to your car speakers. You control your calls and music with a remote control that attaches flexibly anywhere on the dashboard.

FM transmitter: Play your favorites songs easily in your car via Bluetooth, USB stick or TF card on your car radio. The audio signal from your smartphone is sent to the FM transmitter via Bluetooth and from there it is transmitted on a frequency that your FM radio can receive, turning your old FM radio into a fully-fledged multimedia center.

Car charger: Two USB ports allow you to charge two mobile devices at the same time while driving and with a total output of 3.4A you can even power your tablet.

Remote control: Large buttons help you control media and manage incoming calls without having to look at them.

LED: The digital display shows you the current radio frequency.

- Input power: DC 12-24V
- Output USB-A 1: DC 5V / 1A
- Output USB-A 2: DC 5V / 2.4A
- Total output power: DC 5V / 3.4A
- Bluetooth Version: 5.0
- Supported Bluetooth protocol: A2DP
- Supports Siri and Google Assistant
- Music format: MP3, WMA, WAV, FLAC

The quick-change artist among the LoomiPods: The clever design of the LoomiPod OnTheGo with its integrated rechargeable battery lets you conveniently attach the illumination unit to the tripod without a cable or easily take it with you for shots outside.

Convertible: The clever folding mechanism of the LED lighting gives you unimagined possibilities to perfectly stage your videos. Illuminate yourself according to the situation with the appropriate number of light panels during your recordings.

Multifunctional: Screw the LED light quickly and easily onto the tripod, included in the scope of delivery, to illuminate videos while standing or simply place it on the desk for livestreams while sitting.

Mobile: Thanks to the built-in rechargeable battery, you are independent of external power sources and can therefore also create terrific lightened recordings outdoors at any time.

Untethered: Control the three dimmable light modes easily and intuitively via the remote control. You can switch the light on and off, change the light colour, adjust the brightness or activate the individual panels. According to your wishes and the required situation.

- Individually controllable LED panels
- Infrared remote control with Micro-USB charging connector
- Battery: Li-polymer 7.4V 2850mAh / 21.09Wh
- Input power: 5V / 2A
- Luminous flux: 463 lm
- Brightness: 865 lx (max.)
- Light temperature: 2846 - 6329K
- Weight Loomipod with Tripod: 858g
- Tripod made of durable aluminium and ABS
- Maximum height tripod: 164cm
- Maximum height tripod with LED light: 193cm

Put yourself in the limelight during your video transmissions: The 4smarts LoomiPod, with its three exposure modes, two different height tripods and the additional green screen lets you look perfect on any live stream, YouTube movie, TikTok video or photo.

Stylish: Illuminate your videos and photos perfectly, putting your smartphone in the perfect position to film you while sitting, as the LED light illuminates every scene perfectly.

Individual: The two tripods ensure that you can always position your phone at the best angle for your video. Use the larger tripod to create standing shots or the smaller one on tables to get a perfect shot while sitting down. The three different, dimmable light modes illuminate each situation perfectly.

Stable: The solid tripod allows you to place the holder securely on any surface and prevents unsightly wobbles or vibrations during your live stream.

Universal: The holder clip fits a wide range of smartphones and ensures that your device is exactly in position. It doesn't matter whether you're taking pictures or movies in portrait or landscape format.

Mobile: Always have the LoomiPod with you. The practical carrying bag lets you take the LED ring and tripods with you wherever you go.

Multi-functional: This ring light with a tripod is the solution for any live broadcast, show, tutorial videos and photos for social media.

Perfect for any videoconference at home or on the move. The stepless adjustable brightness and light colour of the LoomiPod Pocket ensure that you always appear in the best light.

Perfect video lighting: The 4smarts LoomiPod Pocket is particularly suitable for video calls. Whether it's a professional video conference via Zoom from the home office or a Skype call with the family, the LoomiPod Pocket ensures good illumination and the beautiful pictures.

Flexible: The stepless adjustable brightness and colour temperature of this video light combined with the multi-adjustable suction cup holder ensure that you are perfectly illuminated in every situation.

Universally usable: Can be attached to the back of almost any laptop, mobile phone or screen with the practical suction cup holder. In addition, the housing has a receptacle for the flash shoe of many cameras and a 1/4" internal thread with which the light can be attached to all common tripods. The included adhesive pad can be removed without leaving any residue and ensures that the suction cup holder can also be attached to structured surfaces.

Mobile: Thanks to the integrated 2000mAh rechargeable battery, it is perfectly suited for mobile use. Should the battery ever run out, the light can also be operated via the USB port of a laptop or any other USB-A power source.

Compact: Can be easily stored and is therefore always at hand.

- Brightness: 850 Lux / 0.5m
- Color temperature: 2500K-6500K +/- 200K
- Battery life: 2.5 to 8 hours depending on brightness setting

Illuminate selfies or video calls like a pro: the compact LED ring with clever clip attaches easily to your smartphone, tablet or laptop and illuminates you during your conversations and recordings.

Intuitive: Simply clip the selfie light onto your smartphone, select the desired exposure mode and you're ready to take photos or make video calls.

Individual: The three different light colours with three switchable light modes let you optimally illuminate every shot. You alone decide in which colour and strength you want to illuminate the shot.

Universal: The clamp with a maximum opening of 1.5 cm fits all smartphones, tablets or laptops perfectly.

Material-friendly: The rubberized contact points prevent the selfie light from slipping and protect your device from damage.

Compact: The small dimensions and minimal weight make it easy to carry around. Ideal for any jacket, trouser or handbag. This means that there are no limits to what you can do and you can also illuminate the scene optimally when you are out and about.

- 48 built-in LEDs
- Colour temperatures: 3000K, 4000K, 5500K

Universal, robust, indestructible and waterproof to a depth of 60m: the Dive Pro universal case allows you to take your smartphone with you on any diving or snorkeling trip and film or capture your adventures on photos.

Waterproof: With a maximum diving depth of 60 metres, this case is ideally suited for hobby snorkelers as well as professional divers.

Robust: The extremely stable housing and the durable materials reliably protect the smartphone after vacuum irrigation from water penetration and thus possible damage during dives.

Universal: Thanks to the sophisticated design, this dive bag can be used for a large number of devices. The internal suction cups hold the smartphone securely in position.

Intuitive: Connect your smartphone to the dive case quickly and easily via Bluetooth. After that you can use the joystick on the outside to navigate on your screen with the cursor and, for example, switch between photo and video recordings as well as start, stop or end videos.

Safe: The reliable twist lock and the silicone seal keep your smartphone dry during your dives, while the included wrist strap ensures that your smartphone is not accidentally lost.

- Bluetooth 5.0
- Bluetooth frequency: 2.402GHz - 2.480GHz
- Power supply via 2 AAA batteries (not included)
- Made of tempered glass, aluminium and polycarbonate
- For devices up to 6.9"

Your tablet becomes a laptop with a full keyboard and trackpad. Separate the protective cover from the keypad unit in one easy step thanks to the magnetic flap. The integrated pen holder is a practical everyday feature.

Trackpad

Indispensable: Whether at business meetings, at university or school. Tablets as a modern notepad are not to be imagined without. Thanks to the keyboard and touchpad, this clever flip case lets you use your tablet as a full-fledged laptop.

Spacious: Even the Apple Pen is not neglected in this all-rounder. The perfectly fitting compartment holds your operating pen securely in position and protects it from all conceivable dangers.

Elegant: The timeless design makes you look professional in every situation. It doesn't matter if you're keeping minutes during a business meeting or presenting your ideas to clients. This flip case is ideal for any occasion.

Convertible: If you decide you don't need the keyboard after all, and you feel like drawing or watching movies on the tablet, you can easily remove the magnetic tablet cover with a flick of the wrist. With the magnet inside, the case can be adjusted to your needs.

- Bluetooth 5.0
- Input USB-C
- Bluetooth range up to 10m

Perfect for your business! The case gives your device maximum protection and doesn't change the design. Ideal for any for your business appointments.

Durable: The two unbreakable components ensure that your device is protected to the maximum and still feels great in the hand. The flexible TPU frame absorbs bumps and knocks, while the high-strength polycarbonate back prevents scratches and gives the case extreme stability.

Discreet: The slim design makes you and your tablet look good in any situation. No matter whether you are at a business meeting or during your leisure time. The precise cut of the case does not distort the design or the lines of your device.

Accurate: The custom-fit case with its protective cover for buttons and the precisely cut openings ensure that your smartphone can be operated and connected optimally and yet is protected.

All-round protection: In order to guarantee maximum protection of the device and still integrate the Apple Pencil 2nd Gen into the concept, the frame of the case is designed in such a way that the pencil is magnetically attracted even with the case, so that it is always ready to hand.

- Material thickness protective case: 0.5 mm
- Material of protective case: Frame out of bump-absorbing TPU and backside out of high-strength Polycarbonate

The break-proof and fastest cable for your iPhone or iPad. With over 20000 tested bends this cable is engineered to last!

High-speed charging: This cable supports the fastest charging standard for iPhones and even charges iPads.

Fast data transfer: Synchronize data between your devices at extra high speed.

Nearly unbreakable: Cables most often break near the connectors. This is prevented by the specially developed bend protection with flexible suspension, which withstood 20,000 bends in a test without any problems. Aluminium plugs and aramid fibers further harden your cable.

Fully reversible: No matter in which direction you insert the plugs, they always fit.

Universal: You can also use this cable with your Apple 18W, 20W, 29W, 30W, 61W, 87W or 96W USB-C power adapter to charge your iOS devices.

- Maximum current transfer: 3A
- Maximum power flow: 20W
- Maximum data transfer rate: 480 Mb/s

The Fastest Magnetic Charging Cable you'll ever need.

Fast-charging: The German-engineered aluminium connector and thick internal wires improve stability and supports fast charging up to 100W.

Dependability: MagSafe fans rejoice! Bring convenience back into your life with a durable magnetic cable that will charge your device at its maximum speed.

Durability: Designed to withstand the wear and tear of daily use, the sturdy tightly-woven cotton jacket offers a flexible, tangle-free experience, and creates a much neater work environment - even when traveling.

Ease of use: Snaps into place both ways so you can use one hand, even in reduced visibility.

Versatility: At 1.8 meters long, it's the only cable you'll ever need to charge your USB-C enabled tablet, laptop or PC.

Protection: With the connector in place, you can now prevent dust and dirt from entering the charging port of your valuable device.

- 20V / 5A - up to 100W charging

Universal cable for fast charging and syncing of devices with Lightning or USB-C connector.

Multitasking: Suitable for charging as well as syncing.

Extra fast: The integrated power delivery chip enables fast charging.

Solid: Rugged aluminium connectors and cable jacket made of durable textile braid for an extra layer of protection. Kink protection prevents cable breakage and increases durability.

Powerful: The ComboCord CL can transfer up to 3A and is therefore compatible with fast chargers.

- USB-C to Lightning output power: DC 5V / 3A, 9V / 2A, 12V / 1.5A (20W max.)
- USB-C to USB-C output power: DC 20V / 3A (60W max.)
- 2in1 Plug

Add numerous interfaces to your laptop or MacBook as well as to many other mobile devices with a USB-C port. For example, the 9in1 hub adds two USB-A 3.0 ports, audio and video connections and an jack to connect to the local network at gigabit LAN speeds.

compatible also with **Samsung DeX**

USB Hub: Two USB-A 3.0 ports are perfect for connecting external USB sticks, hard drives or other peripherals such as mouse or keyboards. There is also a USB-C port that can fast charge your mobile device with up to 100W via Power Delivery while using the hub.

2 card readers: Fast reading and writing to SD and MicroSD memory cards.

Multimedia support: An HDMI port that supports 4k with 30 Hz refresh rate ensures brilliant transmission to projectors or external screens. Additionally, two 3.5mm ports are available for connecting a microphone or headset.

Network connection: If the WLAN signal is weak or unreliable, you can connect to the network via the 9in1 hub by cable.

- LAN connection RJ45 1G supports Ethernet with up to 1000 Megabit/s
- USB-A 3.0 port with an data transfer speed of up to 5 Gb/s
- USB-C 2.0 port for fast charging supports Power Delivery up to 100W
- HDMI 4K @ 30Hz
- 3.5mm microphone and headset connection
- SD and MicroSD memory card reader
- Supports desktop mode Samsung Dex

Probably the most compact USB-C to HDMI adapter on the market: Transfer videos, streams and movies in 4K from your laptop, smartphone or tablet to your TV easily with this little all-rounder..

Intuitive: Simply connect your adapter to the charging port of your USB-C device and project pictures, movies and games via HDMI onto your TV or projector.

Pin-sharp: Transfer the image from your USB-C device in high-resolution 4K to your TV. The refresh rate of 30Hz ensures that your transfer is played back smoothly and without interference.

Unbound: This clever gadget works completely without the need to download an additional app and is therefore suitable for a wide range of USB-C devices.

Compact: Minimal dimensions of the adapter allow you to store it comfortably on the road.

Multifunctional: Automatically triggers the „DeX“ desktop mode after connecting a compatible Samsung smartphone, and the „Easy Projection“ desktop mode after connecting a compatible Huawei smartphone.

Small and convenient: With this adapter you can equip devices with USB-A socket with a USB-C jack and thus continue to use them with modern USB-C accessories.

Simple: Just plug in and every USB-A connection becomes a modern USB-C socket. No software installation necessary!

Universal: Suitable for charging your mobile devices and data synchronization. Supports most USB-C peripherals (USB-C cables, USB-C memory sticks, USB-C hubs).

Sustainable: With the help of this clever adapter you can continue to use your old devices (computers, chargers, power banks) with modern USB-C accessories.

Compact: The minimum dimensions of the adapter allow you to store it comfortably when you are on the move.

ATTENTION: Does NOT support the transmission of video signals and peripherals that rely on the Power Delivery charging protocol (e.g. wireless MagSafe charger)!

This adapter allows you to connect any headset with a 3.5mm plug and a charger to the USB-C port of your smartphone and listen to music while the device is charging.

Flexible: Plug the adapter into your USB-C charging port and charge your smartphone via USB-C with up to 18W power while you comfortably listen to your favorite music with your 3.5mm headset. Ideal for on the move, in combination with a power bank.

Multifunctional: The integrated digital/analogue converter allows you to use devices with analogue signal for music playback via USB-C.

Controllable: Influence the functions of your device directly via the headphones. For example, pause songs, adjust the volume, take calls or record voice messages. The adapter transfers the signals to your device unhindered.

Stylish: The matte Aluminium housing and flexible cable impress with their discreet but high-quality design.

Compact: The small dimensions and minimal weight of this active adapter make it easy to take it with you wherever you go and store it when not in use.

- USB-C charging port for transferring up to 18W
- 3.5mm audio jack
- Total length: 12.5cm
- Weight: 15g

This active adapter differs from normal / passive adapters, as it has a built-in D/A controller and amplifier integrated inside the plug. As soon as a smartphone doesn't support an analogue signal on its USB-C port, this external D/A controller and amplifier is required for audio output.

Remove bacteria, viruses and mould from your smartphone!

24/7 germ protection: The nanocoating neutralizes pathogens (bacteria, viruses, mould) for seven days.

Quick and intuitive: The bacteria protection can be easily wiped onto the device with a cloth.

Medical quality: The effect of the coating has been tested several times and is used in numerous hospitals worldwide.

A lot helps a lot: With regular use, the surface of your device becomes very smooth and easier to clean. So the protective effect will increase regularly, the longer you use it.

- Among other things effective against: HIV, rotavirus, influenza, Ebola virus, Corona (COVID-19)

Clean your smartphone eco-friendly and gentle. The UV disinfection bag cleans your smartphone, tablet and other personal items from germs, bacteria and fungi without using chemicals.

Inside dimensions: 25x16x13,5cm

Clean: Disinfect your smartphone without any cleaning products. The UV lamps inside the bag remove pathogens on smartphones and many other everyday items naturally.

Easy: Unfold the bag and insert the item you would like to disinfect. Close the zip completely and place the detector in the safety strap on the start button. Connect the bag's cable to a power source and start disinfecting at the touch of one button. The process ends automatically in about 5 minutes.

Convenient: The fold ability of the bag makes it ideal for travelling. When opened, it offers enough space inside to clean even small tablets.

Useful: If you want to disinfect your smartphone on the go, the additional compartment offers enough space for an extra power bank. Simply connect both with the integrated USB cable and start the cleaning process. You can also connect the case to your car charger and use the time you spend driving to sterilize your mobile phone.

Safety: UV light can seriously damage your eyes and skin. For your own safety, the UV lamps turn off automatically when the automatic connection between the safety lock and the power button is interrupted.

- Removes 99.99% of all bacteria, germs, fungi and viruses
- Wavelength of ultraviolet light: 270-275nm
- Input power USB-A: DC 5V / 2A
- Output power: 3W
- Outer dimensions (folded): 25 x 182 x 55mm

Cleans your phone while it is charging - the MyGuard Disinfection Device with Wireless Charger removes germs, bacteria and mould from your phone without chemicals or toxic cleaners.

wireless charging 10W

Charging function: The inductive charger quickly recharges your Qi-compatible smartphone with up to 10W and without an annoying cable. Intuitive: Just place your device on the charging surface in the box and the charging process starts automatically.

360° disinfection: Use the time while your phone is charging and free it from 99.9% of all unwanted bacteria and harmful viruses. 6 ultraviolet lamps disinfects it from all sides. Duration of a disinfection process: 5 minutes

Aromatherapy: Boost the positive feeling of pore-deep cleanliness with a pleasant fragrance. Fill a few drops of aromatic oil into the opening and start the scenting at the push of a button. The result is a purity that you can smell. Oils sold separately.

Big storage capacity: Also suitable for large Smartphones up to 6.7" and other objects such as headphones, keys, jewellery, toothbrushes, mouth protection, ...and much more.

Safety: To protect your eyes from dangerous rays, the UV lamps switch off automatically when you open the lid during the disinfection process.

- Output power charging surface: 10W
- Output power disinfection: 2W
- Product dimensions: 22.5 x 12.5 x 4.5cm
- Inner dimensions: 19.7 x 10.4 x 2.7cm

Perfect for video recordings: This holder is smart and ensures that you are always at the centre of the shot. Thanks to the integrated object recognition, the holder follows you and always keeps the camera focused on you.

Works without an app: The smart technology for object tracking is completely integrated in the holder and works autonomously; you don't need an app or cable connection.

Secure object tracking: State-of-the-art AI technology ensures reliable detection and tracking of people.

Portrait and landscape mode: Holds your smartphone in both portrait and landscape mode.

355° rotation: The holder can rotate almost completely around its own axis and thus cover a very large area.

Many use cases: For example, ideally suited for action video recordings, video conferences or even live broadcasts.

Compatible: Can be perfectly combined with our LoomiPod tripods or mounted on all tripods with a standard 1/4" thread. The smartphone clamp can also be replaced by other holders with 1/4" screw.

- Battery: 1000mAh 3.7Wh rechargeable Lithium-Polymer
- Working time: up to 4 hours
- Power connector: Micro-USB 5V 1A
- Maximum load: 1.2kg

Compact, chic and absolutely stable: The 4smarts holder Compact holds smartphones securely in their place on the desk and folds up in no time when not in use.

Stable: Place your mobile device securely on your workstation and always keep an eye on it. Ideal for power users of smart devices.

Intuitive: Adjust the holder to suit your needs. The three hinges let you place it in the most comfortable position.

Compact: When you don't need the holder or leave your workplace, it can be folded up quickly and easily in a single movement, saving a lot of space.

Non-slip: The rubberised underside and holding surface for the device protects the table and prevents scratches or damage to your smartphone.

Keep your smartphone or tablet in view at all times without holding it in your hand. The universally adjustable Fold desk mount offers a secure hold for a wide range of devices.

Intuitive: Adjust the holder as desired. The hinge lets it put you in the most comfortable position. The extendable holding wings additionally ensure that even large trays are held securely in position.

High class: The noble aluminium with its matt finish is both stable and an eye-catcher on every workplace. The well thought-out design is rounded off by the rubberized contact points that prevent damage to the table and laptop.

Compact: The minimum dimensions when folded allow you to take the holder with you without any problems. Ideal for commuters between home office and workplace and sales representatives.

- Made from durable aluminium
- Rubberized contact points
- Maximum tilt of 180° possible
- Maximum load capacity of up to 660g
- Dimensions folded: 100 x 50 x 11mm
- Maximum dimensions unfolded: 100 x 140 x 83mm

With the 4smarts RingMount, you can attach your smartphone not only to the handlebars of your bike but also to a pushchair or scooter, for example. The best thing about it: when it is not in use, the holder is super small and inconspicuous.

Secure: 4 powerful springs guarantee a firm hold.

Convenient: The smartphone can be easily inserted into and removed from the holder without having to operate any release mechanisms or the like.

Discreet: When not in use, the holder has such a low profile that it does not disturb.

Universal: Can be mounted on all bars and handlebars with a diameter of 22.2 to 31.8mm.

Gentle: Rubber surfaces on the inside of the holder protect both the handlebar and the attached device.

- For all devices with a maximum width of 50-80mm
- Can be mounted on all bars with a diameter of 22.2 to 31.8mm
- Holds the unit in a horizontal position
- Material: aluminium alloy
- Weight: 125g
- Hex-wrench for assembly included

Spring into action with the 4smarts bar mount CITY. The universal holder for city scooters, bicycles, motorcycles or prams. The extremely durable strap guarantees an absolutely secure hold for your smartphone just in seconds.

Versatile: The universal fit makes the CITY holder compatible for any mobile phone from 4-6 inches. Attach your mobile phone to any city scooter, bicycle handlebar, motorcycle, buggy or shopping cart within seconds.

Maximum grip: Super elastic silicone encloses your device and each handlebar reliably and firmly.

Fixing within seconds: Insert your phone at the bottom, pull the flexible straps over the edges and attach everything amazingly easily to the handlebar.

Flexible silicone design: Improved Premium Silicone keeps your phone stable and secure in position even on bumpy paths. Your display can't slip or rotate easily to the handlebar. It also protects the back of your phone and the handlebars from scratches.

Ingenious fastening mechanism: Thanks to the clever locking mechanism, the holder can be fixed and released in just a few seconds.

Charge your smartphone or power bank environmentally conscious with inexhaustible solar energy. The foldable solar panel from 4smarts allows you to power your mobile devices during outdoor activities and this even without a power bank.

Simple: Charge your smartphone during any activity that takes place outside. Simply point the solar panel towards the sun, connect for example your smartphone via a USB-A cable and suitable output with the panel and your device will be charged with up to 10W.

Sustainable: Not only your smartphone or tablet will be charged with this solar panel. You can also connect it to a power bank and charge it. This way you store power and can feed it to your devices even at night or in dim light.

Independent: The clever folding mechanism makes it extremely easy to transport. If you don't need the panel because your devices are fully charged or night falls, you can easily fold it up and store it in your backpack to save space.

Convenient: Easily attach the solar pad to backpacks or tents with the included carabiner.

Outdoor suitable: Whether it's dust or rain, this solar charger is extremely durable and defies all weather and environmental conditions.
